

Toyota Land Cruiser 5700/Land Cruiser Front Ceramic Brake Pads 04465-60280

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Toyota Land Cruiser 5700/Land Cruiser Ceramic Brake Pad
- Model: Land Cruiser 5700/Land Cruiser
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-11037
- F/R: F
- FMSI: D1303
- OEM: 04465-60280
- Braking System: Advics
- Highlight: **front ceramic brake pad,
Toyota front ceramic brake pads , 04465-60280**

Product Description

The ceramic brake pads for the Toyota Land Cruiser 5700/Land Cruiser, model D1303, part number 04465-60280, designed for the front axle, can withstand the challenges brought by the SUV's weight and complex terrains. These pads provide exceptional durability and stopping power, ensuring safety during various adventure activities.

Specifications	
Product name	Toyota Land Cruiser 5700/Land Cruiser Ceramic Brake Pad
Model	Land Cruiser 5700/Land Cruiser
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-11037
FMSI	D1303
OEM	04465-60280
Braking System	Advics
Size	
Width	143.6mm
Height	84.3mm
Thickness	17.9mm
Model_MARKE	Toyota Land Cruiser 2008 model/Land Cruiser Prado RZJ200/Lexus RX350

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
