

High Wear Resistance Disc Brake Pad Set No ZK01001 Durable Components for Automotive and Industrial Brake System Repairs

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Installationtype: Bolt-on
- Hardware Included: Yes
- Wear Resistance: High Wear Resistance
- Certifications: ISO 9001, ECE R90
- Factory No: ZK-01001
- Environmental Compliance: Lead And Asbestos Free
- Package Quantity: 1 Set
- Guarantee Peroid: 30000-50000km

Product Description

Product Description:

The Disc Brake Pad Set is an essential component designed to provide superior braking performance and safety for a wide range of vehicles. Engineered with precision and crafted from the best brake pad material, this set ensures reliable stopping power, enhanced durability, and reduced noise, making it an excellent choice for drivers who demand both quality and performance.
Each package contains 4 brake pads, which is the perfect quantity to replace all the pads on one axle, ensuring balanced braking performance. This set is sold as 1 complete set, making it convenient and straightforward for vehicle owners or mechanics to perform a full brake pad replacement without the hassle of sourcing individual parts. This comprehensive package ensures that all brake pads match perfectly in terms of wear and performance characteristics.
One of the standout features of this disc brake pad set is the inclusion of shims. Shims play a critical role in reducing noise and vibrations, contributing to a quieter and smoother braking experience. By minimizing brake squeal and chatter, the shims included in this set enhance driving comfort while maintaining optimal brake function. This thoughtful addition underscores the product's commitment to delivering both performance and comfort.
When it comes to brake pads, material quality is paramount. This disc brake pad set utilizes the best ceramic brake pads technology, known for its excellent heat dissipation, lower dust generation, and superior longevity compared to traditional brake pad materials. Ceramic brake pads are widely regarded as the best brake pad material available on the market today, offering exceptional performance in both everyday driving and more demanding conditions. Drivers can expect consistent braking power, even under heavy use, making these pads ideal for city driving, highway cruising, and even spirited driving situations.
Safety and quality assurance are critical factors when selecting brake components. This disc brake pad set complies with stringent industry standards, holding certifications such as ISO 9001 and ECE R90. The ISO 9001 certification guarantees that the manufacturing processes meet rigorous quality management standards, ensuring the product's reliability and durability. Meanwhile, the ECE R90 certification confirms that the brake pads meet European safety and performance criteria, providing peace of mind that the product adheres to high safety standards required in many regions worldwide.
Customer satisfaction is a priority, and the product comes with reliable after-service support. Should any issues arise following purchase, customers can count on responsive and professional assistance. This after-service commitment reflects the manufacturer's confidence in the product's quality and their dedication to ensuring a positive ownership experience.
In summary, this Disc Brake Pad Set offers an excellent combination of quality, performance, and value. With 4 brake pads per package and all necessary shims included, it provides a complete solution for brake maintenance. The use of the best ceramic brake pads ensures superior braking efficiency, reduced dust, and extended pad life, making it an outstanding choice for any vehicle owner seeking the best brake pad material. Certified with ISO 9001 and ECE R90, and backed by dependable after-service support, this disc brake pad set stands out as a reliable and high-performing option in the automotive market.

Features:

Product Name: Disc Brake Pad Set
Brake Pad Type: Disc
Product Placement: Front And Rear
Factory No: ZK-01001
Hardware Included: Yes
Installation Method: Bolt-On
High-quality OEM brake pads for reliable performance
Designed as the best ceramic brake pads for superior stopping power
Durable and long-lasting materials ensuring safety and efficiency
Easy to install with included hardware and bolt-on method

Technical Parameters:

Product Name	Disc Brake Pad Set
Package Contents	4 Brake Pads
Environmental Compliance	Lead And Asbestos Free
After Service	Yes
Certifications	ISO 9001, ECE R90
Hardware Included	Yes
Installation Type	Bolt-on
Factory No	ZK-01001
Shims Included	Yes
Installation Method	Bolt-On

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, is designed to provide exceptional braking performance for a wide range of vehicles. Manufactured in China under factory number ZK-01001, this set is engineered to meet the highest standards of quality and safety. Whether you are replacing the front or rear brake pads, this bolt-on installation set is perfect for ensuring your vehicle's braking system operates smoothly and reliably.

One of the standout features of this Herito brake pad set is its use of the best brake pad material available on the market. The pads are made from high-quality ceramic compounds, making them among the best ceramic brake pads you can find. These good ceramic brake pads are not only highly durable but also environmentally friendly, being completely lead and asbestos free. This ensures that while you enjoy superior stopping power, you are also contributing to a cleaner environment.

The Herito Disc Brake Pad Set is suitable for various driving occasions and scenarios. Whether you are commuting daily in urban traffic, taking long highway trips, or navigating winding mountain roads, these pads provide consistent and reliable braking performance. The guarantee period of 30,000 to 50,000 kilometers ensures long-lasting durability, reducing the need for frequent replacements and providing peace of mind for drivers who demand the best from their braking components.

In addition, the bolt-on installation method makes it easy for both professional mechanics and DIY enthusiasts to replace brake pads without hassle. This user-friendly design allows for quick and secure fitting, minimizing vehicle downtime and ensuring that your brake system is restored to optimal condition promptly.

Overall, the Herito Disc Brake Pad Set (ZK-38001) is ideal for drivers seeking the perfect balance of performance, safety, and environmental responsibility. Its superior ceramic composition, combined with robust construction and easy installation, makes it the perfect choice for enhancing your vehicle's braking capabilities in both front and rear placements. Trust Herito for the best brake pad material that delivers excellent stopping power and longevity across a variety of driving conditions.

Customization:

Herito offers customization services for the Disc Brake Pad Set, model number ZK-38001, designed for both front and rear placement. As the best brake pad brand, Herito ensures high wear resistance with its premium ceramic brake pad materials, providing long-lasting performance. The bolt-on installation method makes fitting these disc brake pads straightforward and convenient. Each package contains 4 brake pads, and with reliable after-service support from Herito, customers can have peace of mind with their purchase. Originating from China, these brake pads combine quality and durability tailored to your specific needs.
