

Nissan Pulsar / Tiida Ceramic Brake Pad D1592 , D1060-ED500 Rear Brake Pad Replacement

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Nissan Pulsar/Tiida Ceramic Brake Pad
- Model: Pulsar/Tiida
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-22012
- F/R: R
- FMSI: D1592
- OEM: D1060-ED500
- Braking System: N
- Highlight: **D1060-ED500 rear brake pad replacement, D1060-ED500 Nissan Pulsar brake pad, Nissan Pulsar rear brake pad replacement**

Specifications	
Product name	Nissan Pulsar/Tiida Ceramic Brake Pad
Model	Pulsar/Tiida
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-22012
FMSI	D1592
OEM	D1060-ED500
Braking System	N
Size	
Width	139mm
Height	49mm
Thickness	13.8mm
Model_MARKE	Nissan Tiida 1.6/Tiida 1.6/Sylphy 1.6 (06-07)
	Junyi/Liwei/11 Sunshine 1.5 (for domestic models)

Upgrade the braking system of your Nissan Pulsar/Tiida with our advanced ceramic brake pads, model D1592. These pads are engineered to match the OEM part number D1060-ED500, ensuring a perfect fit and compatibility with your vehicle. Our ceramic brake pads offer a significant improvement in braking performance, providing a quieter, cleaner, and more durable alternative to traditional pads. With a focus on safety and quality, our brake pads are designed to deliver consistent stopping power and reliability for a confident driving experience. Please ensure to verify the product's compatibility with your specific vehicle model before making a purchase.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
