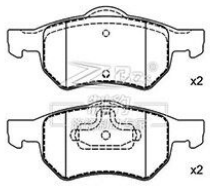
Chrysler European Voyager ATE Ceramic Brake Pads D1059 05072215AA Front Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million



Product Specification

- Product Name: Chrysler European Voyager Ceramic Brake Pad
- Model: Chrysler European Voyager
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-15005
- F/R: F
- FMSI: D1059
- OEM: 05072215AA
- Braking System: ATE
- Highlight: **ATE Ceramic Brake Pads**, **05072215AA**, **05072215AA Front Brake Pads**

Product Description

Chrysler European Voyager ,Ceramic Brake Pad,D1059,05072215AA,F

Specifications	
Product name	Chrysler European Voyager Ceramic Brake Pad
Model	Chrysler European Voyager
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-15005
FMSI	D1059
OEM	05072215AA
Braking System	ATE
Size	
Width	172.5 mm
Height	69.3 mm
Thickness	17.8 mm
Model_MARKE	Dodge Grand Caravan (Third Generation) MPV 2000/02- Southeast Motors Grand Voyager MPV 2007/11- Chrysler Voyager (Third Generation) MPV (RG) 2000/02-

The Chrysler European Voyager Ceramic Brake Pad, model D1059, part number 05072215AA, is tailored for Chrysler Voyager owners who prioritize exceptional braking capabilities and durability. Made from superior ceramic composite materials, this brake pad offers excellent stopping power in diverse driving conditions and significantly reduces brake dust, protecting the wheels from contamination. The low-noise attribute provides a more comfortable driving experience, and its high-temperature resistance ensures reliability and safety during emergency braking.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
