

4 Brake Pads Disc Brake Pad Set Shims Included Guarantee Period 30000 to 50000km Optimized for Long Lasting Durability

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- After Service: Yes
- Guarantee Peroid: 30000-50000km
- Certifications: ISO 9001, ECE R90
- Package Quantity: 1 Set
- Installationtype: Bolt-on
- Wear Resistance: High Wear Resistance
- Brake Pad Type: Disc
- Hardware Included: Yes

Product Description

Product Description:

The Disc Brake Pad Set is a high-quality replacement component designed to provide superior braking performance and reliability for your vehicle. Engineered with precision and durability in mind, this product ensures that your braking system operates at its optimal level, delivering safety and confidence every time you hit the road. Whether you are a daily commuter or an enthusiast who demands the best from your vehicle, these brake pads are an excellent choice.

One of the standout features of this Disc Brake Pad Set is its installation method. The bolt-on design allows for straightforward and secure fitting, making the installation process hassle-free and efficient. This means that both professional mechanics and knowledgeable DIYers can easily replace their worn-out brake pads without the need for specialized tools or extensive mechanical experience. The convenience of the bolt-on installation method helps reduce downtime and gets your vehicle back on the road quickly.

When it comes to brake pad types, this set is specifically designed as disc brake pads. Disc brakes are widely recognized for their superior stopping power and heat dissipation capabilities compared to drum brakes. The Disc Brake Pad Set takes full advantage of these benefits by using materials and construction techniques that optimize performance in various driving conditions, from city traffic to high-speed highway driving.

Durability and longevity are critical factors in choosing brake pads, and this Disc Brake Pad Set offers an impressive guarantee period of 30,000 to 50,000 kilometers. This extensive coverage ensures that you receive excellent value for your investment, with brake pads that maintain consistent performance over a long lifespan. The reliable wear characteristics help reduce the frequency of replacements, saving you time and money in the long run.

The package contents include 4 brake pads, enough to replace the pads on both front or rear wheels of most vehicles. Having a complete set ensures balanced braking performance and safety, as all pads will wear evenly and maintain harmony within the braking system. This comprehensive package eliminates the need to purchase individual pads separately and ensures that you have everything necessary for a full brake pad replacement.

One of the key highlights of this Disc Brake Pad Set is its use of the best ceramic brake pads technology. Ceramic brake pads are known for their exceptional performance, reduced brake dust production, quieter operation, and superior resistance to heat and wear. These pads provide a smooth and reliable braking experience while minimizing noise and dust accumulation on wheels, which helps keep your vehicle cleaner. The ceramic composition offers a significant advantage over traditional brake pad materials, delivering enhanced comfort and performance.

In addition to ceramic technology, the Disc Brake Pad Set incorporates the best brake pad material available in the market. This ensures optimal friction levels, consistent stopping power, and minimal fade under heavy braking conditions. The carefully formulated friction material balances performance and longevity, making it suitable for a wide range of driving environments. Whether you drive in urban settings or more demanding terrains, these pads provide the confidence you need to stop safely and effectively.

For those seeking quality and reliability, this Disc Brake Pad Set meets or exceeds OEM brake pads standards. OEM, or Original Equipment Manufacturer, brake pads are the benchmark for quality, compatibility, and performance because they are designed to the exact specifications of the vehicle manufacturer. By choosing this set, you are assured of a product that matches or surpasses the standards of your vehicle's original components, providing peace of mind and maintaining the integrity of your braking system.

In summary, the Disc Brake Pad Set is an outstanding choice for anyone looking to upgrade or replace their vehicle's brake pads with a product that combines ease of installation, durability, and superior braking performance. Featuring a bolt-on installation method, a comprehensive package of 4 brake pads, a long guarantee period of 30,000 to 50,000 kilometers, and the advantages of the best ceramic brake pads and brake pad materials, this set is engineered to deliver safe, quiet, and efficient braking. Furthermore, its compliance with OEM brake pads quality standards ensures that you receive a reliable and high-performance solution that fits perfectly with your vehicle's braking system. Invest in this Disc Brake Pad Set for enhanced driving confidence and safety on every journey.

Features:

Product Name: Disc Brake Pad Set
Certified with ISO 9001 and ECE R90 standards
Installation Method: Easy Bolt-On design
Guarantee Period: 30,000 to 50,000 km
Factory Number: ZK-01001
Suitable for Front and Rear placement
High-quality disc brake pads for reliable stopping power
Includes durable ceramic brake pads for reduced noise and dust
Compatible with OEM brake pads specifications

Technical Parameters:

Product Name	Disc Brake Pad Set
Brake Pad Type	Disc
Certifications	ISO 9001, ECE R90
Guarantee Period	30000-50000km
Installation Method	Bolt-On
Wear Resistance	High Wear Resistance
Environmental Compliance	Lead And Asbestos Free

Factory No	ZK-01001
Package Quantity	1 Set
Shims Included	Yes

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, originating from China, is designed to deliver exceptional performance and durability for a wide range of vehicles. These disc brake pads are engineered with high wear resistance, ensuring long-lasting reliability and safety on the road. Whether you are driving in urban traffic or tackling challenging terrains, the Herito disc brake pads provide consistent braking power and superior stopping performance.
Ideal for both front and rear placement, this brake pad set offers versatility and convenience for various vehicle types. The inclusion of shims helps reduce noise and vibration, enhancing the overall driving experience. As disc brake pads are critical for vehicle safety, the Herito ZK-38001 model is crafted using the best brake pad material to ensure optimal friction and heat dissipation, preventing brake fade even under heavy use.
These disc brake pads are perfect for daily commuting, long-distance travel, and even high-performance driving scenarios. Whether you are navigating city streets, highways, or mountainous roads, the Herito disc brake pads maintain excellent stopping power and responsiveness. Their high wear resistance also makes them suitable for heavy-duty applications, such as trucks and SUVs, where reliable braking is essential for safety.
In addition to routine driving, the Herito disc brake pad set is well-suited for various professional and recreational uses. Fleet vehicles, delivery vans, and commercial transports benefit from the durability and efficiency of these pads, reducing maintenance costs and downtime. For recreational drivers who enjoy spirited driving or off-road adventures, these disc brake pads offer the robust performance required to handle demanding conditions.
Overall, the Herito ZK-38001 disc brake pads combine high-quality manufacturing standards with advanced materials to provide a dependable braking solution. Their application spans everyday commuting, commercial use, and high-performance scenarios, making them a versatile choice in the automotive market. With a focus on safety, durability, and comfort, Herito's disc brake pads represent the best brake pad material for drivers seeking both peace of mind and superior braking performance.

Customization:

Herito offers Product Customization Services for the Disc Brake Pad Set, model number ZK-38001, designed to fit both front and rear placements. Manufactured in China, these bolt-on installation type disc brake pads come with included shims and hardware for a complete and easy installation process. Our brake pads are the best ceramic brake pads available, providing superior performance and durability. As OEM brake pads, they ensure perfect compatibility and reliability for your vehicle. Additionally, our products are environmentally compliant, being lead and asbestos free, making them a safe and eco-friendly choice for your braking needs.
