

# Front And Rear Disc Brake Pad Set 4 Brake Pads ZK01001 Components Designed for Industrial and Automotive Brake Systems

Our Product Introduction

## Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

## Product Specification

- Installation Method: Bolt-On
- Package Contents: 4 Brake Pads
- Hardware Included: Yes
- Certifications: ISO 9001, ECE R90
- Guarantee Peroid: 30000-50000km
- Wear Resistance: High Wear Resistance
- Shims Included: Yes
- Factory No: ZK-01001

## Product Description

### Product Description:

The Disc Brake Pad Set is a high-quality, reliable solution designed to meet the demanding needs of modern vehicles, ensuring optimal braking performance and safety. Manufactured under strict quality control standards, this brake pad set comes with certifications including ISO 9001 and ECE R90, guaranteeing that the product meets international safety and quality benchmarks. The factory number for this product is ZK-01001, reflecting its traceability and adherence to manufacturing excellence.

One of the standout features of this Disc Brake Pad Set is its ceramic brake pad composition. Ceramic brake pads are known for their superior performance compared to traditional brake pads. They provide excellent stopping power, reduced brake dust, and quieter operation, making them an ideal choice for drivers who prioritize both performance and comfort. The ceramic brake pad material also ensures longer lifespan and less wear on your vehicle's rotors, contributing to overall cost savings in maintenance and repairs.

Included with the Disc Brake Pad Set is all necessary hardware, facilitating a seamless installation process. The hardware included ensures that you have everything needed to securely mount the brake pads without requiring additional purchases. Installation is straightforward thanks to the bolt-on method, which allows for quick and secure attachment of the brake pads to your vehicle's braking system. This bolt-on installation method is user-friendly and suitable for both professional mechanics and DIY enthusiasts, minimizing the time and effort required to upgrade or replace your brake pads.

To assist with proper installation and maintenance, it is recommended to use a brake pad tool specifically designed for ceramic brake pads. Utilizing the correct brake pad tool ensures that the brake pads are installed correctly and safely, preventing common issues such as uneven wear or improper fitment. This tool also helps in reducing the risk of damaging the brake pads or other components during installation, thereby extending the overall lifespan of the braking system.

Customer satisfaction and support are paramount, which is why this Disc Brake Pad Set includes comprehensive after-service support. Should you encounter any issues or require assistance post-purchase, the after-service team is readily available to provide guidance and solutions. This commitment to service underscores the manufacturer's confidence in the product's durability and performance, offering peace of mind to all users.

In summary, the Disc Brake Pad Set is an excellent investment for anyone looking to enhance their vehicle's braking system with a reliable, high-performance product. Its ceramic brake pad composition, combined with certified quality standards ISO 9001 and ECE R90, ensures safety and efficiency on the road. The inclusion of all necessary hardware and the bolt-on installation method make upgrading your brakes a hassle-free experience. Additionally, using a brake pad tool during installation will maximize the benefits of the ceramic brake pad technology. With dedicated after-service support, this product not only promises outstanding braking performance but also a trusted partnership throughout its lifecycle.

Whether you are a professional mechanic or a car enthusiast, the Disc Brake Pad Set with factory number ZK-01001 is designed to meet your needs. It delivers superior braking power, durability, and quiet operation, all while maintaining compliance with stringent international standards. Choose this ceramic brake pad set for a safer, smoother, and more reliable driving experience today.

### Features:

Product Name: Disc Brake Pad Set

Certifications: ISO 9001, ECE R90 certified for quality and safety

High Wear Resistance ensuring long-lasting performance

Brake Pad Type: Disc for effective braking power

Uses the best brake pad material including advanced ceramic brake pads

Features premium ceramic brake pads for quieter and cleaner braking

Installation Type: Bolt-on for easy and secure fitting

Comes with reliable after service support

### Technical Parameters:

| | |
|---|---|
| Product Name | Disc Brake Pad Set |
| Factory No | ZK-01001 |
| Package Contents | 4 Brake Pads |
| Guarantee Period | 30000-50000km |
| Installation Type | Bolt-On |
| Certifications | ISO 9001, ECE R90 |
| After Service | Yes |
| Wear Resistance | High Wear Resistance |
| Brake Pad Type | Disc |

### Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, is designed to offer exceptional performance and reliability across a wide range of driving conditions. Originating from China and manufactured under stringent quality controls with ISO 9001 and ECE R90 certifications, these brake pads ensure safety and durability for everyday use. The set includes 4 brake pads, complete with shims, providing a

comprehensive solution for your vehicle's braking needs.
These disc brake pads are perfect for various application occasions, from daily commuting to long-distance travel. Whether you are driving in urban traffic with frequent stops or cruising on highways, the Herito ceramic brake pads deliver consistent braking power and reduced noise. Their ceramic composition ensures lower dust production and minimal wear on your rotors, making them an excellent choice for those seeking a cleaner and more efficient braking experience.
The Herito ZK-38001 brake pads serve as a reliable replacement for OEM brake pads, offering comparable or superior performance at a competitive price point. Ideal for drivers who demand high-quality components without compromising on environmental responsibility, these brake pads are lead and asbestos free, aligning with modern environmental compliance standards.
In scenarios where safety is critical, such as mountainous or hilly terrains, the Herito disc brake pads provide enhanced heat dissipation and fade resistance, ensuring dependable stopping power even under strenuous conditions. They are also suitable for vehicles used in commercial or fleet operations, where durability and longevity are paramount. With a guarantee period ranging from 30,000 to 50,000 kilometers, users can rely on these brake pads for extended periods without frequent replacements.
In summary, the Herito Disc Brake Pad Set is a versatile and high-quality choice for drivers seeking OEM brake pad alternatives that prioritize safety, environmental compliance, and performance. Whether you are upgrading your vehicle's braking system or need a trustworthy replacement, these ceramic brake pads from Herito provide peace of mind and superior braking efficiency across diverse driving scenarios.

## Customization:

Herito offers comprehensive product customization services for the Disc Brake Pad Set, model number ZK-38001. Manufactured in China, each set includes 1 package quantity and is designed for both front and rear placement. Our brake pads are environmentally compliant, being lead and asbestos free, ensuring safety and sustainability. We specialize in OEM brake pads and can tailor the product to meet your specific requirements, including compatibility with brake pad tools for easy installation. Our ceramic brake pads provide superior performance and durability. Additionally, Herito guarantees after service support to ensure customer satisfaction. Factory number ZK-01001 confirms our commitment to quality and reliability in every customized order.
