Ceramic Toyota Camry Brake Pads D1212 04466-33160 Front Ceramic Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Toyota Camry Vitara Ceramic Brake Pad
- Model: Toyota Camry
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-11002
- F/R: F
- FMSI: D1212
- OEM: 04466-33160
- Braking System: Akebono
- Highlight: **D1212 toyota camry brake pads**, **D1212 camry brake pads**, **04466-33160**

Product Description

Specifications	
Product name	Toyota Camry Ceramic Brake Pad
Model	Toyota Camry
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-11002
FMSI	D1212
OEM	04466-33160
Braking System	Akebono
Size	
Width	96.6 mm
Height	49.2 mm
Thickness	15.2 mm
Model_MARKE	Toyota/ Camry 2.0L/ 2.4L/ 2006 RAV4 (Third Generation)/ Lexus ES350/ Landwind X5

The Toyota Camry Ceramic Brake Pads, model D1212, part number 04466-33160, offer exceptional braking performance and durability for your vehicle. These brake pads are formulated with a 100% asbestos-free composition, ensuring eco-friendly operation. Made from advanced ceramic materials, they significantly reduce brake noise and deliver a smooth braking experience. Moreover, these pads boast excellent high-temperature stability and minimal disc wear, optimizing your vehicle's braking system for high stopping power, reliability, and safety.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
