

Citroën C-Elysee Ceramic Brake Pad D1213 4252.18 Front Brake Pad Set

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Citroën C-Elysee Ceramic Brake Pad
- Model: Citroën C-Elysee
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-26004
- F/R: F
- FMSI: D1213
- OEM: 4252.18
- Braking System: Bosch
- Highlight: **4252.18 front brake pad set,**
4252.18 brake pad set,
4252.18 ceramic brake pad

Product Description

Specifications	
Product name	Citroën c-Elysee Ceramic Brake Pad
Model	Citroën c-Elysee
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-26004
FMSI	D1213
OEM	4252.18
Braking System	Bosch
Size	
Width	136.8 mm
Height	52 mm
Thickness	18.0 mm
Model_MARKE	Peugeot 206 1.6L/ Peugeot 207 1.6L/ Citroën C2 1.6L/ Fukang 16V/ Elysée 16V (with ABS)/ New Elysée/ Picasso 2.0 manual old model (with ABS)/ New Picasso 1.6L/ C4 1.6/ Midas 1.3/1.6 (2008-)/ Dongfeng Fengshen S30/ Fengshen H30/ Shuike/ Peugeot 2008

The Citroën c-Elysee Ceramic Brake Pads, model D1213, part number 4252.18, are tailor-made for owners who demand exceptional braking performance and durability. Made with high-quality ceramic materials, these brake pads significantly reduce noise and dust during braking, providing a smoother braking experience. Their excellent high-temperature stability and resistance to thermal degradation ensure consistent braking response in all driving conditions. Moreover, the eco-friendly design of these pads minimizes wear on the brake discs, extending their lifespan and offering reliable protection for your safe driving.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
