# Mitsubishi EVO/ Mitsubishi Lancer Rear Brake Pads Replacement Ceramic D1368 4605A584

Our Product Introduction

## Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

## Product Specification

- Product Name: Mitsubishi EVO/ Mitsubishi Lancer Ceramic Brake Pad
- Model: Mitsubishi EVO/ Mitsubishi Lancer
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-23017
- F/R: F
- FMSI: D1368
- OEM: 4605A584
- Braking System: Brembo
- Highlight: **Mitsubishi EVO rear brake pads**, **4605A584**, **4605A584 rear brake pads replacement**

## Product Description

| Specifications | |
|---|---|
| Product name | Mitsubishi EVO/ Mitsubishi Lancer Ceramic Brake Pad |
| Model | Mitsubishi EVO/ Mitsubishi Lancer |
| Type | Brake Pad |
| Material | Ceramic |
| F/R | R |
| Factory No. | ZK-23017 |
| FMSI | D1368 |
| OEM | 4605A584 |
| Braking System | Brembo |
| Size | |
| Width | 86.7 mm |
| Height | 63.5 mm |
| Thickness | 13.6 mm |
| Model_MARKE | Mitsubishi EVO/ Mitsubishi Lancer Evolution |

Opt for the D1368 Ceramic Brake Pads, meticulously crafted for the rear axle ® of your Mitsubishi EVO/Mitsubishi Lancer, with the part number 4605A584. These brake pads are made from high-quality ceramic material, ensuring superior braking performance and durability under various driving conditions. Whether navigating through busy city traffic or on the highway, the D1368 brake pads provide consistent braking force and a low wear rate, making your driving experience safer and more comfortable.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
