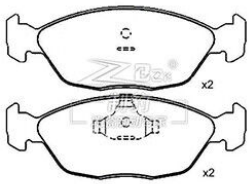
Volkswagen Santana2000 Front Ceramic Pads 3256981514 Vw Brake Pads Replacement

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million



Product Specification

- Product Name: Volkswagen Santana2000 Ceramic Brake Pad
- Model: Volkswagen Santana2000
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-01003
- F/R: F
- FMSI: D1660
- OEM: 3256981514
- Braking System: N
- Highlight: **Volkswagen Santana vw brake pads replacement**, **Volkswagen Santana front ceramic pads**, **3256981514 vw brake pads replacement**

Product Description

Specifications	
Product name	Volkswagen Santana2000 Brake Pad
Model	Volkswagen Santana2000
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-01003
FMSI	D1660
OEM	3256981514
Braking System	N
Size	
Width	156.5 mm
Height	54.9 mm
Thickness	17.2 mm
Model_MARKE	Santana 2000/3000/ Zhijun Vista 1.6/1.8/2.0/ Santana Poussin '99 Rookie/ Santana '06 Model/ '08 Model/ Jinchang B2

Volkswagen Santana2000 High-Performance Brake Pads, model D1660, part number 3256981514, offer solid protection for your driving safety. Made with premium ceramic composite materials, these brake pads feature excellent wear resistance and a stable friction coefficient, ensuring consistent braking performance even during high-speed or emergency stops. Suitable for all driving conditions, they ensure a smoother and safer journey.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
