

## Rear Lexus 2015 NX200T Ceramic Lexus Oem Brake Pads 04466-78010

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Lexus 2015 NX200T Ceramic Brake Pad
- Model: Lexus 2015 NX200T
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-17013
- F/R: R
- FMSI: D1805
- OEM: 04466-78010
- Braking System: N
- Highlight: **04466-78010 lexus oem brake pads, 2015 NX200T lexus oem brake pads, lexus brake pad 04466-78010**

## Product Description

Specifications	
Product name	Lexus 2015 NX200T Brake Pad
Model	Lexus 2015 NX200T
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-17013
FMSI	D1734
OEM	04466-78010
Braking System	N
Size	
Width	121.2 mm
Height	42.9 mm
Thickness	15 mm
Model_MARKE	Lexus NX200t 2015-/ Lexus NX300h 2015-/ 2014 Toyota Alphard/ Outlander (with electronic handbrake)/ 2018 Camry

**Experience Enhanced Safety and Performance with the Lexus 2015 NX200T Rear Brake Pads** Upgrade your Lexus NX200T with the premium quality rear brake pads, designed to provide superior stopping power and reliability. The D1805 brake pad set, replacing part number 04466-78010, is engineered specifically for the 2015 Lexus NX200T models, ensuring a perfect fit and optimal performance. These brake pads are made from high-grade materials that offer excellent wear resistance and reduced brake dust, keeping your wheels cleaner. Enjoy a quieter and more comfortable ride with our advanced friction formula that reduces noise and vibration. Trust in the durability and safety of our brake pads to keep you and your passengers secure on every journey. Enhance your Lexus's braking system today and experience the difference in control and confidence on the road.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
