

2016 Jeep Renegade 1.4/ 2.0,Ceramic Brake Pad,D1811,68273005AA,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: 2016 Jeep Renegade 1.4/ 2.0 Ceramic Brake Pad
- Model: 2016 Jeep Renegade 1.4/ 2.0
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-14012
- F/R: F
- FMSI: D1811
- OEM: 68273005AA
- Braking System: N
- Highlight: 68273005aa ceramic brake pad,
68273005aa ceramic brake pads,
2016 jeep ceramic brake pad

Product Description

Specifications	
Product name	2016 Jeep Renegade 1.4/ 2.0 Brake Pad
Model	2016 Jeep Renegade 1.4/ 2.0
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-14012
FMSI	D1811
OEM	68273005AA
Braking System	N
Size	
Width	141 mm
Height	64.3 mm
Thickness	19.4 mm
Model_MARKE	2016 Jeep Renegade 1.4/ 2.0

Optimize Your Drive with the 2016 Jeep Renegade's High-Performance Brake Pads Elevate your 2016 Jeep Renegade's safety and performance with our high-quality brake pads, model D1811. These pads are engineered to match OE compatibility standards, ensuring a perfect fit for your Renegade's 1.4 or 2.0 engine models. The part number 68273005AA signifies our commitment to precision and quality, providing you with a product that enhances your vehicle's braking responsiveness and durability. Designed for both urban driving and off-road adventures, these brake pads offer superior stopping power in all conditions. Trust in the reliability of our brake pads to maintain the adventurous spirit of your Jeep Renegade.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
