

## Porsche BOXSTER Ceramic Brake Pad D737 , 98635193915 front ceramic pads

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Porsche BOXSTER Ceramic Brake Pad
- Model: Porsche BOXSTER
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-05002
- F/R: F
- FMSI: D737
- OEM: 98635193915
- Braking System: Brembo
- Highlight: **98635193915 ceramic brake pad,  
Porsche BOXSTER ceramic brake pad,  
98635193915 front ceramic pads**

Specifications	
Product name	Porsche BOXSTER Brake Pad
Model	Porsche BOXSTER,
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-05002
FMSI	D737
OEM	98635193915
Braking System	Brembo
Size	
Width	114 mm
Height	78 mm
Thickness	15.5mm
Model_MARKE	Boxster Convertible (986) 1996/09-2004/12

### Porsche BOXSTER Ceramic Brake Pads: Precision Stopping Power (D737, 98635193915, F)

Discover unparalleled braking performance with our Ceramic Brake Pads tailored for the Porsche BOXSTER. The D737 model number signifies a design meticulously crafted to meet the exacting standards of Porsche vehicles. With the OEM part number 98635193915, these pads are perfect for models ranging from 1997 to 2008, including the base Boxster and Cayman. Rated 'F' for friction, they promise enhanced stopping power without the compromise of increased noise or dust. Embrace the blend of luxury and performance with our Ceramic Brake Pads and feel the difference at every stop.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
