

Toyota Corolla / BYD F3 Ceramic D822 04465-17100 Toyota Front Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Toyota Corolla/BYD F3 Ceramic Brake Pad
- Model: Toyota Corolla/BYD F3
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-11003
- F/R: F
- FMSI: D822
- OEM: 04465-17100
- Braking System: AKB
- Highlight: **BYD F3 toyota front brake pads,
04465-17100 toyota front brake pads,
04465-17100**

Specifications	
Product name	Toyota Corolla/BYD F3 Brake Pad
Model	Toyota Corolla/BYD F3
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-11003
FMSI	D822
OEM	04465-17100
Braking System	AKB
Size	
Width	116.3 mm
Height	51.6 mm
Thickness	16.2 mm
Model_MARKE	BYD F3/ G3/ Toyota Corolla 2004 1.6/ 1.8/ Vios/ Vitz/ Vela/ Geely King Kong/ Geely Vision/ Geely Freedom Ship/ Prius/ Great Wall Florid/ Jingling 1.3L/ Coolbear 1.5L/ Haval M1 Mini 1.3L/ Great Wall M2 4WD 1.5L/ Great Wall M4/ Lifan 620 1.5L/ 1.6L/ Yaku (Big Calipers)/ Xiali 2000 (Big Calipers)/ Jingyi 1.5L

Experience Unmatched Braking Precision with D822 Ceramic Brake Pads for Toyota Corolla and BYD F3

Elevate your driving safety with our **Ceramic Brake Pads (D822, 04465-17100, F)**, specifically designed for the **Toyota Corolla and BYD F3**. These pads are crafted from high-quality ceramic material, ensuring optimal performance and longevity. With a **front wheel position**, they are perfect for drivers who demand the best in vehicle safety and maintenance.

Our D822 brake pads boast a **width of 116.3mm**, a **height of 51.6mm**, and a **thickness of 16.5mm**, providing a precise fit for a range of models, including the **BYD F3 2005/03-2013** and Toyota **Corolla (E12J, E12T) 1.8 1ZZ-FE 2002-2004**. The soft texture of the ceramic material not only delivers stable friction but also enhances comfort during high-frequency braking scenarios, such as driving on mountainous roads.

Key Features:

Stable Friction Coefficient: Reliable stopping power in various driving conditions.

Soft Texture: Improved comfort and security with every brake application.

Cloth Muffler: Reduced noise for a more pleasant driving experience.

Wide Compatibility: Suitable for a variety of models, ensuring a perfect match for your vehicle.

Whether you're navigating steep slopes or urban landscapes, our D822 Ceramic Brake Pads provide the assurance and performance you need. Upgrade to these premium brake pads and enjoy a smoother, safer ride in your Toyota Corolla or BYD F3.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
