

Volkswagen Passat B5 Vw Brake Pads Replacement D840 4B0698151E Front

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Volkswagen Passat B5 Ceramic Brake Pad
- Model: Volkswagen Passat B5
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-01001
- F/R: F
- FMSI: D840
- OEM: 4B0698151E
- Braking System: Sumitomo
- Highlight: Volkswagen Passat vw brake pads replacement, 4B0698151E vw brake pads replacement, 4B0698151E volkswagen brake pad

Specifications	
Product name	Volkswagen Passat B5 Brake Pad
Model	Volkswagen Passat B5
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-01001
FMSI	D840
OEM	4B0698151E
Braking System	Sumitomo
Size	
Width	156.5 mm
Height	74.2 mm
Thickness	17.6 mm
Model_MARKE	Passat B5/Passat Lingyu/New Passat 1.8/New Passat 1.8T/New Passat 2.0L/New Passat 2.8L/Audi A6L (C6) 2.4L/Audi A4 (B6/B7)/Audi A6 (C5)/Hongqi Century Star (pre-facelift/post-facelift)/Hongqi Mingshi (pre-facelift/post-facelift)/BAIC BJ40/Lavida with Turbocharging

Premium Ceramic Brake Pads D840 for Volkswagen Passat B5 - Precision Stopping Power

Upgrade your Volkswagen Passat B5's braking performance with our **Ceramic Brake Pads (D840, 4B0698151E, F)**. These pads are engineered to deliver superior stopping power, enhanced durability, and a quieter braking experience for your vehicle.

Our D840 brake pads are constructed with a high-performance ceramic formula that ensures minimal noise and dust, preserving the cleanliness of your wheels and providing a more enjoyable drive. They are guaranteed to fit models from **1999 to 2005 with 288mm front rotors**, excluding the W8 variant. The advanced materials used in these pads not only extend the life of your brake rotors but also offer a consistent braking feel throughout their lifespan.

Key Features:

Optimized Performance: Experience reliable braking with our advanced ceramic compound.

Quiet Operation: Our pads are designed to reduce braking noise significantly.

Low Dust Emission: Keep your wheels cleaner for longer with our low-dust technology.

Extended Rotor Life: Benefit from the gentle interaction between the pads and rotors, prolonging rotor life.

Perfect Fit: Specifically made for the Volkswagen Passat B5, ensuring easy installation and optimal function.

Whether you're commuting daily or embarking on long road trips, our Ceramic Brake Pads will provide the safety and performance you expect from your Volkswagen Passat B5. Choose our D840 pads for a seamless upgrade to your vehicle's braking system.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
