

## Standard Ceramic Brake Pads Approximately 1.2 Kg Per Set Performance Under Harsh Conditions and Extended Operating Hours

Our Product Introduction

for more products please visit us on heritobrake.com

### Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

### Product Specification

- Shims Included: Yes
- Color: Black / Grey
- Manufacturer Part Number: DBP-001
- Size: Standard
- Braking System: ATE
- After Service: Yes
- Factory No: ZK-24008
- Width: 50mm

**Product Description:**

The Disc Brake Pad Set, identified by Factory No: ZK-24008 and Product Code: DBPS, is a premium-quality solution designed to enhance your vehicle's braking performance. Engineered specifically for use with the ATE braking system, this set of disc brake pads offers exceptional stopping power, durability, and reliability, making it an ideal choice for drivers who prioritize safety and efficiency on the road.

One of the standout features of this disc brake pad set is the inclusion of shims. Shims play a crucial role in reducing noise and vibration during braking, ensuring a smoother and quieter driving experience. By absorbing and dampening the vibrations generated when the brake pads contact the rotors, the shims help prevent annoying squeaks and harsh noises, which are common issues in lesser-quality brake pads.

These disc brake pads utilize advanced ceramic brake pad technology, which offers several advantages over traditional metallic or organic pads. Ceramic brake pads are known for their excellent heat dissipation, which minimizes the risk of brake fade during prolonged or heavy braking. This characteristic is particularly beneficial for drivers who frequently navigate mountainous terrain or engage in stop-and-go city driving where brakes are used extensively. Additionally, ceramic brake pads generate less dust compared to other types, helping to keep your wheels cleaner and reducing the need for frequent maintenance.

Durability is another key benefit of this disc brake pad set. The ceramic compound used in these brake pads is designed to withstand high temperatures and resist wear, meaning they tend to last longer than conventional brake pads. This longevity translates to cost savings over time, as you won't need to replace your brake pads as frequently. Moreover, the consistent performance of ceramic brake pads ensures that your vehicle maintains optimal stopping power throughout the life of the pads.

For ease of installation and maintenance, the Disc Brake Pad Set is compatible with common brake pad tools, allowing mechanics and DIY enthusiasts alike to perform brake replacements efficiently. Whether you are a professional technician or a car owner with some mechanical experience, having the right brake pad tool can make the process of changing disc brake pads more straightforward and less time-consuming. This compatibility ensures that you can maintain your braking system with minimal hassle, preserving the safety and performance of your vehicle.

Customer satisfaction is a top priority with this product, as evidenced by the comprehensive after-service support offered. Should you encounter any issues or require assistance with your Disc Brake Pad Set, you can rely on responsive and helpful after service to address your concerns. This commitment to customer care not only provides peace of mind but also underscores the manufacturer's confidence in the quality and reliability of their product.

In summary, the Disc Brake Pad Set with Factory No: ZK-24008 and Product Code: DBPS is an outstanding choice for those seeking high-performance, durable, and quiet disc brake pads for their ATE braking system. Featuring included shims to reduce noise, advanced ceramic brake pad technology for superior heat management and longevity, and compatibility with standard brake pad tools for easy installation, this product delivers exceptional value and safety. Backed by excellent after service, it ensures that your braking system remains efficient and reliable for miles to come.

**Features:**

Product Name: Disc Brake Pad Set

Compatible Model: Chery A3

Factory Number: ZK-24008

Product Code: DBPS

Dimensions: Varies By Model (e.g., 120mm X 50mm X 15mm)

Shims Included for Noise Reduction and Better Fit

High-Quality Ceramic Brake Pad Material for Enhanced Performance

Part of the Best Brake Pad Brand for Reliability and Durability

Designed Specifically for Efficient and Safe Disc Brake Pads System

**Technical Parameters:**

Model	Chery A3
FMSI	D1258
Dimensions	Varies By Model (e.g., 120mm X 50mm X 15mm)
Braking System	ATE
Width	50mm
Manufacturer Part Number	DBP-001
Shims Included	Yes
Factory No	ZK-24008
After Service	Yes
Weight	Approximately 1.2 Kg Per Set

**Applications:**

The ZKZB Disc Brake Pad Set, model number ZK-11011, is designed to deliver exceptional performance and reliability in a wide range of

applications. Manufactured in China under factory number ZK-24008, these brake pads are engineered to meet the highest standards of safety and efficiency. Featuring a standard size and a sleek black and grey color scheme, this product is compatible with the ATE braking system, ensuring seamless integration and optimal braking power.

These ceramic brake pads are ideal for everyday driving, offering excellent stopping power and enhanced durability. Whether you are commuting through busy city streets, navigating suburban roads, or embarking on long highway journeys, the ZKZB Disc Brake Pad Set provides consistent performance and superior heat dissipation. This makes them one of the best ceramic brake pads available, reducing brake fade and maintaining smooth braking even under demanding conditions.

In addition to daily driving, the ZKZB brake pads are perfectly suited for more challenging scenarios such as mountainous terrain or frequent stop-and-go traffic. Their composition as the best brake pad material ensures minimal dust production, quieter operation, and reduced wear on the braking system. This makes them an excellent choice for drivers seeking a balance between performance, comfort, and longevity.

For automotive enthusiasts and professional drivers alike, these brake pads offer reliable performance during spirited driving or emergency braking situations. The advanced ceramic formulation provides stable friction levels and quick response times, enhancing vehicle control and safety. Whether you are upgrading your vehicle's braking system or replacing worn-out pads, the ZKZB Disc Brake Pad Set is a dependable option that meets rigorous quality standards.

Overall, the ZKZB DBPS brake pads are versatile and effective for a variety of occasions and scenarios. From daily commutes to demanding driving environments, these pads ensure your vehicle stops quickly and safely with minimal maintenance. Trust in the best ceramic brake pads from ZKZB to deliver lasting performance and peace of mind on every journey.
