

## Interchange Part Number D1293 D1222 Best Ceramic Brake Pads Optimized for Smooth Quiet Operation and Enhanced Brake Life

Our Product Introduction

### Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

### Product Specification

- Package Quantity: 1 Set (4 Pieces)
- Interchange Part Number: D1293 D1222
- Package Contents: 4 Brake Pads
- Brake Type: Disc Brakes
- Type: Parking Brake
- Factory No: ZK-20007
- Braking System: Tokico
- Product Dimensions: 5.5 X 5.5 X 3 Inches

**Product Description:**

The Disc Brake Pad Set, featuring the manufacturer part number DBP-001, is a high-quality replacement solution designed to enhance the braking performance of your vehicle. This package includes 1 set consisting of 4 pieces, carefully engineered to fit perfectly within the Tokico braking system. Whether you are performing routine maintenance or upgrading your current brake pads, this set offers exceptional durability and stopping power, making it an excellent choice for drivers seeking reliability and safety on the road.

Measuring 8.5 X 5.5 X 2.5 inches in its packaging and with product dimensions of 5.5 X 5.5 X 3 inches, this brake pad set is compact and easy to handle during installation. Its precise size ensures a snug fit that aligns seamlessly with your vehicle's Tokico braking components. The design optimizes contact with the rotor, delivering smooth and consistent braking performance every time you hit the brakes.

One of the standout features of this Disc Brake Pad Set is its composition as ceramic brake pads. Ceramic brake pads are widely regarded as the best ceramic brake pads available due to their superior heat dissipation, reduced brake dust production, and quieter operation compared to traditional metallic or organic pads. These ceramic pads provide a balanced combination of enhanced braking power and longevity, contributing to safer driving conditions in both everyday and demanding environments.

Installation is made straightforward when paired with a reliable brake pad tool, which aids in the correct placement and securing of the pads within the braking system. Using the appropriate brake pad tool not only simplifies the replacement process but also helps prevent potential damage to the brake hardware, ensuring the pads function properly and extend the lifespan of your braking components. This set is ideal for automotive enthusiasts and professional mechanics alike who value efficiency and precision in brake maintenance.

In addition to performance, the ceramic brake pad set is designed with environmental considerations in mind. Its low dust emission keeps your wheels cleaner and reduces airborne particulates, contributing to a healthier environment. Furthermore, the quieter braking experience means less noise pollution, which is beneficial in urban settings and residential areas. The combination of these attributes underscores why many drivers consider these the best ceramic brake pads for their vehicles.

Durability is another key advantage of this Disc Brake Pad Set. Ceramic materials withstand heat better than other compounds, reducing the risk of brake fade during prolonged or heavy braking sessions. This resilience ensures consistent stopping power, whether you are navigating city traffic or descending steep hills. The robust construction of these pads also means less frequent replacements, saving you time and money in the long run.

Overall, the Disc Brake Pad Set with manufacturer part number DBP-001 is an excellent investment for anyone looking to improve their vehicle's braking system. Its compatibility with Tokico braking systems, combined with the benefits of ceramic brake pad technology, makes it a top choice for quality, safety, and performance. When installed using the proper brake pad tool, you can expect a smooth, responsive, and reliable braking experience that enhances your confidence behind the wheel.

Choose this Disc Brake Pad Set to enjoy the peace of mind that comes with using one of the best ceramic brake pads available on the market. Its advanced design, environmental benefits, and ease of installation position it as a superior option for maintaining your vehicle's braking efficiency and ensuring long-lasting safety on every journey.

**Features:**

Product Name: Disc Brake Pad Set

Type: Parking Brake

Brake Type: Disc Brakes

Dimensions: 8.5 X 5.5 X 2.5 Inches

Product Dimensions: 5.5 X 5.5 X 3 Inches

Heat Resistance: Up To 500°C

Designed to be one of the best ceramic brake pads for superior performance

Durable material ensures these best ceramic brake pads provide long-lasting braking power

Engineered as best ceramic brake pads to resist high temperatures and reduce brake fade

**Technical Parameters:**

|                          |                           |
|--------------------------|---------------------------|
| After Service            | Yes                       |
| Package Quantity         | 1 Set (4 Pieces)          |
| Dimensions               | 8.5 X 5.5 X 2.5 Inches    |
| Product Dimensions       | 5.5 X 5.5 X 3 Inches      |
| Heat Resistance          | Up To 500°C               |
| Type                     | Parking Brake             |
| Corrosion Resistance     | Yes, Coated Backing Plate |
| Braking System           | Tokico                    |
| Model                    | Hyundai Terracan          |
| Manufacturer Part Number | DBP-001                   |

**Applications:**

The ZKZB Disc Brake Pad Set, model number ZK-11011, originating from China, is an exceptional choice for those seeking reliable and

high-performance disc brake pads. Designed specifically for disc brakes, these ceramic brake pads are engineered to deliver superior stopping power while maintaining a quiet and smooth braking experience. Their compact dimensions of 8.5 X 5.5 X 2.5 inches and product dimensions of 5.5 X 5.5 X 3 inches make them an ideal fit for a wide range of vehicles, particularly for use as parking brake pads. These brake pads are perfect for daily commuting, ensuring safe and efficient braking in urban environments where frequent stops are common. They are also well-suited for highway driving, providing consistent performance at higher speeds and under varied road conditions. The corrosion-resistant coated backing plate enhances durability, making these pads a smart choice for drivers living in regions with harsh weather or high humidity, where rust and corrosion could otherwise compromise brake efficiency. In addition to regular driving, the ZKZB disc brake pads excel in more demanding scenarios such as mountain driving, towing, and off-road adventures. Their ceramic composition not only offers excellent heat dissipation but also reduces brake dust, which helps maintain cleaner wheels and prolongs the lifespan of the braking system. For those seeking the best ceramic brake pads available, the ZKZB model ZK-11011 stands out as a dependable and cost-effective solution. These brake pads are also highly recommended for use in parking brake applications, where reliable holding power is crucial. The precise fit and corrosion resistance ensure consistent performance over time, even when the vehicle is parked for extended periods. Whether you are a professional driver, an automotive enthusiast, or someone who values safety and quality in your vehicle maintenance, the ZKZB disc brake pads provide peace of mind and excellent braking performance. Ultimately, the ZKZB ceramic brake pads combine advanced materials, thoughtful engineering, and robust construction to meet the demands of various driving occasions and scenarios. From everyday city driving to challenging terrains, these disc brake pads offer the best balance of safety, durability, and comfort, making them a top choice for discerning drivers worldwide.

### **Customization:**

Our ZKZB Disc Brake Pad Set, model number ZK-11011, is designed specifically for the Hyundai Terracan and manufactured in China at Factory No: ZK-20007. These parking brake disc brake pads utilize the best brake pad material to ensure exceptional performance and durability. Featuring a ceramic brake pad composition, they offer superior heat resistance of up to 500°C, making them ideal for high-demand braking situations. Compatible with interchange part numbers D1293 and D1222, this set guarantees reliable stopping power and long-lasting wear for your vehicle.
