

Black Ceramic Brake Pads Chamfered Yes Suitable for in Heavy Duty Braking Systems Providing Performance and Durability

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Size: Standard
- Factory No: ZK-36003
- Package Contents: 4 Brake Pads
- Chamfered: Yes
- Braking System: TKO
- Oem: 4252.18
- Color: Black
- Quantity: 4 Pieces Per Set

Product Description:

The Disc Brake Pad Set, designed specifically for the Buick Firstland model, offers an exceptional OE replacement solution for your vehicle's braking system. Engineered with precision and adhering to the highest industry standards, this brake pad set ensures reliable performance, safety, and durability, making it an ideal choice for drivers seeking quality and peace of mind on the road. This particular set, identified by Factory No: ZK-36003, is crafted to meet or exceed the original equipment specifications, guaranteeing a perfect fit and seamless installation. The standard size of these disc brake pads ensures compatibility with your vehicle's braking components, providing optimal contact and efficient braking force. This accuracy in size and design helps maintain the integrity of your braking system while enhancing overall vehicle safety.

One of the standout features of this disc brake pad set is the chamfered design. The chamfering process involves beveling the edges of the brake pads, which plays a crucial role in reducing noise, vibration, and harshness (NVH) during braking. Chamfered brake pads contribute to smoother braking performance and minimize the chances of brake squeal, enhancing the driving experience significantly. This attention to detail highlights the product's commitment to quality and driver comfort.

When it comes to maintenance and installation, having the right tools is essential. Using a reliable brake pad tool can simplify the replacement process, ensuring that the disc brake pads are installed correctly and efficiently. This reduces the risk of damage to the braking components and helps maintain the optimal functionality of the brake system. Whether you are a professional mechanic or a DIY enthusiast, pairing this brake pad set with the appropriate brake pad tool is highly recommended for the best results.

In the competitive market of automotive parts, selecting the best brake pad brand can be challenging. This Disc Brake Pad Set stands out as a top-tier option, combining quality materials, precise engineering, and practical features like chamfering and OE replacement status. Choosing this set means investing in a product that not only meets stringent safety standards but also delivers consistent stopping power and long-lasting performance.

Furthermore, the durability of these disc brake pads ensures that they withstand the rigors of daily driving, including diverse weather conditions and varying road surfaces. The materials used in manufacturing are designed to resist wear and tear, reducing the frequency of replacements and contributing to overall cost savings in vehicle maintenance.

In summary, the Disc Brake Pad Set for Buick Firstland with Factory No: ZK-36003 is a superior OE replacement that offers precise fitment, enhanced comfort through chamfered edges, and reliable braking performance. Its compatibility with standard-sized brake systems, coupled with the recommendation to use a brake pad tool for installation, makes it a practical and efficient choice. For those seeking the best brake pad brand to ensure safety, reliability, and value, this product is an excellent option that meets all these criteria and more.

Features:

- Product Name: Disc Brake Pad Set
- Color: Black
- Chamfered design for reduced noise and vibration
- High-quality ceramic brake pads for superior braking performance
- Durable ceramic brake pad material ensures long-lasting use
- Compatible as disc brake pads for various vehicle models
- Factory Number: ZK-36003
- OEM Number: 4252.18
- 12 Months Warranty for peace of mind

Technical Parameters:

Model	Buick Firstland
Factory No	ZK-36003
Friction Coefficient	0.35
Package Contents	4 Brake Pads
Placement On Vehicle	Front And Rear
OEM	4252.18
Shims Included	Yes
Size	Standard
Warranty	12 Months
Interchange Part Number	D1293 D1222

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is a premium product originating from China that offers exceptional performance and durability for various braking needs. Designed with the TKO braking system in mind, these disc brake pads are crafted using the best brake pad material to ensure reliable stopping power and enhanced safety. The black-colored pads come in a standard size, making them compatible with a wide range of vehicles that require efficient braking solutions. These disc brake pads are ideal for a variety of application occasions and scenarios. Whether you are a daily commuter navigating city

traffic or an enthusiast who enjoys spirited driving on winding roads, the ZKZB brake pads provide consistent and smooth braking performance. Their chamfered edges help reduce noise and vibration, making them perfect for urban environments where quiet operation is appreciated. Additionally, the pads' design ensures minimal wear on the rotor, making them suitable for both short trips and long-distance drives.

For those seeking the best ceramic brake pads, the ZKZB ZK-11011 set is an excellent choice. Ceramic brake pads are known for their superior heat dissipation, reduced brake dust, and longer lifespan compared to traditional materials. This makes them particularly well-suited for scenarios involving frequent braking, such as stop-and-go traffic, hilly terrains, or towing heavy loads. The 12-month warranty offered by the brand further assures users of the product's quality and reliability.

In professional or recreational settings, including motorsports or off-road adventures, having dependable disc brake pads can significantly enhance vehicle control and safety. The ZKZB pads, with their standard size and black finish, not only perform well but also maintain an appealing look that complements the overall aesthetics of the braking system. Their origin from China reflects a blend of advanced manufacturing techniques and cost-effective production, ensuring customers receive the best value.

Overall, the ZKZB Disc Brake Pad Set model ZK-11011 is a versatile and trustworthy option suitable for everyday use, high-performance driving, and everything in between. When selecting brake pads, choosing the best brake pad material is crucial, and with ZKZB's disc brake pads, users can experience enhanced braking efficiency, safety, and durability across numerous driving conditions and scenarios.

Customization:

Our ZKZB Disc Brake Pad Set, model number ZK-11011, offers premium customization services to meet your specific needs. Manufactured in China, these OEM brake pads are designed for the Buick Firstland and come with a friction coefficient of 0.35, ensuring reliable and consistent braking performance. The set includes 4 brake pads, packaged securely for convenience and protection. Compatible with interchange part numbers D1293 and D1222, these disc brake pads provide easy installation and optimal fit. We also offer a 12-month warranty for peace of mind. Additionally, customization options for brake pad tools are available to enhance your maintenance experience.

Support and Services:

Our Disc Brake Pad Set is designed to provide reliable and efficient braking performance for a wide range of vehicles. Engineered with high-quality materials, these brake pads ensure optimal friction, reduced noise, and minimal wear for enhanced safety and durability. For installation, please ensure the vehicle is securely lifted and the wheel is removed. Carefully replace the old brake pads with the new set, making sure to follow the manufacturer's specifications and torque settings. It is recommended to check the brake rotor condition and replace or resurface if necessary to achieve the best braking results.

Regular maintenance of your braking system is crucial. Inspect the brake pads periodically for wear and replace them when the thickness reaches the minimum recommended level. Avoid aggressive driving habits to extend the lifespan of the brake pads.

If you experience any unusual noises, vibrations, or reduced braking effectiveness, inspect the brake system promptly or consult a professional technician. Proper bedding-in of new brake pads is advised to ensure optimal performance and longevity.

Our technical support team is committed to assisting you with product-related inquiries, installation guidance, and troubleshooting to ensure your satisfaction and safety.
