

Wear Sensor Included Ceramic Brake Pad 1 Set 4 Pieces Designed for Long Lasting Performance and Consistent Stopping Power

Our Product Introduction

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Wear Sensor Included: Yes
- Color: Black
- Accessories: Yes
- Thickness: 12 Mm
- Friction Coefficient: 0.35 - 0.45
- Heatresistance: Up To 600°C
- Package Quantity: 1 Set (4 Pieces)
- Length: 7.6 Inches

Product Description:

The Disc Brake Pad Set is an essential component designed to deliver outstanding braking performance, safety, and durability for a wide range of vehicles. This set includes four high-quality disc brake pads, each engineered with precision to ensure optimal contact with the rotor, providing smooth and reliable stopping power under various driving conditions. Weighing 1.2 kg, this set strikes the perfect balance between strength and lightweight construction, making it a practical choice for both everyday driving and more demanding scenarios. One of the standout features of this Disc Brake Pad Set is its thickness of 12 mm, which ensures a longer lifespan and enhanced heat dissipation during braking. The 12 mm thickness is carefully calibrated to maintain consistent performance while minimizing wear and tear, meaning you can rely on these pads for extended periods without compromising safety or efficiency. Additionally, the length of each pad measures 7.6 inches, providing ample surface area for effective friction and braking power. This size is compatible with a wide variety of disc brake systems, making the set a versatile option for many vehicles.

Included with the set are all the necessary accessories, making installation straightforward and hassle-free. Whether you're a professional mechanic or a DIY enthusiast, the comprehensive accessory package ensures that you have everything needed for a seamless replacement process. This attention to detail reflects the manufacturer's commitment to quality and customer satisfaction.

When it comes to selecting the best brake pad material, this Disc Brake Pad Set excels by utilizing advanced ceramic compounds. Ceramic brake pads are widely recognized as the best ceramic brake pads on the market due to their superior performance characteristics. They offer excellent heat resistance, reduced brake dust, and quieter operation compared to traditional metallic or organic pads. This means your braking system stays cleaner and quieter, while also providing consistent stopping power even in high-temperature conditions.

The disc brake pads in this set are engineered for optimal friction and minimal wear, ensuring that your vehicle can stop quickly and safely every time. The ceramic composition not only enhances durability but also contributes to better overall control, giving drivers confidence on both city streets and highways. Moreover, ceramic pads tend to be gentler on rotors, reducing the likelihood of rotor damage and extending the life of your entire braking system.

Weighting in at just 1.2 kg for the full set, these disc brake pads offer a practical combination of lightweight design and robust performance. This helps maintain vehicle efficiency without adding unnecessary bulk, which is particularly important for maintaining fuel economy and handling. The four-pad configuration ensures that all wheels receive consistent braking power, promoting balanced and stable stopping performance.

In summary, this Disc Brake Pad Set represents an excellent investment for anyone seeking the best brake pad material in a reliable, easy-to-install package. With its 12 mm thickness, 7.6-inch length, and inclusion of essential accessories, it meets the demands of modern vehicles while delivering the benefits of the best ceramic brake pads technology. Whether you're replacing worn-out pads or upgrading your braking system, these disc brake pads provide the safety, durability, and performance you need for peace of mind on the road.

Features:

- Product Name: Disc Brake Pad Set
- Includes Wear Sensor for enhanced safety
- Silent Design featuring Chamfer Design for noise reduction
- Made from high-quality Semi-metallic material
- Type: Parking Brake
- Weight: 1.2 Kg
- Compatible with OEM brake pads for reliable performance
- Also suitable for use with ceramic brake pad and ceramic brake pads systems

Technical Parameters:

Length	7.6 Inches
Heat Resistance	Up To 600°C
Guarantee Period	30000-50000 km
Wear Sensor Included	Yes
Package Quantity	1 Set (4 Pieces)
Color	Black
Thickness	12 mm
Wear Indicator	Included
Number of Pads	4
Silent Design	Chamfer Design

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is engineered for a wide range of application occasions and scenarios, making it an ideal choice for drivers seeking reliable and high-performance braking solutions. Manufactured in China with precision, this brake pad set offers exceptional quality and durability, suitable for both everyday commuting and more demanding driving conditions.

One of the key features of the ZKZB brake pads is their silent design, incorporating a chamfer design that effectively minimizes noise and vibration during braking. This makes the ZK-11011 model perfect for urban driving where quiet operation is highly valued, as well as for long-distance travel where comfort and reduced noise levels enhance the driving experience.

The brake pad set weighs only 1.2 kg, which contributes to maintaining optimal vehicle performance without adding unnecessary weight. With a thickness of 12 mm, these pads provide a robust braking surface that ensures consistent braking power and longevity. The high heat resistance of up to 600°C means these pads can withstand intense braking situations, such as highway driving, mountainous terrain, and stop-and-go traffic, without compromising performance or safety.

This product is guaranteed to last between 30,000 to 50,000 km, offering outstanding value and reliability under various conditions. Whether you are a professional mechanic using a brake pad tool for installation or a car enthusiast seeking the best ceramic brake pads, the ZKZB ZK-11011 set is designed to meet your needs. The use of the best brake pad material ensures superior friction performance, reduced wear, and enhanced safety.

Ideal for passenger cars, SUVs, and light trucks, the ZKZB Disc Brake Pad Set is also suitable for drivers who demand high-quality brake components for performance upgrades or replacements. Its versatility and durable construction make it an excellent choice for scenarios ranging from daily urban driving to more strenuous activities such as towing or spirited driving.

In summary, the ZKZB Disc Brake Pad Set model ZK-11011 combines silent operation, heat resistance, and long-lasting performance, making it a reliable and efficient brake pad choice for a variety of driving occasions and scenarios. Its superior materials and thoughtful design ensure safety and comfort, whether used with professional brake pad tools or as a trusted upgrade to your vehicle's braking system.

Customization:

Our ZKZB Disc Brake Pad Set, model number ZK-11011, offers premium ceramic brake pads designed for superior performance and durability. Originating from China, these ceramic brake pads measure 7.6 inches in length and weigh 1.2 Kg, providing an optimal balance of size and weight for effective braking.

Featuring an included wear indicator, these ceramic brake pads ensure timely maintenance and enhanced safety. With a friction coefficient ranging from 0.35 to 0.45, they deliver consistent and reliable stopping power under various driving conditions. Engineered to withstand heat resistance up to 600°C, the ZKZB ceramic brake pad set maintains performance even in high-temperature environments, making them ideal for demanding braking applications. Customize your brake system with our expertly crafted ceramic brake pad sets to achieve optimal braking efficiency and longevity.
