

Heatresistance Up To 600°C Semi Metallic Disc Brake Pad Set 1.2 Kg Suitable for Heavy Duty Applications and Long Lasting

Our Product Introduction

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Thickness: 12 Mm
- Numberofpads: 4
- Accessories: Yes
- Length: 7.6 Inches
- Material: Semi-metallic
- Package Quantity: 1 Set (4 Pieces)
- Type: Parking Brake
- Friction Coefficient: 0.35 - 0.45

Product Description:

The Disc Brake Pad Set is an essential component designed to deliver superior braking performance and enhanced safety for your vehicle. This set includes 4 high-quality brake pads, providing comprehensive coverage for both front or rear wheels, making it an ideal choice for drivers seeking reliability and durability. Each pad is meticulously engineered to meet stringent quality standards, ensuring consistent performance under various driving conditions.

One of the standout features of this Disc Brake Pad Set is its sleek black color, which not only gives it a professional and clean appearance but also signifies the use of advanced materials and coatings that contribute to its longevity and resistance to wear. The pads measure 7.6 inches in length, a size optimized to fit a wide range of vehicles, ensuring compatibility and ease of installation.

Included in the package is a complete set of 4 brake pads, offering everything you need for a full axle replacement. The set also comes with all necessary accessories, making the installation process straightforward and hassle-free. Whether you're a professional mechanic or a DIY enthusiast, having the right accessories included saves time and effort, allowing you to get your vehicle back on the road quickly and safely.

When it comes to choosing the best brake pad brand, this Disc Brake Pad Set stands out for its use of ceramic brake pad technology. Ceramic brake pads are widely recognized as the best brake pad material available in the market today. They offer numerous advantages over traditional organic or metallic pads, including quieter operation, less dust production, and superior heat dissipation. This means your braking system remains cool and effective, even during intense driving situations.

The ceramic composition of these brake pads ensures they provide excellent stopping power with minimal wear on your rotors, extending the lifespan of both the pads and the braking components. Additionally, ceramic brake pads tend to produce less noise and vibration, contributing to a smoother and more comfortable driving experience. This makes the Disc Brake Pad Set not only a practical choice but also an upgrade that enhances your vehicle's overall performance and safety.

Moreover, the black finish on these pads is not just aesthetic but functional. It helps to repel dust and debris, keeping your braking system cleaner for longer periods. This reduces maintenance needs and helps maintain consistent braking performance over time. The combination of high-quality ceramic material and thoughtful design elements positions this set among the best brake pad brands available, trusted by professionals and car enthusiasts alike.

In summary, this Disc Brake Pad Set offers a perfect blend of durability, performance, and ease of use. Its black ceramic brake pads, 7.6-inch length, complete set of 4 pads, and included accessories make it a comprehensive solution for anyone looking to replace or upgrade their braking system. By choosing this set, you are investing in the best brake pad material and technology, ensuring safer drives and longer-lasting parts. Whether you drive daily in urban traffic or take your vehicle on challenging terrains, these brake pads deliver reliable stopping power and peace of mind.

Features:

- Product Name: Disc Brake Pad Set
- Package Quantity: 1 Set (4 Pieces)
- Includes Accessories: Yes
- Number of Pads: 4
- Wear Indicator Included
- Wear Sensor Included
- Made with high-quality ceramic brake pads
- Considered among the best ceramic brake pads for durability and performance
- Reliable and good ceramic brake pads for smooth and quiet braking

Technical Parameters:

Color	Black
Wear Sensor Included	Yes
Length	7.6 Inches
Guarantee Period	30000-50000 km
Material	Semi-metallic
Thickness	12 mm
Accessories	Yes
Friction Coefficient	0.35 - 0.45
Wear Indicator	Included
Heat Resistance	Up To 600°C

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is a high-quality product originating from China, designed to deliver exceptional braking performance and reliability. These OEM brake pads are crafted from semi-metallic material, ensuring durability and efficient heat dissipation, which is essential for maintaining optimal braking under various driving conditions. Measuring 7.6 inches in length, these brake pads are engineered to fit a wide range of vehicle models, making them a versatile choice for many drivers.

One of the standout features of the ZKZB brake pads is the inclusion of a wear indicator, which provides timely alerts when the pads need replacement, thereby enhancing safety and maintenance convenience. The chamfer design incorporated into these pads contributes to their silent design, significantly reducing noise and vibrations during braking. This makes the ZKZB Disc Brake Pad Set ideal for drivers seeking a smooth and quiet braking experience.

These brake pads are perfect for various application occasions and scenarios. Whether you are commuting in urban traffic, embarking on long highway journeys, or navigating mountainous terrains, the ZKZB brake pads ensure consistent and reliable stopping power. Their semi-metallic composition offers excellent performance in both wet and dry conditions, making them suitable for all-season use. Additionally, the guarantee period of 30,000 to 50,000 kilometers underscores their longevity and robustness, providing peace of mind for everyday drivers and automotive professionals alike.

For those specifically looking for good ceramic brake pads, the ZKZB Disc Brake Pad Set offers an excellent alternative with its semi-metallic construction that balances performance and durability. While ceramic brake pads are known for their low dust and noise, the chamfer design of the ZKZB pads ensures a similarly quiet operation, making them a competitive choice among OEM brake pads. Whether you require replacement parts for routine maintenance or upgrading your vehicle's braking system, this set provides a reliable and efficient solution.

In summary, the ZKZB Disc Brake Pad Set (ZK-11011) is designed to meet the demands of various driving environments with its high-quality semi-metallic material, silent chamfer design, and practical wear indicator. Its OEM specification ensures compatibility and performance, making it an excellent choice for anyone seeking good ceramic brake pads or OEM brake pads with superior durability and noise reduction. Originating from China, this product combines advanced engineering with practical features to deliver a superior braking experience in multiple scenarios and occasions.

Customization:

Our ZKZB Disc Brake Pad Set, model number ZK-11011, offers premium product customization services to meet your specific needs. Manufactured in China, this set includes 1 package containing 4 high-quality ceramic brake pads designed as parking brake pads. Each pad features a thickness of 12 mm and a friction coefficient ranging from 0.35 to 0.45, ensuring optimal performance and safety. Whether you require custom packaging, branding, or specifications, we tailor our ceramic brake pads to your exact requirements, delivering reliable and efficient disc brake pads for your vehicle.
