

120mm X 60mm X 20mm Disc Brake Pad Set Number of pads 4 Product Dimensions 5.5 X 5.5 X 3 Inches Durable Replacement Parts

Our Product Introduction

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011
- Minimum Order Quantity: 100
- Price: 6.00
- Packaging Details: carton and pallet
- Delivery Time: 30-40 days
- Payment Terms: T/T
- Supply Ability: 4000000

Product Specification

- Heat Resistant: Yes
- Product Type: Brake Pads
- Slotted: Yes
- Wear Indicator: Included / Not Included
- Model: Mazda RX-8
- Packing: Customized
- Certifications: ISO 9001, ECE R90
- Thickness: 12 Mm

Product Description:

The Disc Brake Pad Set designed for the Mazda RX-8 is an exceptional choice for car owners seeking reliable and high-performance braking solutions. Crafted with precision and engineered to meet the rigorous demands of everyday driving, this set of ceramic brake pads offers superior stopping power, enhanced durability, and quiet operation, making it one of the best brake pad brand options available in the market today.

One of the standout features of this brake pad set is the inclusion of a wear indicator. The wear indicator is a crucial safety feature that alerts drivers when the brake pads have worn down to a level that requires replacement. This helps prevent damage to the rotor and ensures that the braking system remains effective and safe at all times. By incorporating this feature, the brake pads provide peace of mind and contribute to the overall longevity of the braking components.

Specifically designed for the Mazda RX-8, these brake pads are tailored to fit perfectly, ensuring optimal contact with the brake rotor. The precise dimensions of 120mm x 60mm x 20mm guarantee a snug fit, which is essential for consistent braking performance and reduced noise. The exact fitment also aids in even wear distribution, helping the pads last longer and maintain their effectiveness throughout their service life.

The brake pads come slotted, a design characteristic that significantly enhances their performance. The slots help in dissipating heat generated during braking, reducing the risk of brake fade under heavy use. This feature is especially beneficial during spirited driving or in situations where frequent braking is required, as it helps maintain consistent stopping power. Additionally, the slots assist in channeling away dust and debris, keeping the braking surface cleaner and contributing to quieter operation.

Constructed from high-quality ceramic materials, these ceramic brake pads are known for their exceptional performance and reliability. Ceramic brake pads produce less dust compared to traditional metallic pads, which helps keep your wheels cleaner and reduces airborne brake dust particles. Moreover, ceramic compounds offer excellent heat resistance and minimal expansion when heated, ensuring stable braking performance even under extreme conditions. This makes ceramic brake pads a popular choice among drivers who value both performance and longevity.

Each package contains 4 brake pads, enough to replace the pads on both front or rear wheels, depending on your vehicle's brake system configuration. This convenient packaging ensures that you have everything needed for a complete brake pad replacement, making installation straightforward and hassle-free. Whether you are a professional mechanic or a DIY enthusiast, the comprehensive package contents support an efficient maintenance process.

In summary, this Disc Brake Pad Set for the Mazda RX-8 combines advanced ceramic technology with thoughtful design features such as slotted surfaces and wear indicators to provide drivers with a top-tier braking solution. Its precise dimensions ensure a perfect fit, while the ceramic composition delivers quiet, clean, and reliable performance. Recognized as one of the best brake pad brand offerings, this set is ideal for those seeking to upgrade their vehicle's braking system with components that prioritize safety, durability, and driving comfort.

Choosing this ceramic brake pad set means investing in quality components that enhance your vehicle's stopping power and overall driving experience. Whether you are replacing worn-out pads or upgrading for better performance, this product embodies the attributes that discerning Mazda RX-8 owners look for in a brake pad: dependability, efficiency, and long-lasting performance.

Features:

- Product Name: Disc Brake Pad Set
- Suitable for Placement On Vehicle: Front And Rear
- Dimensions: 120mm X 60mm X 20mm
- Installation: Direct Replacement, No Modification Needed
- Packing: Customized
- Package Contents: 4 Brake Pads
- Made from high-quality ceramic brake pad material for superior performance
- Designed as disc brake pads to ensure efficient braking and durability
- Compatible with common brake pad tool for easy maintenance and replacement

Technical Parameters:

Product Dimensions	5.5 X 5.5 X 3 Inches
Number of Pads	4
Placement On Vehicle	Front And Rear
Product Type	Brake Pads
Certifications	ISO 9001, ECE R90
Dimensions	120mm X 60mm X 20mm
Packing	Customized
Width	50mm
Wear Indicator	Included / Not Included
Package Contents	4 Brake Pads

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is designed to provide reliable and efficient braking performance for a wide range of vehicles. Manufactured in China, these brake pads are crafted with the best brake pad material, ensuring durability, low noise, and excellent stopping power. Whether you are a daily commuter or an enthusiast looking to upgrade your vehicle's braking system, these brake pads offer outstanding performance and safety.

One of the most common application occasions for the ZKZB Disc Brake Pad Set is routine vehicle maintenance and brake system replacement. As OEM brake pads, they serve as a direct replacement for many vehicles, fitting both the front and rear placements on your vehicle without any modifications needed. This makes them an ideal choice for drivers who want an easy, hassle-free upgrade or replacement that meets or exceeds original equipment specifications.

These brake pads are particularly suitable for urban driving scenarios where frequent stopping and starting require reliable and consistent braking performance. Their ceramic composition makes them one of the best ceramic brake pads available, providing a smooth braking experience with minimal brake dust and reduced wear on the rotors. This is perfect for city drivers who value cleanliness and long-term maintenance savings.

In addition, the ZKZB brake pads are well-suited for highway driving and longer trips where dependable braking is crucial for safety. Their robust construction and optimal dimensions (5.5 X 5.5 X 3 inches, with a width of 50mm) ensure they maintain performance under varied conditions, including higher speeds and heavier loads. This makes them an excellent option for family vehicles, SUVs, and light trucks that require dependable braking power on both front and rear axles.

For automotive professionals and DIY enthusiasts alike, the ZKZB Disc Brake Pad Set offers a straightforward installation process as a direct replacement product. There is no need for any modifications, which helps save time and effort during brake servicing. This product is ideal for workshops, garages, and individuals looking to maintain optimal vehicle safety with the best brake pad material on the market. Overall, the ZKZB ZK-11011 Disc Brake Pad Set is a versatile, high-quality choice for anyone seeking the best ceramic brake pads that combine OEM quality, ease of installation, and superior braking performance. Whether used for everyday driving, occasional spirited drives, or professional automotive servicing, these brake pads deliver consistent and reliable stopping power in all scenarios.
