

## Front And Rear Brake Pad Tool Including Accessories Providing Complete Solutions for Brake System Maintenance and Repair

Our Product Introduction

### Basic Information

- Brand Name: ZKZB
- Model Number: ZK-000100

### Product Specification

- Corrosion Resistance: Yes, Coated Backing Plate
- Material: Ceramic / Semi-metallic / Organic
- Hardware Included: Yes
- Length: 7.6 Inches
- Product Placement: Front And Rear
- Width: 50mm
- Wear Resistance: High Wear Resistance
- Accessories: Yes

**Product Description:**

The Disc Brake Pad Set with Factory No: ZK-27013 is engineered to deliver exceptional braking performance and reliability for both front and rear wheels of your vehicle. Measuring 7.6 inches in length and 50mm in width, these brake pads are precisely designed to fit a wide range of vehicles, ensuring optimal contact and maximum stopping power. Whether you are replacing worn-out pads or upgrading your braking system, this set offers a perfect balance of durability, noise reduction, and heat resistance.

One of the key features that set this brake pad set apart is its composition using the best ceramic brake pads technology. Ceramic brake pads are renowned for their superior braking capabilities, quieter operation, and longer lifespan compared to traditional materials. The ceramic compounds used in this product provide excellent friction levels that enhance braking efficiency, making it an ideal choice for drivers who prioritize safety and performance.

When it comes to selecting the best brake pad material, ceramic stands out due to its heat dissipation properties and minimal dust production. Unlike organic or metallic pads, ceramic brake pads maintain consistent friction even under extreme braking conditions. This means you can rely on these brake pads for smooth and controlled stops, reducing wear on your rotors and improving overall brake system longevity. The Disc Brake Pad Set (ZK-27013) incorporates this advanced material technology to ensure every stop is precise and dependable.

Designed to be installed on both front and rear placements, this brake pad set offers versatility and convenience for comprehensive vehicle maintenance. The dual placement compatibility means you can equip your entire braking system with the same high-quality pads, resulting in uniform braking performance and balanced stopping power. This uniformity is critical for maintaining vehicle stability and control, especially during sudden stops or in challenging driving conditions.

In addition to performance, this brake pad set emphasizes safety and environmental considerations. The best ceramic brake pads are known for producing less brake dust, which not only keeps your wheels cleaner but also reduces airborne particulates that can impact air quality. This makes the ZK-27013 brake pads an eco-friendly choice without compromising on performance or durability.

Installation is straightforward thanks to the precise dimensions of 7.6 inches in length and 50mm in width, which match OEM specifications for many vehicles. This means the brake pads fit snugly into the brake calipers, minimizing any risk of rattling or misalignment. Proper fitting is crucial for optimal braking response and to prevent uneven wear, which can lead to costly repairs down the line.

Overall, the Disc Brake Pad Set Factory No: ZK-27013 represents a smart investment for drivers seeking the best brake pad material available on the market. By choosing ceramic brake pads, you benefit from enhanced braking power, quieter operation, longer service life, and reduced environmental impact. Whether you drive in urban settings requiring frequent stops or on highways demanding reliable performance, this brake pad set is designed to meet and exceed your expectations.

Upgrade your vehicle's braking system with the ZK-27013 Disc Brake Pad Set and experience the confidence that comes with using the best ceramic brake pads. Combining advanced material science with precise engineering, these brake pads ensure you maintain control and safety on every journey. Trust in the best brake pad material to protect you and your passengers, providing peace of mind every time you hit the brakes.

**Features:**

Product Name: Disc Brake Pad Set

Placement: Front and Rear

Type: Brake Pad

Corrosion Resistance: Yes, Coated Backing Plate

Width: 50mm

Wear Resistance: High Wear Resistance

Offers good ceramic brake pads performance

From the best brake pad brand

Designed to provide reliable and durable stopping power with good ceramic brake pads technology

**Technical Parameters:**

Corrosion Resistance	Yes, Coated Backing Plate
Factory No	ZK-27013
Wear Resistance	High Wear Resistance
Hardware Included	Yes
Accessories	Yes
Package Contents	4 Brake Pads
Installation Method	Clip-on
Product Type	Brake Pad
Material	Ceramic / Semi-metallic / Organic
Product Placement	Front And Rear

**Applications:**

The ZKZB Disc Brake Pad Set, model number ZK-000100, is a premium product originating from China, designed to meet the highest standards of safety and performance. As the best brake pad brand in the market, ZKZB ensures that every brake pad set delivers reliable stopping power and durability. With a length of 7.6 inches and a width of 50mm, these disc brake pads are engineered to fit a wide range of vehicles, making them ideal for various automotive applications.

This brake pad set is perfect for both everyday driving and more demanding scenarios, such as city commutes, highway cruising, and even off-road adventures. Whether you are a professional mechanic or a car enthusiast, the included hardware and brake pad tool make installation straightforward and hassle-free. The comprehensive package ensures that you have everything necessary for a smooth replacement process, enhancing convenience and reducing downtime.

In addition to routine vehicle maintenance, the ZKZB Disc Brake Pads are ideal for emergency repairs and upgrades. Their robust construction and superior friction materials provide consistent braking performance, which is crucial when navigating through heavy traffic or sudden stops. The disc brake pad set is also suitable for fleet vehicles, motorcycles, and sports cars that require dependable braking components.

After sales service provided by ZKZB adds an extra layer of confidence, assuring customers that support is available for any issues or questions. This commitment to customer satisfaction reinforces the brand's reputation as the best brake pad brand in the industry.

Whether you are replacing worn-out pads or upgrading to a higher quality product, the ZKZB Disc Brake Pad Set offers excellent value and peace of mind.

In summary, the ZKZB Disc Brake Pad Set with model number ZK-000100 is designed for a variety of application occasions and scenarios. From daily commuting and long-distance travel to performance driving and emergency repairs, these disc brake pads provide reliable, high-quality braking power. The inclusion of all necessary hardware and a brake pad tool ensures easy installation, while the after-service support guarantees ongoing satisfaction. Choose ZKZB for the best brake pad brand experience and enhanced vehicle safety.
