

50mm Width Disc Brake Pad Set Front And Rear Compatible With No ZK27013 Providing Consistent Brake Performance

Our Product Introduction

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-000100

Product Specification

- Upc: 123456789012
- Hardware Included: Yes
- Wear Resistance: High Wear Resistance
- Factory No: ZK-27013
- Product Type: Brake Pad
- After Service: Yes
- Corrosion Resistance: Yes, Coated Backing Plate
- Installation Method: Clip-on

Product Description:

The Disc Brake Pad Set, Factory No: ZK-27013, is engineered to deliver exceptional braking performance and durability, making it an essential component for any vehicle requiring reliable stopping power. Designed with precision and manufactured using the best brake pad material available, this product ensures consistent and safe braking under a variety of driving conditions. Whether you are navigating city streets or tackling more demanding terrains, this brake pad set stands out as the best brake pad brand choice for drivers who prioritize safety and quality.

One of the standout features of this Disc Brake Pad Set is its remarkable heat resistance, capable of withstanding temperatures up to 500°C. This high level of heat tolerance means that the brake pads maintain their structural integrity and effectiveness even under intense braking situations, such as downhill descents or heavy traffic stop-and-go driving. The ability to resist heat buildup reduces the risk of brake fade, ensuring that drivers experience consistent braking power every time they press the pedal. This makes the brake pads highly reliable and long-lasting, enhancing both safety and performance.

The disc brake pads are designed with a width of 50mm, providing an optimal surface area to deliver strong and stable contact with the brake rotors. This width contributes to even wear distribution, extending the lifespan of both the brake pads and the rotors. A properly sized brake pad is crucial in achieving smooth braking action, and with a 50mm width, this product is tailored to fit a range of brake systems effectively. The precise dimension ensures compatibility and ease of installation, making it a practical choice for mechanics and vehicle owners alike.

In addition to the high-quality brake pads themselves, the product package includes all necessary accessories for installation. This comprehensive kit simplifies the replacement process, allowing for a quick and hassle-free upgrade to your vehicle's braking system. Having the accessories included means that you won't need to source additional parts separately, saving time and effort while ensuring that everything fits perfectly. This attention to detail reflects the commitment to customer satisfaction and product excellence that distinguishes this Disc Brake Pad Set as the best brake pad brand in the market.

The Disc Brake Pad Set also features a unique UPC Code: 123456789012, which facilitates easy tracking and inventory management for retailers and customers. This universal product code ensures that you can quickly verify the authenticity of the brake pads and access detailed product information whenever needed. It also aids in warranty claims and customer support, providing added peace of mind to users.

When it comes to selecting brake pads, the material quality is paramount, and this Disc Brake Pad Set utilizes the best brake pad material to combine durability, noise reduction, and superior braking efficiency. The advanced compound formulation minimizes dust and wear, keeping your wheels cleaner and your braking system functioning smoothly over time. The material composition also helps reduce noise and vibrations, contributing to a quieter and more comfortable driving experience.

Overall, the Disc Brake Pad Set with Factory No: ZK-27013 represents a top-tier solution for anyone looking to upgrade or replace their vehicle's brake pads. Its heat resistance up to 500°C, optimal 50mm width, inclusion of accessories, and traceability via UPC 123456789012 all contribute to making it a reliable and high-performance choice. By selecting this product, you are investing in the best brake pad material and the best brake pad brand, ensuring your vehicle is equipped with components that prioritize safety, longevity, and superior braking power.

Features:

- Product Name: Disc Brake Pad Set
- Corrosion Resistance: Yes, Coated Backing Plate for enhanced durability
- Factory No: ZK-27013
- Package Contents: 4 Brake Pads included
- Product Placement: Suitable for Front and Rear installation
- Heat Resistance: Withstands temperatures up to 500°C
- Made from the best brake pad material, ensuring superior performance
- OEM brake pads quality for reliable and consistent braking
- High-quality ceramic brake pads for reduced noise and dust

Technical Parameters:

Package Contents	4 Brake Pads
Material	Ceramic / Semi-metallic / Organic (best brake pad material)
Product Placement	Front And Rear
Length	7.6 Inches
Factory No	ZK-27013
After Service	Yes
Heat Resistance	Up To 500°C
Wear Resistance	High Wear Resistance
Product Type	Brake Pad (ceramic brake pads, disc brake pads)
UPC	123456789012

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-000100, is an essential component designed to deliver superior braking performance for a wide range of vehicles. Manufactured in China by the renowned best brake pad brand ZKZB, these brake pads are engineered using the best brake pad material available—high-quality ceramic. This ceramic brake pad set offers exceptional durability and reliability, making it an excellent choice for drivers seeking both safety and longevity in their braking system.

These brake pads are ideally suited for various application occasions and scenarios. Whether you are driving in urban environments with frequent stop-and-go traffic, navigating winding mountain roads, or cruising on highways, the ZKZB ceramic brake pads provide consistent and smooth braking power. Their high wear resistance ensures that the pads maintain optimal performance even under intense braking conditions, making them perfect for daily commuting, long-distance travel, and even some light off-road adventures.

With a width of 50mm, the ZKZB Disc Brake Pad Set fits a wide range of disc brake systems, ensuring easy installation and compatibility. Each package contains 4 brake pads along with all necessary hardware, allowing for a complete replacement without the need for additional purchases. This convenience is especially beneficial for mechanics and car enthusiasts who value efficiency and quality in their maintenance work.

In addition to outstanding product quality, ZKZB offers excellent after service, providing customers with peace of mind and support long after the purchase. This commitment to customer satisfaction reinforces ZKZB's reputation as the best brake pad brand in the market. Whether you are upgrading your current brake system or replacing worn-out pads, the ZKZB ceramic brake pad set guarantees enhanced braking performance, reduced noise, and minimal dust production.

In summary, the ZKZB Disc Brake Pad Set is perfect for vehicle owners who demand high wear resistance and superior braking efficiency. Suitable for everyday driving, challenging terrains, and performance-oriented scenarios, this ceramic brake pad combines quality, durability, and convenience, making it a top choice among the best brake pad materials available today.
