

Heat Resistance Up To 500°C Ceramic Brake Pads Product Code DBPS Durable Performance Suitable For Commercial Vehicles

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Color: Black / Grey
- Heat Resistance: Up To 500°C
- Noise Level: Low Noise
- Brakeperformance: Excellent Stopping Power
- Operatingtemperaturerange: 40°C To 600°C
- Compatibility: Universal Fit For Most Vehicles
- Fmsi: D1674A
- Durability: High Wear Resistance

Product Description:

The Disc Brake Pad Set is a high-quality replacement component designed to deliver exceptional braking performance and reliability for a wide range of vehicles. Engineered with precision and manufactured to meet or exceed OEM specifications, these brake pads ensure optimal safety and durability on the road. Whether you are a professional mechanic or a car enthusiast performing maintenance, this set provides an excellent solution for restoring your vehicle’s braking system to peak condition.

One of the standout features of this Disc Brake Pad Set is its compatibility with OEM brake pads standards, offering a seamless fit and function equivalent to the original equipment installed by the vehicle manufacturer. This guarantees that the brake pads will perform reliably without compromising the integrity of your braking system. The FMSI number D1674A further confirms the exact fitment and specification, making it easier for you to identify and install the correct pads for your vehicle model without any guesswork.

Heat resistance is a critical attribute for brake pads, and this set excels in this area by withstanding temperatures up to 500°C. This high heat tolerance ensures that the brake pads maintain their structural integrity and braking efficiency even under intense driving conditions, such as sudden stops or prolonged downhill braking. The ability to resist heat buildup reduces the risk of brake fade, enhances safety, and prolongs the lifespan of the pads, making them a reliable choice for both everyday driving and more demanding applications.

The Disc Brake Pad Set features a sleek black and grey color scheme, which not only looks professional but also indicates the use of advanced friction materials. These colors are typical of high-quality brake pads designed to offer quiet operation and minimal dust generation, contributing to a cleaner wheel appearance and a more pleasant driving experience. The combination of materials and design ensures smooth braking with consistent performance, reducing noise and vibration commonly associated with inferior brake pads.

Designed specifically for disc brake systems, this brake pad set fits perfectly with your vehicle’s existing rotors and calipers. Disc brakes are known for their superior stopping power and heat dissipation compared to drum brakes, and using the correct brake pads is essential to maintain these advantages. This set will help you achieve reliable stopping power, improved response, and enhanced control, which are vital for safe driving under various road and weather conditions.

In addition to its excellent performance characteristics, the Disc Brake Pad Set comes with dedicated after-service support. This commitment to customer satisfaction means that if you encounter any issues or have questions about installation or maintenance, expert assistance is readily available. This after-service assurance provides peace of mind and ensures that your investment in quality brake pads is protected and supported throughout their service life.

For those who prefer to perform their own brake maintenance, the use of a proper brake pad tool is recommended to facilitate smooth and safe installation. Utilizing the correct brake pad tool not only simplifies the replacement process but also prevents damage to the brake components, ensuring that the new pads function correctly and last longer. Whether you are replacing your brake pads for the first time or are an experienced DIYer, integrating this set with the right tools will yield the best results.

In summary, the Disc Brake Pad Set is an outstanding choice for anyone seeking OEM brake pads quality with enhanced heat resistance, compatibility, and after-service support. Its precise fitment with the FMSI D1674A specification, coupled with the durable black and grey friction material, provides a dependable and long-lasting braking solution. By choosing this brake pad set, you are investing in safety, performance, and peace of mind for your vehicle’s braking system.

Features:

- Product Name: Disc Brake Pad Set
- Heat Resistance: Up To 500°C for superior performance
- Number Of Pieces: 4 high-quality ceramic brake pads included
- Noise Level: Low Noise operation for a quiet driving experience
- After Service: Yes, reliable customer support available
- Product Code: DBPS
- Made with premium materials, these ceramic brake pads provide excellent durability and braking efficiency
- Trusted as the best brake pad brand for safety and performance

Technical Parameters:

Type	Parking Brake
Product Code	DBPS
Number Of Pieces	4
Durability	High Wear Resistance
After Service	Yes
Brake Performance	Excellent Stopping Power
OEM	55110-70A00
Heat Resistance	Up To 500°C
FMSI	D1674A
Color	Black / Grey

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed for a wide range of vehicle applications, providing reliable and

efficient braking performance. Manufactured in China, this set includes 4 high-quality pads engineered to meet the specific needs of parking brake systems. Whether you are a professional mechanic or a car enthusiast, these disc brake pads are an excellent choice for maintaining safety and performance on the road.

One of the most common application occasions for the Herito disc brake pads is routine vehicle maintenance and brake system upgrades. When your vehicle's braking performance begins to decline, replacing worn-out pads with the best ceramic brake pads, such as those from Herito, ensures smooth, quiet, and responsive stopping power. The high wear resistance of these pads guarantees long-lasting durability, making them ideal for daily commuting, long-distance driving, and even more demanding urban stop-and-go traffic conditions. These good ceramic brake pads are also perfectly suited for use in specialized parking brake systems. Thanks to their precise design and OEM compatibility with part number 55110-70A00, the Herito pads fit seamlessly, providing consistent performance and enhanced safety when the parking brake is engaged. Whether you are parking on steep inclines or in busy city environments, this disc brake pad set offers reliable holding power to prevent vehicle rollback.

In addition to everyday passenger vehicles, the Herito disc brake pads are suitable for light trucks and SUVs where parking brake efficiency is critical. The set's product code DBPS identifies it as a premium choice for those seeking high-quality replacement parts without compromising on safety or durability. Automotive workshops and service centers will find these pads easy to install and compatible with a wide range of models, thanks to their OEM designation and careful manufacturing standards.

Overall, the Herito Disc Brake Pad Set ZK-10001 is an excellent option for anyone looking to upgrade to the best ceramic brake pads on the market. Its combination of high wear resistance, OEM compatibility, and reliable parking brake function makes it a versatile and trusted solution for numerous application scenarios. Choose Herito for quality, performance, and peace of mind every time you hit the brakes.
