

Black Grey Disc Brake Pad Set Product Code DBPS Parking Brake Compatible with Various Industrial and Commercial Vehicles

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Durability: High Wear Resistance
- After Service: Yes
- Brakeperformance: Excellent Stopping Power
- Number Of Pieces: 4
- Color: Black / Grey
- Oem: 55110-70A00
- Noise Level: Low Noise
- Compatibility: Universal Fit For Most Vehicles

Product Description:

The Disc Brake Pad Set, identified by Product Code DBPS and FMSI number D1674A, is an exceptional choice for vehicle owners seeking reliable and high-performance braking solutions. Engineered with precision and quality materials, this brake pad set is designed to deliver superior stopping power, enhanced durability, and quiet operation, making it one of the best ceramic brake pads available on the market today.

One of the standout features of this Disc Brake Pad Set is its universal fit compatibility. It is designed to fit most vehicles, providing a versatile solution for drivers who want a dependable brake pad without the hassle of searching for model-specific parts. This universal fit ensures that whether you are driving a sedan, SUV, or light truck, these brake pads will meet your vehicle's braking needs effectively. Manufactured to meet or exceed OEM standards, the Disc Brake Pad Set carries the OEM reference number 55110-70A00. This means you are getting a product that matches the original equipment manufacturer's specifications in terms of fit, form, and function. Using OEM brake pads like these guarantees that your vehicle maintains factory-level performance and safety, ensuring peace of mind on every drive.

What sets these brake pads apart is their ceramic composition. Ceramic brake pads are widely recognized as the best ceramic brake pads because they offer numerous advantages over traditional organic or semi-metallic pads. They generate less dust, which helps keep your wheels cleaner and reduces airborne particles that can be harmful to the environment and your health. Additionally, ceramic brake pads provide excellent heat dissipation, minimizing brake fade even during intense driving conditions, such as downhill descents or frequent stop-and-go traffic.

The ceramic material also contributes to quieter braking. Many drivers appreciate the reduction in brake noise, which enhances overall driving comfort. With the Disc Brake Pad Set, you can expect smooth and consistent braking performance with minimal noise and vibration, enhancing your driving experience.

Durability is another major benefit of these brake pads. The high-quality ceramic compounds used in their construction resist wear and tear better than many conventional materials. This means you will enjoy longer service intervals and fewer replacements, which translates into cost savings and less maintenance hassle over time. The robust build quality ensures that these pads can withstand the rigors of daily driving and maintain optimal performance throughout their lifespan.

In addition to superior product quality, the Disc Brake Pad Set comes with comprehensive after-service support. Should you encounter any issues or require assistance with installation or maintenance, the after-service team is readily available to provide expert help. This commitment to customer satisfaction underscores the reliability and trustworthiness of the product, giving you confidence in your purchase.

In summary, the Disc Brake Pad Set (Product Code: DBPS, FMSI: D1674A) offers an outstanding combination of universal compatibility, OEM-grade quality, and the advanced benefits of ceramic brake pad technology. Whether you are replacing worn-out pads or upgrading your braking system, these pads deliver the best ceramic brake pads performance, ensuring safety, comfort, and durability. Trust in this disc brake pad set to keep your vehicle stopping power at its peak while providing a quiet and clean braking experience.

Features:

Product Name: Disc Brake Pad Set

Durability: High Wear Resistance for long-lasting performance

Brake Performance: Excellent stopping power ensuring safety and control

Number of Pads: 4 pads included in the set

Operating Temperature Range: -40°C to 600°C suitable for various driving conditions

Noise Level: Low noise operation for a quiet driving experience

Made with premium materials, these ceramic brake pads are designed to offer superior performance

Recognized as some of the best ceramic brake pads available in the market

Ideal choice for those seeking reliable and efficient ceramic brake pad solutions

Technical Parameters:

Number Of Pieces	4
OEM	55110-70A00
Heat Resistance	Up To 500°C
Noise Level	Low Noise
Product Code	DBPS
Type	Parking Brake
Color	Black / Grey
Operating Temperature Range	-40°C To 600°C
Number Of Pads	4
Brake Type	Disc

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to deliver exceptional performance and reliability in a variety of

application occasions and scenarios. Manufactured in China, this set includes 4 high-quality pads, available in black and grey, that offer high wear resistance and durability, ensuring long-lasting braking efficiency. These disc brake pads are ideal for drivers seeking the best ceramic brake pads on the market, combining superior stopping power with minimal noise and dust.

This product is perfect for everyday urban driving, where consistent and reliable braking is crucial for safety amidst stop-and-go traffic. The Herito disc brake pads provide smooth and responsive braking, making them suitable for city commutes and suburban roads. Their high wear resistance ensures that the pads maintain their performance over extended periods, reducing the frequency of replacement and maintenance.

For those who enjoy spirited driving or require enhanced braking for more demanding conditions, the Herito ZK-10001 brake pads excel in performance. Whether navigating winding country roads or tackling hilly terrains, the best ceramic brake pads deliver precise control and confidence. Their excellent heat dissipation properties prevent brake fade during aggressive braking, making them a reliable choice for performance-oriented vehicles.

Additionally, the Herito disc brake pads are well-suited for light-duty trucks and SUVs that require robust braking components. The set's high durability and consistent friction levels help maintain vehicle control even when carrying heavier loads or during off-road excursions. This versatility makes the Herito ZK-10001 a practical option for a wide range of vehicles and driving styles.

Furthermore, the product comes with after-service support, ensuring customer satisfaction and assistance throughout the lifespan of the brake pads. Whether you are a professional mechanic or a DIY enthusiast, the Herito disc brake pads provide an optimal blend of quality, performance, and reliability. Choose the Herito ZK-10001 disc brake pad set for the best ceramic brake pads experience that enhances both safety and driving pleasure.
