

## Number Of Pads 4 best ceramic brake pads delivering smooth and braking backed by after service for commercial transport operators

Our Product Introduction

### Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

### Product Specification

- Type: Parking Brake
- Color: Black / Grey
- Noise Level: Low Noise
- Brake Type: Disc
- Operating temperature range: 40°C To 600°C
- Number Of Pieces: 4
- Heat Resistance: Up To 500°C
- After Service: Yes

**Product Description:**

The Disc Brake Pad Set, identified by the product code DBPS and OEM reference 55110-70A00, is an exceptional choice for those seeking reliable and efficient braking performance. Designed with precision and crafted from high-quality materials, these brake pads deliver excellent stopping power, ensuring safety and confidence on the road. Available in a sophisticated black and grey color combination, this set not only offers superior function but also a sleek and modern appearance that complements any vehicle.

One of the standout features of this Disc Brake Pad Set is its high wear resistance, which significantly enhances durability. These brake pads are engineered to withstand the rigors of daily driving and demanding conditions, providing long-lasting performance without compromising safety. The advanced materials used in this set make it a top choice for drivers who prioritize both longevity and efficiency in their braking components.

As a set of good ceramic brake pads, these disc brake pads provide numerous advantages over traditional options. Ceramic brake pads are known for their ability to offer smooth, quiet braking with minimal dust production, making them ideal for drivers who value cleanliness and noise reduction. This ceramic brake pad set combines these benefits with robust stopping power, ensuring that your vehicle responds promptly and reliably when you need it most.

These OEM brake pads meet stringent quality standards, ensuring compatibility and optimal performance with your vehicle's braking system. The OEM designation 55110-70A00 indicates that these pads are designed to fit precisely and function seamlessly with your vehicle's original brake components. Choosing OEM brake pads means you are investing in parts that are tested and approved by the manufacturer, providing peace of mind and maintaining your vehicle's integrity.

In addition to their excellent brake performance, the black and grey Disc Brake Pad Set is engineered for easy installation and maintenance. The thoughtful design ensures that they fit perfectly and work harmoniously with your vehicle's braking system, reducing the likelihood of issues such as uneven wear or brake noise. This makes them an excellent choice for both professional mechanics and DIY enthusiasts looking for dependable replacement parts.

Whether you drive a daily commuter, a performance vehicle, or an SUV, this Disc Brake Pad Set delivers consistent and reliable braking under a variety of conditions. Their high wear resistance means fewer replacements over time, saving you money and reducing downtime. Moreover, the excellent stopping power provided by this ceramic brake pad set enhances overall driving safety, giving you greater control and confidence on the road.

In summary, the Disc Brake Pad Set with product code DBPS and OEM number 55110-70A00 is an outstanding product that combines durability, performance, and quality. Its black and grey color scheme adds a touch of style, while the high wear resistance ensures a long service life. As a set of good ceramic brake pads, these OEM brake pads deliver excellent stopping power with minimal noise and dust, making them an ideal choice for any driver looking to upgrade or replace their braking system with reliable, high-performance ceramic brake pads.

**Features:**

- Product Name: Disc Brake Pad Set (DBPS)
- Brake Type: Disc
- Noise Level: Low Noise for a quiet driving experience
- Operating Temperature Range: -40°C to 600°C, ensuring reliable performance in extreme conditions
- Heat Resistance: Up to 500°C, providing excellent durability and safety
- Made from the best brake pad material, featuring the best ceramic brake pads for superior braking performance
- Designed as the best ceramic brake pads option for enhanced longevity and reduced wear

**Technical Parameters:**

Type	Parking Brake
FMSI	D1674A
Product Code	DBPS
Number Of Pieces	4
Heat Resistance	Up To 500°C
Brake Performance	Excellent Stopping Power
Noise Level	Low Noise
Brake Type	Disc
After Service	Yes
Durability	High Wear Resistance

**Applications:**

The Herito Disc Brake Pad Set, model number ZK-10001, is an essential component designed to enhance the safety and performance of your vehicle's braking system. Manufactured in China, this set features four high-quality pads that are universally compatible with most vehicles, making it an ideal choice for drivers seeking reliable and efficient braking solutions. Whether you are a professional mechanic or a DIY enthusiast, these OEM brake pads provide the perfect balance of durability and performance.

One of the primary occasions for using the Herito Disc Brake Pad Set is during routine vehicle maintenance. Replacing worn-out brake

pads is crucial to ensure optimal braking power and to prevent potential accidents. This set is especially suited for parking brake systems, offering a secure hold and consistent stopping power when your vehicle is stationary. The four-piece set, corresponding to the number of pads, ensures that you have everything needed for a complete replacement, saving time and effort.

The Herito ZK-10001 brake pads are widely appreciated for their ceramic composition, qualifying them as some of the best ceramic brake pads available in the market. Ceramic brake pads are known for their low dust production, quieter operation, and longer lifespan compared to traditional materials. This makes them an excellent choice for drivers looking for a clean, efficient, and comfortable driving experience. Additionally, the universal fit compatibility ensures that these pads can be installed on a wide range of vehicle models without hassle.

In professional automotive workshops, the Herito Disc Brake Pad Set is often paired with specialized brake pad tools to facilitate precise and efficient installation. These tools help in aligning and securing the pads properly, reducing installation time and ensuring safety standards are met. Whether you are upgrading your vehicle's braking system or performing a necessary repair, having the right brake pad tool along with these high-quality OEM brake pads is essential.

Furthermore, the Herito brake pad set is ideal for various driving scenarios, including daily commuting, long-distance travel, and urban driving where frequent stopping is required. Its robust design and superior friction materials ensure consistent braking performance under diverse conditions, giving drivers confidence and control. The inclusion of the FMSI number D1674A helps in identifying the exact fit and specifications, making it easier to source compatible parts and accessories.

In summary, the Herito ZK-10001 Disc Brake Pad Set is a versatile, reliable, and high-performance solution for maintaining and enhancing your vehicle's parking brake system. With a universal fit, OEM quality, and the advantages of ceramic brake pads, it suits a wide range of vehicles and driving needs. Whether you are performing routine maintenance or upgrading to the best ceramic brake pads, this set, combined with the appropriate brake pad tool, ensures your vehicle remains safe and responsive on the road.
