

Part Number ZK 11001 Ceramic Brake Pads With Chamfered Edges Engineered for Optimal Heat Dissipation and Wear Resistance

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Fmsi: D868
- Certifications: ISO 9001, DOT Approved
- Wearindicator: Included
- Material: Ceramic
- Thickness: 0.5 Inches
- Braking System: ATE
- Product Type: Brake Pad
- Interchange Part Number: D1293 D1222

Product Description:

The Disc Brake Pad Set, crafted with high-quality ceramic material, represents an excellent choice for those seeking reliable and efficient braking performance. Specifically designed to be compatible with the ATE braking system, these ceramic brake pads offer superior stopping power, enhanced durability, and quiet operation, making them a preferred option for a wide range of vehicles.

One of the standout features of these disc brake pads is their ceramic construction. Ceramic brake pads are known for their ability to withstand high temperatures without fading, ensuring consistent braking performance even under demanding conditions. Compared to traditional organic or semi-metallic pads, ceramic brake pads generate less dust, which helps keep your wheels cleaner and reduces the need for frequent maintenance. Additionally, the ceramic material contributes to quieter braking, minimizing the annoying squeals often associated with other types of brake pads.

These disc brake pads are engineered to meet the rigorous standards expected from the ATE braking system. ATE is a well-respected name in automotive braking technology, and their systems require components that can deliver precise and dependable performance. The Disc Brake Pad Set with Manufacturer Part Number ZK-11001 has been specifically designed to ensure perfect compatibility and optimal functionality with ATE brake systems, providing drivers with confidence and peace of mind on the road.

Durability is another critical aspect of these ceramic brake pads. Thanks to their robust ceramic composition, these pads have an extended lifespan compared to many traditional brake pads. This durability translates to fewer replacements over time, saving both time and money for vehicle owners. The advanced material formulation also helps to reduce wear on the brake rotors, ensuring that the entire braking system remains in excellent condition for longer periods.

Safety is paramount when it comes to braking components, and this Disc Brake Pad Set does not compromise in this area. The precise engineering and high-quality ceramic material provide consistent friction levels, ensuring reliable stopping power in various driving conditions, whether in city traffic or on the highway. This reliability helps to enhance overall vehicle safety, giving drivers the confidence they need to navigate any situation.

In addition to performance and safety, these disc brake pads come with a 12-month manufacturer warranty, underscoring the manufacturer's commitment to quality and customer satisfaction. This warranty provides added assurance that the product is built to last and that any manufacturing defects will be addressed promptly, offering peace of mind to consumers.

Installation of the Disc Brake Pad Set is straightforward for professional mechanics and experienced DIY enthusiasts alike. The product's design and fitment ensure a hassle-free replacement process, allowing for a quick upgrade to your vehicle's braking system. Proper installation is key to maximizing the benefits of these ceramic brake pads, so following the manufacturer's guidelines is highly recommended.

In summary, the Disc Brake Pad Set with Manufacturer Part Number ZK-11001 is an outstanding product that combines the benefits of advanced ceramic material with compatibility for ATE braking systems. These disc brake pads deliver exceptional braking performance, durability, and quieter operation while keeping maintenance needs low. Backed by a 12-month manufacturer warranty, they offer excellent value and reliability for anyone looking to upgrade their vehicle's brake pads. Whether you are a daily commuter or a driving enthusiast, these ceramic brake pads will help ensure safe, smooth, and efficient braking every time.

Features:

Product Name: Disc Brake Pad Set

Material: High-quality ceramic for excellent performance and durability

Braking System Compatibility: Designed for ATE braking systems

Certifications: ISO 9001 certified and DOT approved for safety and reliability

Interchange Part Numbers: Compatible with D1293 and D1222

Package Quantity: 1 Set containing 4 pieces

Features good ceramic brake pads that provide smooth and quiet braking

Durable ceramic brake pads that resist wear and reduce brake dust

Ideal for those seeking good ceramic brake pads with reliable stopping power

Technical Parameters:

Material	Ceramic
Warranty	12 Months Manufacturer Warranty
Heat Resistance	Up To 600°C
Product Type	Brake Pad
Certifications	ISO 9001, DOT Approved
Installation Type	Bolt-on
FMSI	D868
Thickness	0.5 Inches
Chamfered	Yes
Interchange Part Number	D1293, D1222

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is an essential component designed to deliver superior braking performance and safety in a wide range of driving situations. Manufactured in China, this set of ceramic brake pads is engineered to meet the highest standards of quality and reliability, making it an excellent choice for anyone seeking the best ceramic brake pads on the market. With a package quantity of one set containing four pieces, these brake pads are perfectly suited for replacing worn-out pads on your vehicle's braking system.

One of the primary application occasions for the Herito Disc Brake Pad Set is daily urban driving. Stop-and-go traffic demands brake pads that can withstand frequent use without compromising performance. The ceramic composition of these pads ensures smooth, quiet braking and minimal dust production, making them ideal for city commuters who want to maintain a clean and efficient braking system. The chamfered design further enhances the braking experience by reducing noise and vibration, providing a comfortable and confident drive.

For those who enjoy weekend road trips or longer highway journeys, the Herito ceramic brake pads offer reliable performance under sustained braking conditions. Their compatibility with the ATE braking system and FMSI code D868 ensures they fit perfectly and function optimally with a variety of vehicle models. This makes them a versatile option for drivers who demand consistent stopping power and durability across different terrains and driving speeds.

Additionally, these brake pads are suitable for light off-road or rugged terrain scenarios where dependable braking is crucial. Whether you are navigating gravel roads or uneven surfaces, the Herito Disc Brake Pad Set provides the robust friction and heat resistance needed to maintain control and safety. This versatility makes them one of the best ceramic brake pads available, trusted by drivers who require dependable braking performance in diverse environments.

In summary, the Herito ZK-10001 Disc Brake Pad Set is perfect for everyday urban driving, long-distance travel, and light off-road adventures. As the best ceramic brake pads, they combine advanced material technology, precise design, and reliable manufacturing from China to deliver exceptional braking efficiency and comfort. Investing in this set means choosing durability, safety, and peace of mind on every journey.

Customization:

Herito offers the best brake pad brand with the ZK-10001 model, a high-quality ceramic brake pads set designed for superior performance and durability. Manufactured in China, this disc brake pad set features an included wear indicator for easy maintenance and safety. With FMSI number D868, these brake pads are chamfered and engineered for quiet operation and reduced brake dust. The product is easy to install, making it an excellent choice for both professional mechanics and DIY enthusiasts. Choose Herito for the best brake pad brand experience and reliable braking performance.
