

## Brake Pad Ceramic Disc Brake Pad Set Interchange Part Number D1293 D1222 Components for in Commercial Vehicle Brake Systems

Our Product Introduction

for more products please visit us on [heritobrake.com](http://heritobrake.com)

### Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

### Product Specification

- Easy To Install: Yes
- Product Type: Brake Pad
- Manufacturer Part Number: ZK-11001
- Fmsi: D868
- Certifications: ISO 9001, DOT Approved
- Installationtype: Bolt-on
- Heatresistance: Up To 600°C
- Thickness: 0.5 Inches

### Product Description:

The Disc Brake Pad Set, identified by the Manufacturer Part Number ZK-11001, is an exceptional choice for vehicle owners seeking reliable, high-performance braking components. Designed with precision and crafted using the best brake pad material available, this set ensures superior stopping power, enhanced safety, and long-lasting durability. Featuring a thickness of 0.5 inches, these brake pads provide a substantial layer of friction material, which contributes to consistent braking performance and extended service life.

One of the standout features of this Disc Brake Pad Set is its construction from premium ceramic material. Ceramic brake pads are widely regarded as the best ceramic brake pads in the market due to their excellent heat dissipation, reduced noise generation, and minimal dust output. This set exemplifies all these qualities, making it an ideal choice for drivers who value both performance and cleanliness. The ceramic composition not only enhances the braking efficiency but also protects the brake rotors by minimizing wear, thereby extending the lifespan of your braking system.

Included in this set is a wear indicator, an essential component that alerts drivers when the brake pads need replacement. This feature adds an extra layer of safety by preventing brake failure due to worn-out pads. The presence of the wear indicator ensures timely maintenance, helping to avoid costly repairs and maintain optimal braking performance throughout the lifespan of the pads.

Compatibility and versatility are also key advantages of the ZK-11001 Disc Brake Pad Set. It easily fits various vehicle models, as indicated by its interchange part numbers D1293 and D1222. This interchangeability allows customers to confidently select these brake pads, knowing they are suitable replacements for their specific braking systems. The ease of installation combined with the reliable fitment contributes to a hassle-free upgrade or replacement experience.

Choosing the right brake pads is crucial for vehicle safety and performance, and this set stands out as one of the best ceramic brake pads available today. Its ceramic material provides superior heat resistance, which prevents brake fade during intense braking situations.

Furthermore, the reduced dust production means your wheels stay cleaner for longer, preserving the aesthetics of your vehicle while maintaining effective braking capability.

In summary, the Disc Brake Pad Set ZK-11001 offers a perfect blend of quality, durability, and performance. Its 0.5-inch thickness provides ample material for long-lasting use, while the ceramic composition ensures quiet, efficient braking with minimal dust. The included wear indicator enhances safety by signaling when replacement is needed, and the interchange part numbers D1293 and D1222 guarantee broad compatibility with various vehicle models. If you are searching for good ceramic brake pads that deliver consistent stopping power and reliability, this set is an excellent choice that meets and exceeds expectations.

Whether you are a daily commuter, a performance enthusiast, or someone who prioritizes vehicle safety, investing in these brake pads means choosing the best brake pad material for your vehicle. The Disc Brake Pad Set ZK-11001 combines advanced ceramic technology with practical features to provide a braking solution that is efficient, durable, and safe. Experience the difference that the best ceramic brake pads can make in your driving confidence and vehicle maintenance.

### Features:

Product Name: Disc Brake Pad Set

Package Quantity: 1 Set (4 Pieces)

Thickness: 0.5 Inches

Certifications: ISO 9001, DOT Approved

FMSI Number: D868

Heat Resistance: Up to 600°C

Compatible with most brake pad tools for easy installation

Designed to work efficiently with brake pad tool for optimal performance

Manufactured by the best brake pad brand ensuring quality and durability

### Technical Parameters:

Interchange Part Number	D1293 D1222
Warranty	12 Months Manufacturer Warranty
Manufacturer Part Number	ZK-11001
Braking System	ATE
Product Type	Brake Pad
Easy To Install	Yes
Wearindicator	Included
Material	Ceramic (best brake pad material, best ceramic brake pads)
Heat Resistance	Up To 600°C
Thickness	0.5 Inches

### Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is an essential component designed to ensure optimal braking performance and safety in a variety of driving conditions. Manufactured in China, this high-quality set is compatible with ATE braking systems, making it a reliable choice for drivers who demand precision and durability. Whether you're a professional mechanic or a car enthusiast

performing routine maintenance, these disc brake pads offer a seamless and efficient solution for your vehicle's braking needs. One of the primary application occasions for the Herito ZK-10001 disc brake pads is during regular vehicle maintenance and brake system upgrades. The set includes 4 pieces, enough to replace all pads on a single axle, ensuring even and balanced braking performance. The inclusion of a wear indicator allows drivers to monitor pad condition easily, helping to prevent unexpected brake failures and maintain safety on the road. This feature is particularly valuable for those who frequently drive in urban traffic or challenging terrains where brakes are used intensively.

These disc brake pads are designed for easy installation with a bolt-on installation type, which means they can be fitted quickly and securely without requiring complicated adjustments. This ease of installation is further supported by compatibility with common brake pad tools, making the replacement process straightforward and convenient. Using a brake pad tool during installation ensures that the pads fit perfectly and function effectively, reducing installation time and effort. This makes the Herito brake pads ideal for both DIY enthusiasts and professional mechanics working in busy workshops.

In addition to everyday driving, these brake pads are well-suited for various scenarios including city commuting, highway driving, and even more demanding conditions such as mountainous or off-road environments. The durable materials and precise engineering behind the Herito ZK-10001 contribute to consistent braking performance, reducing noise and vibration for a smoother and safer ride. Whether you are replacing worn pads or upgrading your braking system, this set provides reliable stopping power when you need it most.

Overall, the Herito Disc Brake Pad Set is a versatile, high-performance choice for anyone looking to maintain or improve their vehicle's braking system. With its easy installation, wear indicator, and compatibility with ATE braking systems, it is perfectly suited for a wide range of application occasions and scenarios. Using the appropriate brake pad tool to install these pads ensures the best fit and optimal performance, giving you confidence and peace of mind every time you drive.

### Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, manufactured in China. These brake pads feature a bolt-on installation type and include a wear indicator for enhanced safety. With a thickness of 0.5 inches and heat resistance up to 600°C, they are designed for durability and high performance. Using the best ceramic brake pads technology, Herito ensures superior braking efficiency and longevity. The set is compatible with the brake pad tool for easy and precise installation. Choose Herito's ceramic brake pads, part number ZK-11001, for reliable and customized braking solutions.
