

Ceramic Disc Brake Pad Set Easy To Install Bolt On Type Replacement Parts Suitable for Trucks Trailers and Heavy Equipment

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Installationtype: Bolt-on
- Fmsi: D868
- Certifications: ISO 9001, DOT Approved
- Easy To Install: Yes
- Package Quantity: 1 Set (4 Pieces)
- Material: Ceramic
- Wearindicator: Included
- Heatresistance: Up To 600°C

Product Description:

The Disc Brake Pad Set, identified by the Manufacturer Part Number ZK-11001, is a premium-quality product designed to deliver exceptional braking performance and reliability. Engineered to meet the highest standards, this set is perfectly compatible with ATE braking systems, ensuring seamless integration and optimal functionality. Whether you are looking to replace worn-out pads or upgrade your vehicle's braking system, these disc brake pads offer a dependable and efficient solution that prioritizes safety and durability. One of the standout features of this disc brake pad set is its composition as good ceramic brake pads. Ceramic brake pads are renowned for their superior performance, providing a smoother and quieter braking experience compared to traditional metallic or organic pads. They generate less dust, which helps keep your wheels cleaner and reduces the chances of brake fade during prolonged use. This makes the ZK-11001 ceramic brake pad set an excellent choice for drivers who value both performance and cleanliness in their braking components.

Included within this set is a wear indicator, a crucial component that enhances safety and maintenance convenience. The wear indicator alerts you when the brake pads have reached a certain level of wear, signaling that it is time for replacement. This feature helps prevent damage to the brake rotors and maintains optimal braking efficiency, ensuring that your vehicle remains safe to drive. The presence of the wear indicator underscores the thoughtful design and user-friendly approach of this disc brake pad set.

Installation is straightforward and hassle-free thanks to the bolt-on installation type. This design simplifies the replacement process, allowing for a secure and stable fit without the need for complex tools or modifications. Whether you are a professional mechanic or a DIY enthusiast, the bolt-on installation feature makes upgrading or replacing your ceramic brake pads a smooth and efficient task.

Quality and safety are paramount with the ZK-11001 disc brake pad set. It is manufactured under stringent quality controls and holds certifications including ISO 9001 and DOT approval. The ISO 9001 certification guarantees that the product adheres to internationally recognized quality management standards, ensuring consistency and reliability in performance. Additionally, the DOT approval signifies that the brake pads comply with the safety requirements set by the Department of Transportation, giving you peace of mind that these ceramic brake pads meet rigorous safety criteria.

These disc brake pads are designed to deliver excellent stopping power while minimizing noise, vibration, and harshness (NVH). The good ceramic brake pads composition contributes to a longer lifespan and enhanced resistance to high temperatures, making them suitable for a wide range of driving conditions, from daily commuting to more demanding situations. Their durability ensures that you get the most out of your investment, reducing the frequency of replacements and maintenance costs over time.

In summary, the Disc Brake Pad Set with Manufacturer Part Number ZK-11001 is a top-tier choice for anyone seeking reliable, efficient, and high-quality ceramic brake pads. Its compatibility with ATE braking systems, inclusion of a wear indicator, and bolt-on installation type make it a practical and user-friendly option. Backed by ISO 9001 and DOT certifications, these disc brake pads provide the assurance of safety and quality. If you are in search of good ceramic brake pads that combine performance, durability, and ease of installation, this product is an excellent candidate to consider for your vehicle's braking needs.

Features:

Product Name: Disc Brake Pad Set

Material: High-quality ceramic brake pad for superior performance

Chamfered design for reduced noise and improved braking efficiency

Manufacturer Part Number: ZK-11001

Warranty: 12 Months Manufacturer Warranty for peace of mind

Easy to install, compatible with OEM brake pads

Made from the best brake pad material ensuring durability and safety

Technical Parameters:

Thickness	0.5 Inches
Certifications	ISO 9001, DOT Approved
Chamfered	Yes
Easy To Install	Yes
Wear Indicator	Included
Warranty	12 Months Manufacturer Warranty
FMSI	D868
Manufacturer Part Number	ZK-11001
Heat Resistance	Up To 600°C
Interchange Part Number	D1293, D1222

This Disc Brake Pad Set features OEM brake pads designed for superior performance. It represents the best ceramic brake pads available on the market, ensuring durability and safety. Choose the best ceramic brake pads for reliable braking and long-lasting wear.

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to provide exceptional braking performance for a wide range of vehicles. Manufactured in China and identified with the FMSI number D868, this product exemplifies quality and reliability. As one of the

best brake pad brands on the market, Herito ensures that every set meets stringent standards for durability and safety. With a heat resistance capacity of up to 600°C, these OEM brake pads can withstand extreme driving conditions, making them ideal for both daily commuting and high-performance driving scenarios.

One of the primary application occasions for the Herito Disc Brake Pad Set is routine vehicle maintenance and brake system upgrades. Whether you are replacing worn-out brake pads or upgrading your braking system for enhanced safety, these OEM brake pads offer a perfect fit and outstanding stopping power. Thanks to their easy-to-install design, even automotive enthusiasts with basic mechanical skills can install them without professional assistance, saving time and labor costs.

In addition to everyday driving, these brake pads are well-suited for more demanding scenarios such as mountainous terrain driving, towing heavy loads, or participating in motorsport activities where frequent and reliable braking is critical. The Herito ZK-10001 brake pads maintain consistent friction levels and resist brake fade under prolonged use, ensuring maximum control and safety in various driving environments.

Another important application occasion is commercial and fleet vehicles that require dependable braking components to minimize downtime and maintenance costs. With a 12-month manufacturer warranty, the Herito Disc Brake Pad Set provides peace of mind and guarantees long-term performance, making it an excellent investment for both private and commercial vehicle owners.

Overall, the Herito Disc Brake Pad Set is a versatile and high-quality option for anyone seeking OEM brake pads that combine ease of installation, superior heat resistance, and reliable braking performance. Whether used for daily transportation, adventurous off-road excursions, or professional applications, this product from the best brake pad brand ensures safety, durability, and consistent performance on the road.

Customization:

Herito offers premium product customization services for the Disc Brake Pad Set, model number ZK-10001. Manufactured in China using the best brake pad material, ceramic, these disc brake pads ensure superior performance and durability. The set features a thickness of 0.5 inches and includes a wear indicator for added safety and convenience. Designed for easy installation, these brake pads are compatible with interchange part numbers D1293 and D1222. Choose Herito for the best brake pad material and reliable disc brake pads tailored to your specific needs.
