

Ceramic good ceramic brake pads easy to install engineered to enhance safety through friction and reduced brake fade under stress

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Thickness: 0.5 Inches
- Heatresistance: Up To 600°C
- Wearindicator: Included
- Installationtype: Bolt-on
- Material: Ceramic
- Braking System: ATE
- Chamfered: Yes
- Package Quantity: 1 Set (4 Pieces)

Product Description:

The Disc Brake Pad Set is engineered to deliver exceptional braking performance and durability, making it an ideal choice for drivers seeking reliable and efficient stopping power. Crafted from high-quality ceramic material, these brake pads offer superior heat resistance, reduced noise, and minimal dust production compared to conventional organic or semi-metallic pads. The ceramic composition ensures a longer lifespan and consistent braking performance, making these some of the best ceramic brake pads available on the market today. Designed with convenience in mind, the Disc Brake Pad Set features a bolt-on installation type, allowing for a secure and straightforward fit onto your vehicle's braking system. This bolt-on design eliminates the need for complicated modifications or additional tools, making the installation process seamless and accessible even for those who prefer to perform maintenance themselves. Whether you are a professional mechanic or a DIY enthusiast, you will appreciate how easy to install these brake pads truly are.

One of the standout features of this Disc Brake Pad Set is its precise thickness of 0.5 inches. This measurement ensures optimal contact with the brake rotors, providing balanced pressure distribution and effective heat dissipation during braking. The thickness also contributes to the pads' durability, allowing them to maintain their structural integrity and performance over extended periods of use. This is particularly important for drivers who frequently navigate challenging driving conditions or require dependable braking during high-stress situations.

The Disc Brake Pad Set is specifically designed to be compatible with the ATE braking system, a trusted name in automotive safety and performance. This compatibility guarantees that the brake pads will work harmoniously with your vehicle's existing components, delivering smooth and responsive braking action. The integration with the ATE system ensures that the pads meet stringent quality standards, enhancing your vehicle's overall safety and performance on the road.

For those who want to ensure a flawless installation, using a proper brake pad tool can significantly simplify the process. A brake pad tool helps in precisely positioning the pads and compressing the caliper pistons, preventing damage to components and ensuring a snug fit. When paired with these good ceramic brake pads, the right brake pad tool makes the upgrade or replacement process efficient and hassle-free. This combination not only enhances safety but also extends the life of your brake system.

In summary, the Disc Brake Pad Set offers an excellent blend of performance, durability, and ease of installation. Its ceramic material delivers quieter braking with less dust and longer wear, while the bolt-on installation type makes it accessible for users of all skill levels. With a thickness of 0.5 inches and compatibility with the ATE braking system, these pads provide consistent and reliable braking performance. Whether you are upgrading your current pads or replacing worn ones, these good ceramic brake pads rank among the best ceramic brake pads available, ensuring your vehicle stops safely and smoothly every time.

Features:

- Product Name: Disc Brake Pad Set
- Warranty: 12 Months Manufacturer Warranty
- Manufacturer Part Number: ZK-11001
- Interchange Part Number: D1293, D1222
- Easy To Install: Yes, ideal for both professionals and DIY enthusiasts
- Wear Indicator: Included for timely replacement alerts
- Made from the best ceramic brake pads, ensuring superior performance and durability
- Constructed with the best brake pad material for enhanced safety and reduced noise
- Compatible with standard brake pad tool for hassle-free installation and maintenance

Technical Parameters:

Easy To Install	Yes
Chamfered	Yes
Certifications	ISO 9001, DOT Approved
Interchange Part Number	D1293 D1222
Fmsi	D868
Package Quantity	1 Set (4 Pieces)
Braking System	ATE
Thickness	0.5 Inches
Installation Type	Bolt-on
Warranty	12 Months Manufacturer Warranty

As the best brake pad brand, this disc brake pad set offers easy installation and superior performance. Designed to work seamlessly with your brake pad tool, these ceramic brake pads ensure reliable braking and long-lasting durability.

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is an essential component for any vehicle seeking reliable and efficient braking performance. Manufactured in China, this set includes 1 package containing 4 pieces, designed to fit various vehicle models while meeting the interchange part numbers D1293 and D1222. Certified with ISO 9001 and DOT approval, these brake pads ensure quality, safety, and compliance with international standards.

One of the standout features of the Herito ZK-10001 Disc Brake Pad Set is its exceptional heat resistance, capable of withstanding temperatures up to 600°C. This makes them ideal for both everyday city driving and more demanding conditions such as mountainous terrain or stop-and-go traffic where braking heat can accumulate rapidly. These pads provide consistent braking power without fading, contributing to enhanced vehicle control and safety.

These brake pads are often regarded as some of the best ceramic brake pads available on the market. The ceramic material offers quieter operation, less dust generation, and longer lifespan compared to traditional organic or semi-metallic brake pads. Drivers who prioritize smooth braking performance and minimal maintenance find the Herito brake pad set an excellent choice.

In terms of application occasions and scenarios, the Herito Disc Brake Pad Set is perfect for daily commuting, long road trips, and urban driving where frequent stops are common. Their durability and heat tolerance make them suitable for heavy-duty use, including towing or carrying heavier loads. Additionally, these brake pads perform well in both wet and dry conditions, providing reliable stopping power regardless of weather.

For automotive enthusiasts and professionals looking for the best ceramic brake pads, the Herito ZK-10001 model offers superior quality and dependable performance. Whether you are replacing worn-out brake pads or upgrading your vehicle's braking system, this set delivers enhanced safety, comfort, and durability. With a FMSI number of D868, these pads fit various braking systems accurately, ensuring seamless installation and optimal functionality.

In summary, the Herito Disc Brake Pad Set is designed for those who demand the best ceramic brake pads for their vehicles. Its combination of certified quality, heat resistance, and reliable performance makes it suitable for a wide range of driving scenarios, from everyday city travel to more strenuous driving conditions. Choosing this brake pad set means investing in safety, efficiency, and long-lasting performance.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, designed to meet your specific requirements. Manufactured in China, these OEM brake pads are compatible with the ATE braking system and feature the FMSI number D868. Our ceramic brake pads provide excellent heat resistance, withstanding temperatures up to 600°C, ensuring optimal performance under extreme conditions. The brake pads come chamfered for reduced noise and dust, and are easy to install, making them a reliable choice for both professional mechanics and DIY enthusiasts. Customize your OEM brake pads with Herito for superior quality and performance.
