

## ATE Braking System Thickness 0.5 Inches Disc Brake Pad Set ISO 9001 Certified Replacement Parts for Industrial Equipment

Our Product Introduction

### Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

### Product Specification

- Product Type: Brake Pad
- Manufacturer Part Number: ZK-11001
- Heatresistance: Up To 600°C
- Fmsi: D868
- Interchange Part Number: D1293 D1222
- Easy To Install: Yes
- Braking System: ATE
- Material: Ceramic

### Product Description:

The Disc Brake Pad Set is an essential component designed to provide superior braking performance and enhance the safety of your vehicle. Engineered with precision and crafted from high-quality materials, these brake pads deliver exceptional stopping power, reduced noise, and longer lifespan compared to conventional brake pads. This product is perfect for drivers seeking reliable and efficient braking solutions that stand the test of time.

One of the standout features of this Disc Brake Pad Set is its bolt-on installation type, which allows for straightforward and secure mounting onto your vehicle's brake system. This design ensures that the brake pads fit perfectly without the need for complicated modifications or specialized tools, making installation quick and hassle-free for both professional mechanics and DIY enthusiasts. The bolt-on feature also guarantees that the pads remain firmly in place during all driving conditions, contributing to consistent braking performance.

These brake pads boast a thickness of 0.5 inches, providing an optimal balance between durability and effective heat dissipation. The substantial thickness helps to extend the service life of the pads, allowing you to enjoy longer intervals between replacements. This thickness also plays a critical role in maintaining braking efficiency, as it ensures that the pads can withstand the intense friction and heat generated during braking without warping or deteriorating prematurely.

Included with the Disc Brake Pad Set is a wear indicator, a valuable safety feature that alerts you when the brake pads are nearing the end of their usable life. This wear indicator helps prevent unexpected brake failure by providing timely warnings, enabling you to replace the pads before they become dangerously worn. The inclusion of this feature highlights the manufacturer's commitment to safety and customer peace of mind.

Durability and reliability are further backed by a 12-month manufacturer warranty, offering assurance that the product meets stringent quality standards. This warranty covers manufacturing defects and ensures that you can purchase with confidence, knowing that the manufacturer stands behind the performance and longevity of the brake pads. Should any issues arise within the warranty period, you are protected against replacement or repair costs, adding significant value to your investment.

When it comes to selecting the best ceramic brake pads, this Disc Brake Pad Set stands out due to its superior composition and design. Ceramic brake pads are renowned for their quiet operation, minimal dust production, and excellent braking power, making them an ideal choice for a wide range of vehicles and driving conditions. This product exemplifies the advantages of ceramic technology, delivering smooth and consistent braking performance while reducing wear on your rotors.

Choosing the best ceramic brake pads for your vehicle means opting for a product that combines safety, efficiency, and comfort. The ceramic brake pad material used in this set is engineered to provide enhanced friction stability across various temperatures, ensuring reliable stopping power whether you're driving in city traffic or on the highway. Additionally, ceramic pads tend to produce less brake dust compared to metallic pads, keeping your wheels cleaner and reducing maintenance time.

In summary, the Disc Brake Pad Set offers an outstanding combination of ease of installation, durability, safety features, and advanced ceramic technology. The bolt-on installation type makes fitting the pads straightforward, while the 0.5-inch thickness ensures long-lasting performance. With the included wear indicator, you receive an added layer of safety, and the 12-month manufacturer warranty provides peace of mind. For anyone looking to upgrade their braking system with the best ceramic brake pads, this product represents a smart and reliable choice that delivers superior braking performance and durability.

### Features:

Product Name: Disc Brake Pad Set

Package Quantity: 1 Set (4 Pieces)

Product Type: Brake Pad

Braking System: ATE

FMSI Number: D868

Wear Indicator: Included for easy maintenance

Made from the best brake pad material for enhanced performance

Designed as good ceramic brake pads to ensure smooth and quiet braking

Durable and reliable good ceramic brake pads for long-lasting safety

### Technical Parameters:

Interchange Part Number	D1293, D1222
Certifications	ISO 9001, DOT Approved
Braking System	ATE
FMSI	D868
Heat Resistance	Up To 600°C
Installation Type	Bolt-on
Easy To Install	Yes
Material	Ceramic (best brake pad material, best ceramic brake pads)
Warranty	12 Months Manufacturer Warranty
Package Quantity	1 Set (4 Pieces)
Notes	OEM brake pads

## Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to offer reliable and efficient braking performance for a variety of vehicles. Manufactured in China with high-quality materials, these disc brake pads are engineered to withstand extreme conditions, making them an excellent choice for both daily driving and more demanding applications. With a thickness of 0.5 inches, this set includes 4 pieces, providing a complete solution for replacing your vehicle's worn-out brake pads.

These ceramic brake pads are widely recognized as some of the best ceramic brake pads available on the market due to their exceptional heat resistance, capable of enduring temperatures up to 600°C. This feature ensures consistent braking power even during intense braking scenarios such as steep downhill drives or heavy city traffic where brakes are frequently engaged. Herito's disc brake pads are designed to minimize brake fade and provide a smooth, quiet braking experience, which enhances overall driving comfort and safety.

The disc brake pad set is perfect for a variety of occasions and scenarios. For everyday commuters, these brake pads ensure reliable stopping power in urban environments with frequent stop-and-go traffic. For long-distance travelers, their durability and heat resistance make them ideal for highway driving and mountainous terrains where braking demands can be more intense. Additionally, the easy-to-install design means that vehicle owners or mechanics can quickly replace old brake pads without requiring specialized tools or extensive mechanical knowledge.

Herito's disc brake pads are also suitable for use in light commercial vehicles and SUVs, offering robust performance under heavier loads and more strenuous driving conditions. Whether you are driving in wet or dry weather, these ceramic brake pads maintain excellent friction levels, ensuring your safety is never compromised. The 12 months manufacturer warranty provides added peace of mind, reflecting the brand's confidence in the durability and quality of their product.

In summary, the Herito ZK-10001 disc brake pad set is a versatile and dependable choice for anyone seeking the best ceramic brake pads. Its combination of heat resistance, ease of installation, and comprehensive warranty makes it suitable for a wide range of driving occasions and scenarios, from daily commutes to more challenging driving environments.

## Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, proudly manufactured in China. This set includes 1 set (4 pieces) of high-quality ceramic brake pads designed to provide superior performance and durability. As a recognized best brake pad brand, Herito ensures each disc brake pad meets rigorous standards, certified with ISO 9001 and DOT approval for safety and reliability.

Our disc brake pads are designed for easy installation with a bolt-on installation type, making it convenient for customers to upgrade their braking system without hassle. The product is compatible with interchange part numbers D1293 and D1222, ensuring wide applicability across various vehicle models.

Customize your braking experience with Herito's Disc Brake Pad Set, combining premium materials and expert engineering to deliver optimal stopping power and long-lasting performance.
