

Wearindicator Included Brake Pad Tool Designed for ATE Braking System Ensuring Precise Fit and Brake Replacement in Automotive Workshops

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Heatresistance: Up To 600°C
- Fmsi: D868
- Wearindicator: Included
- Thickness: 0.5 Inches
- Material: Ceramic
- Manufacturer Part Number: ZK-11001
- Easy To Install: Yes
- Certifications: ISO 9001, DOT Approved

Product Description:

The Disc Brake Pad Set is an essential upgrade for anyone looking to enhance their vehicle's braking performance with reliable, high-quality components. Crafted from premium ceramic material, these brake pads offer exceptional durability, heat resistance, and low noise operation, making them one of the best ceramic brake pads available on the market today. Whether you are a daily commuter or an enthusiast who values smooth and efficient braking, this set provides a perfect balance between performance and longevity.

One of the standout features of this Disc Brake Pad Set is the use of advanced ceramic material. Ceramic brake pads are known for their excellent heat dissipation properties, which help reduce brake fade during demanding driving conditions. This ensures consistent stopping power and improved safety, especially during long drives or in stop-and-go traffic. Additionally, ceramic pads produce less dust compared to traditional metallic pads, keeping your wheels cleaner and reducing maintenance efforts. For those seeking good ceramic brake pads that combine efficiency with cleanliness, this set is an ideal choice.

This product comes as a complete set of four pieces, providing all the brake pads needed for one axle. The package quantity of 1 set (4 pieces) offers convenience and value, allowing you to replace all necessary pads at once for balanced braking performance. Each pad is designed with precise chamfered edges, which help minimize noise and vibration while improving the bedding-in process. Chamfered brake pads contribute to a quieter braking experience and extend the overall lifespan of the pads by reducing uneven wear.

Installation is straightforward and hassle-free, making this Disc Brake Pad Set suitable for both professional mechanics and DIY enthusiasts. The pads are engineered for easy fitment and come with an interchange part number compatibility of D1293 and D1222. This compatibility ensures that the brake pads will fit a wide range of vehicle makes and models, providing flexibility and peace of mind when purchasing replacement parts. The easy-to-install nature of these pads means less downtime and quicker return to driving, which is highly valued by busy vehicle owners.

When it comes to performance, these brake pads excel in delivering smooth and consistent stopping power. The best ceramic brake pads offer a quieter braking experience compared to metallic alternatives, reducing the annoying squeals and grinding noises often associated with inferior brake pads. The ceramic construction also enhances pedal feel, giving drivers more confidence and control behind the wheel. Whether navigating city streets or tackling highway speeds, this Disc Brake Pad Set ensures reliable braking response under various driving conditions.

In addition to performance benefits, these good ceramic brake pads are designed to be environmentally friendly. The ceramic material produces less brake dust, which is less harmful to the environment and improves the longevity of your vehicle's wheels. This helps maintain the aesthetic appeal of your car while contributing to cleaner air quality. For drivers who prioritize both vehicle maintenance and environmental responsibility, this product offers a well-rounded solution.

Overall, the Disc Brake Pad Set stands out as a top choice for those seeking quality, durability, and ease of installation in their brake components. With its ceramic material, chamfered design, and compatibility with interchange numbers D1293 and D1222, it meets the demands of modern vehicles and discerning drivers. If you are searching for good ceramic brake pads that provide excellent stopping power, low noise levels, and long-lasting performance, this set is an excellent investment. Upgrade your braking system today and experience the benefits of one of the best ceramic brake pads on the market.

Features:

- Product Name: Disc Brake Pad Set
- Installation Type: Bolt-on for easy and secure fitting
- Warranty: 12 Months Manufacturer Warranty for peace of mind
- Easy To Install: Yes, designed for quick and hassle-free installation
- Package Quantity: 1 Set (4 Pieces) suitable for complete brake replacement
- Certifications: ISO 9001 certified and DOT Approved ensuring quality and safety
- Made from the best brake pad material for superior performance and durability
- Features high-quality ceramic brake pads for quieter operation and less dust
- Trusted as the best brake pad brand by professionals and car enthusiasts

Technical Parameters:

Warranty	12 Months Manufacturer Warranty
Heat Resistance	Up To 600°C
Chamfered	Yes
Certifications	ISO 9001, DOT Approved
Braking System	ATE
Installation Type	Bolt-on
Material	Ceramic
FMSI	D868
Thickness	0.5 Inches
Interchange Part Number	D1293, D1222

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is an exceptional choice for a wide range of vehicle maintenance and repair occasions. Manufactured in China and certified with ISO 9001 and DOT approval, this product guarantees reliability and safety for every use. Whether you are a professional mechanic or a car enthusiast performing routine brake maintenance, the Herito brake pad set is designed to meet the highest standards of quality and performance.

This disc brake pad set is perfectly suited for scenarios involving brake system overhauls, replacements, or upgrades. It is compatible with the ATE braking system and serves as an excellent OEM brake pads alternative, ensuring seamless integration with your vehicle's original components. The inclusion of a wear indicator allows for easy monitoring of pad wear, helping users identify the optimal time for replacement and thus preventing brake failure during critical moments.

One common application occasion is during scheduled vehicle servicing, where the brake pads must be inspected and replaced to maintain optimal braking performance. The chamfered edges of the Herito brake pads help reduce noise and vibration, providing a smooth and quiet braking experience. This makes it an ideal choice for both everyday drivers and those who require precise and reliable braking in demanding driving environments such as urban traffic, mountainous terrains, or long highway journeys.

Additionally, these brake pads are widely used in automotive workshops and service centers where a reliable brake pad tool is essential for proper installation and adjustment. The Herito brand, recognized as one of the best brake pad brands in the market, offers not only quality but also ease of use, which reduces installation time and enhances safety during maintenance work.

The interchange part numbers D1293 and D1222 further attest to the versatility of the Herito ZK-10001 disc brake pads, making them compatible with a range of vehicle models and braking systems. This versatility makes them a preferred choice for fleet operators, repair shops, and individual vehicle owners who demand OEM-quality performance with the confidence of certified safety standards.

In conclusion, the Herito Disc Brake Pad Set ZK-10001 is suitable for a variety of application occasions and scenarios including routine maintenance, emergency brake repair, and performance upgrades. With its high-quality materials, wear indicator, chamfered design, and comprehensive certifications, it stands out as a top-tier option for anyone looking to ensure the safety and efficiency of their vehicle's braking system.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, ensuring you receive the highest quality ceramic brake pad tailored to your needs. As the best brake pad brand, Herito guarantees that each set, originating from China, meets strict standards with certifications including ISO 9001 and DOT Approved. The brake pads feature a thickness of 0.5 inches and are made from premium ceramic material, providing superior performance and durability. Each package contains 1 set (4 pieces) of Herito's best brake pad brand, designed to deliver exceptional braking power and reliability. Customize your Disc Brake Pad Set with Herito for a perfect fit and optimal safety on the road.
