

30000-50000km Guarantee Period Disc Brake Pad Set Featuring ISO 9001 Certification And Heatresistance Up To 500°C Engineered For Heavy Duty

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-28001

Product Specification

- Package Contents: 4 Brake Pads
- Compatibility: Universal Fit For Most Cars And Motorcycles
- Brake Type: Disc Brakes
- Oe Replacement: Yes
- Installation Method: Bolt-On
- Brake Pad Type: Disc
- Packing: Customized
- Interchange Part Number: D1293 D1222

Product Description:

The Disc Brake Pad Set, model DBP-001, is meticulously engineered to deliver exceptional braking performance and durability for a wide range of vehicles. Designed as a universal fit for most cars and motorcycles, this set offers versatility and reliability, making it an essential upgrade for drivers seeking enhanced safety and control on the road. Whether you own a Buick Firstland or another compatible vehicle, these brake pads ensure a seamless fit and outstanding stopping power.

One of the standout features of this brake pad set is its impressive heat resistance, capable of withstanding temperatures up to 500°C. This high level of heat tolerance ensures that the brake pads maintain their structural integrity and performance even under extreme braking conditions. This makes them ideal for both everyday driving and more demanding situations, such as spirited driving or towing, where brake components can reach elevated temperatures. The ability to resist heat buildup reduces the risk of brake fade, providing consistent and reliable stopping power every time.

The package includes 4 brake pads, enough to service both wheels on a single axle, providing a comprehensive solution for your braking needs. Each pad is crafted with precision and quality materials to offer excellent friction characteristics and long-lasting wear resistance. This thoughtful packaging ensures that you receive everything necessary for a straightforward installation, minimizing downtime and effort.

Manufactured under the part number DBP-001, these brake pads are designed with compatibility in mind. Although they are particularly suitable for the Buick Firstland model, their universal fit makes them a practical choice for a wide variety of car and motorcycle makes and models. This compatibility simplifies the selection process for buyers, eliminating the stress of finding exact matches and allowing for quick upgrades that enhance vehicle safety.

In addition to their robust construction and heat resistance, these brake pads are among the best ceramic brake pads available on the market. Ceramic brake pads are known for their quiet operation, minimal dust production, and smooth braking feel, all of which contribute to a superior driving experience. Compared to traditional metallic brake pads, ceramic options like these provide reduced wear on rotors and a cleaner wheel appearance, making them a preferred choice for many vehicle owners.

To achieve optimal installation and maintenance, it is highly recommended to use a quality brake pad tool. A brake pad tool helps ensure that the brake pads are properly seated and aligned, preventing premature wear and ensuring the best possible braking performance.

Using the right tools not only enhances safety but also extends the lifespan of your brake components.

In summary, the Disc Brake Pad Set DBP-001 offers an unbeatable combination of durability, heat resistance, and universal compatibility.

Its ceramic composition positions it among the best ceramic brake pads, providing superior performance and longevity. With a heat resistance capacity of up to 500°C, this set is built to handle the most demanding braking scenarios without compromising safety or effectiveness. Whether you're upgrading your Buick Firstland or another vehicle, this brake pad set is an excellent investment in your vehicle's braking system, offering peace of mind and enhanced control wherever the road takes you.

Features:

Product Name: Disc Brake Pad Set

Certifications: ISO 9001, DOT Approved

Package Contents: 4 Brake Pads

Brake Type: Disc Brakes

Brake Pad Type: Disc

Manufacturer Part Number: DBP-001

High-quality OEM brake pads ensuring reliable performance

Recognized as the best ceramic brake pads for durability and quiet operation

Produced by the best brake pad brand, trusted by professionals

Technical Parameters:

Brake Type	Disc Brakes
OE Replacement	Yes
Guarantee Period	30000-50000 km
Brake Pad Type	Disc
Certifications	ISO 9001, DOT Approved
Manufacturer Part Number	DBP-001
Product Dimensions	8.5 X 6.5 X 0.7 Inches
Heat Resistance	Up To 500°C
Package Contents	4 Brake Pads
Model	Buick Firstland

Applications:

The Herito Disc Brake Pad Set, model number ZK-28001, is an ideal choice for vehicle owners seeking reliable and high-performance OEM brake pads. Specifically designed as an OE replacement for the Buick Firstland, this brake pad set ensures a perfect fit and seamless integration with your vehicle's braking system. Manufactured in China under stringent quality controls, the Herito brake pads

come with ISO 9001 certification and DOT approval, guaranteeing safety, durability, and consistent performance on the road. One of the standout features of the Herito ZK-28001 disc brake pads is their exceptional ceramic formulation, making them some of the best ceramic brake pads available in the market today. These pads offer superior braking power, reduced noise, and minimal dust generation, providing a cleaner and more comfortable driving experience. Whether you are commuting in the city, driving on highways, or navigating mountainous terrains, these ceramic brake pads deliver reliable stopping power and enhanced control under various driving conditions.

The Herito brake pad set is designed to last between 30,000 to 50,000 kilometers, offering long-lasting performance and value for money. This extended guarantee period ensures that you can drive with confidence, knowing that your braking system is supported by durable and robust components. Regular maintenance using the appropriate brake pad tool is recommended to ensure optimal installation and removal, helping to maintain the longevity and effectiveness of the brake pads.

These disc brake pads are perfect for a variety of application occasions and scenarios. They are suitable for daily urban driving, where stop-and-go traffic demands consistent braking performance. Additionally, they excel in more demanding conditions such as long-distance highway travel and off-road adventures, where reliable braking is crucial for safety. Whether you are a professional driver, a daily commuter, or a weekend traveler, the Herito ZK-28001 brake pads provide peace of mind and top-tier braking efficiency.

In summary, the Herito Disc Brake Pad Set (DBP-001) for the Buick Firstland is a top-quality, DOT-approved product that combines the benefits of OEM brake pads with the advanced technology of ceramic materials. Its ISO 9001 certification assures manufacturing excellence, while the included guarantee period highlights its durability. Paired with the correct brake pad tool, this set is an excellent choice for maintaining and enhancing your vehicle's braking system across various driving scenarios.

Customization:

Herito offers the best brake pad brand with the Disc Brake Pad Set, model number ZK-28001. Manufactured in China, these pads are designed for durability and performance, providing a guarantee period of 30000-50000km. Featuring a bolt-on installation method, they ensure an easy and secure fit. These are among the best ceramic brake pads available, with heat resistance up to 500°C, making them ideal for high-performance braking. As a good ceramic brake pads option, they serve as an OE replacement with the manufacturer part number DBP-001, ensuring compatibility and reliability for your vehicle.
