Basic Information

- Brand Name: Herito
- Model Number: ZK-28001

Product Specification

- Packing: Customized
- Compatibility: Universal Fit For Most Cars And Motorcycles
- Product Dimensions: 8.5 X 6.5 X 0.7 Inches
- Model: Buick Firstland
- Numberofpads: 4
- Oe Replacement: Yes
- Brake Pad Type: Disc
- Interchange Part Number: D1293 D1222

Product Description:

The Disc Brake Pad Set is a high-quality, reliable solution designed to enhance the braking performance of your vehicle. Engineered to meet rigorous standards, this set is ISO 9001 certified and DOT approved, ensuring that you receive a product that adheres to the highest levels of safety and quality. Whether you're a professional mechanic or a car enthusiast, these disc brake pads provide superior stopping power and durability, making them an essential component for your braking system.

This set includes four brake pads, specifically designed for disc brakes, providing a complete solution for most vehicle brake systems. Each pad is crafted using advanced ceramic materials, making them ceramic brake pads that offer exceptional heat resistance and reduced brake dust. The ceramic composition ensures quieter braking and longer pad life compared to traditional metallic or organic brake pads, delivering a smooth and comfortable driving experience.

One of the standout features of this disc brake pad set is its impressive heat resistance, capable of withstanding temperatures up to 500°C. This high heat tolerance minimizes brake fade even under extreme conditions, such as aggressive driving or towing heavy loads, ensuring consistent braking performance and enhanced safety on the road. The ability to resist heat also helps in prolonging the lifespan of both the brake pads and the rotors, reducing maintenance costs over time.

Installation is straightforward and user-friendly thanks to the bolt-on method. This design allows for a secure and precise fit without the need for complicated modifications or specialized tools. However, having a brake pad tool on hand can further simplify the installation process, making it easier to compress calipers and align the pads correctly. The bolt-on installation method ensures that the brake pads stay firmly in place, reducing the risk of movement or noise during operation.

These disc brake pads are compatible with a wide range of vehicles equipped with disc brake systems, making them a versatile choice for many drivers. The combination of ceramic materials, high heat resistance, and a reliable installation method makes this brake pad set an excellent upgrade or replacement for your braking needs. The ceramic brake pad technology not only enhances performance but also contributes to environmental benefits by producing less dust and wear particles compared to conventional brake pads.

In summary, the Disc Brake Pad Set offers a perfect blend of safety, performance, and convenience. With certifications like ISO 9001 and DOT approval, you can trust in the quality and compliance of this product. The set includes four pads designed for disc brakes, featuring ceramic materials that provide quiet operation, reduced brake dust, and exceptional heat resistance up to 500°C. The bolt-on installation method, complemented by the use of a brake pad tool, ensures a hassle-free and secure fit. Upgrade your braking system with this reliable disc brake pad set to experience improved stopping power, enhanced safety, and longer-lasting brake components.

Features:

- Product Name: Disc Brake Pad Set
- Installation Method: Bolt-On for easy and secure fitting
- OE Replacement: Yes, designed to meet original equipment specifications
- Brake Type: Compatible with Disc Brakes
- Heat Resistance: Withstands temperatures up to 500°C
- Package Contents: Includes 4 high-quality brake pads
- Made from the best brake pad material: premium ceramic brake pads
- Offers the durability and performance of ceramic brake pad technology

Technical Parameters:

Brake Pad Type	Disc
Certifications	ISO 9001, DOT Approved
Compatibility	Universal Fit For Most Cars And Motorcycles
Packing	Customized
Package Contents	4 Brake Pads
Guarantee Period	30000-50000km
Brake Type	Disc Brakes
Manufacturer Part Number	DBP-001
OE Replacement	Yes
Product Dimensions	8.5 X 6.5 X 0.7 Inches

Applications:

The Herito Disc Brake Pad Set, model number ZK-28001, is designed to deliver exceptional braking performance and reliability for a wide range of vehicles. Originating from China, this premium set of disc brake pads is engineered to provide the best ceramic brake pads experience, ensuring safety, durability, and smooth stopping power in various driving conditions. Whether you are a daily commuter or a weekend rider, these brake pads are an excellent choice for enhancing your vehicle's braking system. Ideal for both cars and motorcycles, the Herito disc brake pads feature a universal fit, making them compatible with most disc brake systems. The bolt-on installation method ensures a straightforward and secure fit, allowing both professional mechanics and DIY enthusiasts to replace brake pads with ease. The package includes four brake pads, providing a complete set for immediate brake system maintenance or upgrade.

These disc brake pads are perfect for various application occasions and scenarios. In urban environments, where frequent stops and starts are common, the best ceramic brake pads offer superior heat resistance and minimal brake dust, maintaining clean wheels and consistent braking performance. For highway driving, the Herito brake pads provide excellent fade resistance and enhanced friction, contributing to safe and confident stopping at higher speeds.

In more demanding scenarios such as mountainous or hilly terrains, the disc brake pads maintain strong and reliable braking power, even under prolonged use. This makes them suitable for riders and drivers who require dependable brakes during long descents and challenging road conditions. Additionally, the ceramic composition ensures quieter operation, reducing the annoying squeal often associated with traditional brake pads.

For motorcycle enthusiasts, the Herito disc brake pad set offers the best ceramic brake pads option that balances performance and longevity. The pads' universal compatibility means they can be installed on a variety of motorcycle models, enhancing safety during recreational rides, city traffic, or track days. The bolt-on installation method also simplifies maintenance, allowing riders to quickly replace worn pads and get back on the road.

In summary, the Herito ZK-28001 disc brake pad set is a versatile and high-quality product ideal for anyone seeking reliable, efficient, and easy-to-install disc brake pads. Whether for everyday driving, spirited riding, or demanding road conditions, these brake pads deliver consistent performance, making them one of the best ceramic brake pads available on the market today.

Customization:

Herito offers premium disc brake pads with model number ZK-28001, designed to provide exceptional performance and durability. Manufactured in China, these disc brake pads are known as the best brake pad brand for their reliable heat resistance of up to 500°C, ensuring safety and efficiency under extreme conditions. The bolt-on installation method makes it easy to fit these pads universally on most cars and motorcycles. With a guarantee period covering 30,000 to 50,000 km, Herito's disc brake pads come with customized packing to meet your specific needs, delivering both quality and convenience.
