

30000-50000km Guarantee Period Best Ceramic Brake Pads with Part Number DBP-001 Ensuring Stopping Power and Minimal Wear

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-28001

Product Specification

- Numberofpads: 4
- Interchange Part Number: D1293 D1222
- Manufacturer Part Number: DBP-001
- Oe Replacement: Yes
- Compatibility: Universal Fit For Most Cars And Motorcycles
- Model: Buick Firstland
- Certifications: ISO 9001, DOT Approved
- Packing: Customized

Product Description:

The Disc Brake Pad Set is engineered to deliver exceptional braking performance, reliability, and durability for a wide range of vehicles equipped with disc brakes. Designed to meet and exceed OEM brake pads standards, this brake pad set offers superior stopping power and enhanced safety, making it an ideal choice for drivers seeking both quality and peace of mind on the road.

One of the standout features of this Disc Brake Pad Set is its impressive heat resistance, capable of withstanding temperatures up to 500°C. This high thermal tolerance ensures that the brake pads maintain optimal performance even under extreme braking conditions, such as aggressive driving, heavy loads, or mountainous terrain. The ability to resist heat buildup reduces the risk of brake fade, maintaining consistent friction and braking efficiency throughout its lifespan.

Manufactured with advanced materials, these are among the best ceramic brake pads available on the market. Ceramic brake pads are known for their excellent balance of performance, noise reduction, and dust control. Unlike traditional organic or semi-metallic pads, ceramic pads provide a quieter braking experience with minimal brake dust, keeping your wheels cleaner and your driving experience more comfortable. This Disc Brake Pad Set leverages the benefits of ceramic technology to deliver smooth, reliable braking with reduced wear on rotors.

The installation of this Disc Brake Pad Set is straightforward and user-friendly, utilizing a bolt-on method. This feature allows for easy and secure attachment to the vehicle's braking system without the need for specialized tools or complex procedures. Whether you are a professional mechanic or a DIY enthusiast, the bolt-on installation ensures that the brake pads fit perfectly and function as intended, saving time and effort during replacement.

Customization is another key aspect of this product. The Disc Brake Pad Set comes with customizable packing options, catering to various needs such as retail presentation, bulk shipping, or special branding requirements. This flexibility makes it an excellent choice for both individual customers and automotive parts distributors looking to tailor the packaging to their specific market demands.

Compatibility and interchangeability are critical when selecting brake pads, and this Disc Brake Pad Set excels in this area as well. It is designed to be interchangeable with part numbers D1293 and D1222, ensuring a perfect fit for vehicles that require those specific OEM brake pad replacements. This interchange part number compatibility guarantees that customers can confidently replace their worn or damaged brake pads without concerns about improper fitment or performance issues.

With a focus on durability, performance, and user convenience, this Disc Brake Pad Set is a top-tier solution for maintaining and upgrading your vehicle's braking system. Its ceramic composition not only makes it one of the best ceramic brake pads but also ensures longevity and consistent braking force. The reduced noise and dust generation contribute to a more pleasant driving environment, while the high heat resistance supports safe braking under demanding conditions.

In summary, if you are looking for OEM brake pads that combine cutting-edge ceramic technology, robust heat resistance, easy bolt-on installation, and customizable packaging, this Disc Brake Pad Set is an outstanding choice. It meets stringent quality standards and offers compatibility with key part numbers, making it a reliable and efficient upgrade for your vehicle's disc brakes. Choose this product to experience enhanced braking performance, safety, and comfort on every journey.

Features:

- Product Name: Disc Brake Pad Set
- OE Replacement: Yes, ensuring perfect fit and reliable performance
- Compatible Model: Buick Firstland
- Guaranteed Performance Period: 30,000 - 50,000 km
- Interchange Part Numbers: D1293, D1222
- Number of Pads Included: 4
- Made from high-quality materials for the best ceramic brake pads experience
- Designed as a premium ceramic brake pad for quieter braking and less dust
- Compatible with standard brake pad tools for easy installation and maintenance

Technical Parameters:

Interchange Part Number	D1293 D1222
Manufacturer Part Number	DBP-001
Installation Method	Bolt-On
Model	Buick Firstland
OE Replacement	Yes
Number of Pads	4
Heat Resistance	Up To 500°C
Packing	Customized
Compatibility	Universal Fit For Most Cars And Motorcycles
Brake Type	Disc Brakes

This Disc Brake Pad Set features high-quality ceramic brake pads, known for their durability and superior performance. As one of the best brake pad brands, these ceramic brake pads ensure reliable stopping power and long-lasting wear for a variety of vehicles.

Applications:

The Herito Disc Brake Pad Set, model number ZK-28001, is designed to deliver exceptional braking performance and reliability. Originating from China, this product measures 8.5 X 6.5 X 0.7 inches, making it a perfect fit for a wide range of vehicles. Its universal compatibility ensures that it works seamlessly with most cars and motorcycles, providing a versatile solution for various braking needs. These disc brake pads are an excellent choice for drivers seeking good ceramic brake pads that offer superior stopping power and enhanced durability. The ceramic brake pad material ensures quieter braking, less dust generation, and longer lifespan compared to traditional brake pads. Thanks to the OE replacement quality and interchange part numbers D1293 and D1222, the Herito ZK-28001 set fits perfectly, making installation straightforward and hassle-free.

The product application occasions for the Herito Disc Brake Pad Set span across daily commuting, long-distance highway driving, and even more demanding scenarios such as mountainous or hilly terrains where consistent and reliable braking is critical. For motorcycle enthusiasts and car owners alike, these ceramic brake pads provide confidence in every journey, whether you are navigating city traffic or cruising on open roads.

In addition, these brake pads are suitable for use in both personal and commercial vehicles, making them an ideal choice for fleet operators who prioritize safety and maintenance efficiency. The ceramic brake pad's resistance to heat and wear ensures optimal performance under various weather conditions, from rainy days to hot summer drives.

Overall, the Herito ZK-28001 Disc Brake Pad Set is designed to meet the demands of everyday driving scenarios, offering a reliable and efficient braking solution. Whether you are replacing worn-out pads or upgrading your vehicle's braking system, these good ceramic brake pads provide peace of mind through enhanced performance and durability, making them a smart investment for any vehicle owner.

Customization:

Herito offers customized product customization services for the Disc Brake Pad Set, model number ZK-28001, designed to meet your specific needs. Originating from China, these disc brake pads are engineered for easy bolt-on installation, ensuring a hassle-free upgrade to your vehicle's braking system. Each package contains 4 high-quality brake pads, carefully packed with customized options to suit your preferences. As a leading name in the industry, Herito is recognized as the best brake pad brand, providing the best ceramic brake pads that deliver superior performance, durability, and safety. Choose Herito for reliable, efficient, and top-tier disc brake solutions tailored just for you.
