Basic Information

- Brand Name: Herito
- Model Number: ZK-28001

Product Specification

- Oe Replacement: Yes
- Interchange Part Number: D1293 D1222
- Model: Buick Firstland
- Guarantee Peroid: 30000-50000km
- Brake Type: Disc Brakes
- Certifications: ISO 9001, DOT Approved
- Packing: Customized
- Manufacturer Part Number: DBP-001

Product Description:

The Disc Brake Pad Set is an essential upgrade for anyone looking to enhance their vehicle’s braking performance with reliable and durable components. Designed with universal compatibility in mind, this set offers a perfect fit for most cars and motorcycles, making it a versatile solution for a wide range of vehicles. Whether you’re performing routine maintenance or upgrading your braking system, these brake pads deliver consistent stopping power and long-lasting performance.

One of the standout features of this Disc Brake Pad Set is its high-quality construction, often compared to OEM brake pads in terms of reliability and effectiveness. These brake pads utilize advanced materials that ensure excellent friction and heat dissipation, providing you with a safer and smoother driving experience. The good ceramic brake pads included in this set are known for their low noise and minimal dust production, which means your wheels stay cleaner and your ride stays quieter. Ceramic brake pads are also gentler on rotors, helping to extend the lifespan of your braking system components.

The package contents include 4 brake pads, which is typically enough to replace the pads on either the front or rear wheels of your vehicle. This makes the set an economical and convenient choice for drivers who want to maintain optimal braking performance without the hassle of sourcing individual parts. Each pad is crafted to meet rigorous quality standards, ensuring consistent thickness and durability throughout its service life.

Installation is straightforward and user-friendly with a bolt-on method, allowing for quick and secure mounting without the need for complicated tools or professional assistance. For those who are performing a brake pad replacement for the first time, a brake pad tool can be helpful to properly compress the caliper pistons and align the new pads during installation. This ease of installation means reduced downtime and less frustration, making it a great option for DIY enthusiasts as well as professional mechanics.

Customization options for packing are available, allowing the product to be tailored to specific needs, whether for retail, wholesale, or personal use. This flexibility in packaging ensures that the product arrives in pristine condition and is ready for immediate use or resale.

Durability is a key consideration with this Disc Brake Pad Set, which is backed by a guarantee period covering 30,000 to 50,000 kilometers. This extensive warranty reflects the manufacturer’s confidence in the product’s longevity and performance consistency.

Whether you’re navigating city streets, highways, or winding mountain roads, these brake pads provide reliable stopping power and peace of mind for thousands of kilometers.

In summary, the Disc Brake Pad Set is a high-performance, universally compatible solution that combines the quality of OEM brake pads with the benefits of good ceramic brake pads. Its user-friendly bolt-on installation, comprehensive package contents, and customizable packing make it an excellent choice for a wide range of vehicles and users. Coupled with a generous guarantee period, this brake pad set is a smart investment for anyone looking to maintain or upgrade their braking system with confidence and ease.

Features:

- Product Name: Disc Brake Pad Set
- Interchange Part Number: D1293, D1222
- Certifications: ISO 9001, DOT Approved
- Number of Pads: 4
- Installation Method: Bolt-On
- OE Replacement: Yes
- Made with the best brake pad material for superior performance
- Features the best ceramic brake pads for reduced noise and dust
- Designed to meet or exceed OEM brake pads standards

Technical Parameters:

Model	Buick Firstland
Package Contents	4 Brake Pads
Brake Pad Type	Disc
Installation Method	Bolt-On
Product Dimensions	8.5 X 6.5 X 0.7 Inches
Manufacturer Part Number	DBP-001
OE Replacement	Yes
Guarantee Period	30000-50000 km
Packing	Customized
Heat Resistance	Up To 500°C

Applications:

The Herito Disc Brake Pad Set, model number ZK-28001, is designed to deliver exceptional braking performance for a wide range of vehicles. Originating from China, these good ceramic brake pads offer reliable stopping power and durability, making them an excellent choice for both everyday driving and more demanding conditions. With product dimensions of 8.5 X 6.5 X 0.7 inches, this set is compact yet highly effective, ensuring a smooth fit and optimal function in most vehicles.

These ceramic brake pads are universally compatible, fitting most cars and motorcycles, which makes them a versatile option for drivers

seeking to upgrade or replace their existing brake pads. Whether you're commuting in urban traffic, embarking on long road trips, or navigating winding mountain roads, the Herito ceramic brake pads provide consistent braking performance. Their advanced ceramic material not only enhances braking efficiency but also produces less dust and noise compared to traditional brake pads, contributing to a cleaner wheel appearance and a quieter ride.

The Herito Disc Brake Pad Set is especially suitable for various application occasions such as daily city driving, highway cruising, and even light off-road use. For motorcycle riders, these ceramic brake pads offer improved heat dissipation and fade resistance, essential for maintaining control during aggressive riding or sudden stops. Car owners will appreciate the enhanced longevity and steady braking feel, which is crucial for both safety and comfort during stop-and-go traffic or emergency braking situations.

Each package contains 4 brake pads, carefully packed with customized packaging to ensure the product arrives in perfect condition. This makes the Herito ZK-28001 set an ideal choice for DIY enthusiasts and professional mechanics alike, providing all the necessary components for a complete brake pad replacement. Overall, these ceramic brake pads stand out for their blend of performance, durability, and universal fit, making them a trusted option for anyone looking to enhance their vehicle's braking system.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-28001, designed and manufactured in China. We provide customized packing options to meet your specific requirements, ensuring that each package contains 4 high-quality brake pads. Our ceramic brake pads are engineered to deliver exceptional performance with heat resistance up to 500°C, making them among the best ceramic brake pads available on the market. Whether you need OEM brake pads for your vehicle or aftermarket solutions, Herito's Disc Brake Pad Set meets rigorous standards with ISO 9001 certification and DOT approval, guaranteeing safety and reliability.
