

## Bolt On Installation Method Brake Pad Tool With 4 Number Of Pads Engineered For Easy Installation And Brake System Performance

Our Product Introduction

### Basic Information

- Brand Name: Herito
- Model Number: ZK-28001

### Product Specification

- Certifications: ISO 9001, DOT Approved
- Packing: Customized
- Product Dimensions: 8.5 X 6.5 X 0.7 Inches
- Compatibility: Universal Fit For Most Cars And Motorcycles
- Guarantee Peroid: 30000-50000km
- Manufacturer Part Number: DBP-001
- Brake Type: Disc Brakes
- Oe Replacement: Yes

### Product Description:

The Disc Brake Pad Set, with the Manufacturer Part Number DBP-001, is a high-quality and reliable solution designed to provide optimal braking performance for a wide range of vehicles. Whether you drive a car or ride a motorcycle, this brake pad set offers a universal fit, ensuring compatibility with most makes and models. Its versatile design makes it an excellent choice for those seeking dependable and efficient braking components.

One of the standout features of this Disc Brake Pad Set is its ceramic brake pad composition. Ceramic brake pads are renowned for their superior performance, durability, and low noise operation. Unlike traditional brake pads, ceramic pads generate less dust, keeping your wheels cleaner and reducing the frequency of maintenance. The advanced ceramic material also offers excellent heat dissipation, which minimizes brake fade during prolonged use, thus enhancing safety and control on the road.

Measuring 8.5 X 6.5 X 0.7 inches, this brake pad set is compact yet robust, designed to fit seamlessly within the braking system without adding unnecessary bulk. The carefully engineered dimensions contribute to a precise fit, ensuring consistent contact with the brake rotor and efficient stopping power. Additionally, the set comes with customized packing that protects the brake pads during shipping and storage, maintaining their integrity until installation.

Installation is straightforward thanks to the bolt-on method, which allows for quick and secure attachment of the brake pads without the need for complex tools or modifications. This user-friendly installation process saves time and effort, making it accessible for both professional mechanics and DIY enthusiasts. To facilitate the installation and maintenance process, the use of a brake pad tool is highly recommended. A brake pad tool helps in safely compressing the caliper pistons and ensures the pads are properly seated, preventing damage and promoting longevity.

Incorporating this Disc Brake Pad Set into your vehicle's braking system guarantees enhanced stopping power and improved safety. The ceramic brake pad material ensures a quieter ride with minimal brake dust, while the universal compatibility makes it an ideal replacement part for a variety of cars and motorcycles. Whether you are upgrading your current brake pads or replacing worn ones, this set offers a perfect balance of performance, durability, and ease of installation.

Moreover, the Disc Brake Pad Set is designed to withstand the rigors of daily driving and challenging road conditions. The ceramic composition maintains its integrity under high temperatures and heavy braking scenarios, providing consistent performance over time. This durability translates into fewer replacements and lower maintenance costs, making it a cost-effective choice for vehicle owners.

In summary, the Disc Brake Pad Set (Manufacturer Part Number DBP-001) is an exceptional product that combines the advantages of ceramic brake pads with universal compatibility and user-friendly installation. Its precise dimensions, customized packing, and bolt-on installation method ensure a hassle-free upgrade or replacement. Remember to use a brake pad tool for optimal installation results, ensuring your vehicle's braking system operates at peak efficiency. Choose this brake pad set for reliable, quiet, and effective braking performance on both cars and motorcycles.

### Features:

High-quality disc brake pads designed for optimal braking performance

Best ceramic brake pads offering superior heat resistance up to 500°C

Universal fit compatible with most cars and motorcycles

Set includes 4 disc brake pads for complete replacement

Product dimensions: 8.5 X 6.5 X 0.7 inches for easy installation

Durable and reliable disc brake pads ensuring long-lasting safety

### Technical Parameters:

Packing	Customized
Package Contents	4 Brake Pads
Heatresistance	Up To 500°C
Certifications	ISO 9001, DOT Approved
Manufacturer Part Number	DBP-001
Oe Replacement	Yes
Brake Pad Type	Disc
Model	Buick Firstland
Interchange Part Number	D1293 D1222
Guarantee Period	30000-50000km

### Applications:

The Herito Disc Brake Pad Set, model number ZK-28001, is designed to provide exceptional braking performance for a wide range of vehicles. As a product originating from China, these good ceramic brake pads are engineered with precision to meet and exceed OE replacement standards, ensuring a perfect fit and reliable functionality for disc brake systems. Whether you are a daily commuter, a weekend road trip enthusiast, or someone who demands the best brake pad brand for your vehicle, the Herito brake pad set offers outstanding stopping power and durability.

These ceramic brake pads are ideal for various application occasions and scenarios. For urban driving, where frequent stopping and

starting are common, the Herito Disc Brake Pad Set delivers smooth and consistent braking with minimal dust and noise, making your ride more comfortable and cleaner. On highway journeys, the bolt-on installation method and robust construction provide peace of mind with reliable heat dissipation and reduced brake fade, ensuring safety during long-distance travel or sudden braking situations.

For drivers who enjoy spirited driving or require enhanced braking performance for heavier vehicles, these disc brake pads stand out by offering excellent friction properties and resistance to wear. The Herito DBP-001 part number assures compatibility with many disc brake types, making it a versatile choice for replacement or upgrade. The ceramic material composition not only improves braking efficiency but also contributes to longer pad life compared to traditional brake pad materials.

In off-road or demanding driving conditions, the Herito ceramic brake pads maintain their structural integrity and performance, thanks to their high-quality manufacturing standards. Their ability to withstand extreme temperatures and harsh environments makes them suitable for a variety of vehicle types, from sedans to SUVs and light trucks. With these brake pads, you can confidently tackle diverse driving scenarios without compromising on safety or comfort.

Overall, the Herito Disc Brake Pad Set (ZK-28001) represents the best brake pad brand choice for those seeking reliable, good ceramic brake pads that combine efficiency, durability, and ease of installation. Whether replacing worn-out pads or upgrading your braking system, this set offers exceptional value and performance for everyday driving and beyond.

### Customization:

Herito offers customized product customization services for the Disc Brake Pad Set, model number ZK-28001, specifically designed for the Buick Firstland. Manufactured in China, these disc brake pads are made from the best brake pad material to ensure superior performance and durability. Our OEM brake pads are engineered as a perfect OE replacement, guaranteeing compatibility and reliability. We provide customized packing options to meet your specific requirements. The product dimensions are 8.5 X 6.5 X 0.7 inches, making it an ideal fit for your vehicle. Choose Herito for the best ceramic brake pads that combine advanced technology with high-quality materials for enhanced braking efficiency and safety.
