

Frictioncoefficient035 ceramic brake pads front and rear designed to deliver consistent braking force reducing risk of brake fade during extended

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-28010

Product Specification

- Weight: 0.5 Kg
- Frictioncoefficient: 0.35
- Wear Resistance: High Wear Resistance
- Durability: High Wear Resistance
- Heatresistance: Up To 600°C
- Placement On Vehicle: Front And Rear
- Slotted: Yes
- Factory No: ZK-14006

Product Description:

The Disc Brake Pad Set, identified by Factory No: ZK-14006, is an essential component designed to ensure optimal braking performance and safety for your vehicle. This set includes 4 high-quality brake pads, manufactured to meet and exceed industry standards, making it a reliable choice for those seeking durability and efficiency in their braking system.

One of the standout features of this Disc Brake Pad Set is its high wear resistance. Engineered with advanced materials and precision manufacturing processes, these brake pads offer exceptional durability, allowing them to maintain their performance over extended periods of use. This high wear resistance not only enhances the lifespan of the brake pads but also ensures consistent braking power, providing peace of mind and safety on every drive.

Designed to fit standard sizes, this brake pad set is compatible with a wide range of vehicle models, making it a versatile and convenient choice for drivers and mechanics alike. The standard size ensures easy installation, allowing for a hassle-free replacement process without the need for extensive modifications or adjustments.

These OEM brake pads are crafted to meet the exact specifications of original equipment manufacturers, guaranteeing a perfect fit and optimal functionality. Using OEM brake pads like this set helps maintain the integrity of your vehicle's braking system, ensuring that it performs as intended by the manufacturer. This is particularly important for preserving vehicle safety and avoiding premature wear or damage to other brake components.

Moreover, the Disc Brake Pad Set incorporates some of the best ceramic brake pads technology available in the market today. Ceramic brake pads are renowned for their superior performance, including quieter operation, reduced brake dust, and better heat dissipation compared to conventional pads. This means that you not only get excellent stopping power but also a cleaner and more comfortable driving experience.

Choosing this Disc Brake Pad Set means investing in high-quality components that offer a balanced combination of durability, performance, and comfort. The ceramic composition ensures that the brake pads remain cool under heavy braking conditions, reducing the risk of brake fade and maintaining reliable stopping power even in demanding situations. Additionally, the reduction in brake dust helps keep your wheels cleaner, enhancing the overall appearance of your vehicle.

In summary, the Disc Brake Pad Set with Factory No: ZK-14006 is an outstanding choice for anyone looking to upgrade or replace their vehicle's braking system. With four pads included in the set, a standard size for easy installation, and high wear resistance for long-lasting performance, this product stands out as a top-tier option. By opting for these OEM brake pads, you ensure compatibility and quality, while benefiting from the advantages of the best ceramic brake pads technology. Whether you are a professional mechanic or a car enthusiast, this brake pad set delivers reliability, safety, and excellent value for your investment.

Features:

- Product Name: Disc Brake Pad Set
- Factory No: ZK-14006
- Operating Temperature Range: -40°C To 630°C
- Placement On Vehicle: Front And Rear
- Slotted design for improved heat dissipation and performance
- Shims Included for noise reduction and enhanced durability
- Made with the best ceramic brake pads material for superior braking performance
- Offers the best brake pad material ensuring long-lasting wear and reliability
- Engineered to be among the best ceramic brake pads available on the market

Technical Parameters:

Size	Standard
Operating Temperature Range	-40°C To 630°C
Weight	0.5 Kg
OE Replacement	Yes
Durability	High Wear Resistance
Wear Resistance	High Wear Resistance
Noise Level	Low Noise Operation
Shims Included	Yes
Factory No	ZK-14006
Number of Pads	4

Applications:

The Herito Disc Brake Pad Set, model number ZK-28010, is designed to offer superior performance and reliability for a wide range of vehicles. Manufactured in China under the factory number ZK-14006, these brake pads serve as an excellent OE replacement option, ensuring compatibility and high-quality standards that match or exceed original equipment manufacturer specifications. Whether you are a professional mechanic, a car enthusiast, or someone looking to maintain their vehicle's braking system, these disc brake pads are an ideal choice.

One of the primary application occasions for the Herito disc brake pads is everyday driving and routine vehicle maintenance. These pads are engineered for both front and rear positions, making them versatile and suitable for comprehensive brake system upgrades or replacements. Their low noise operation feature ensures a quiet and comfortable driving experience, making them perfect for urban commuting where noise pollution can be a concern. Drivers who prioritize smooth braking without the annoying squeals will appreciate the quiet performance of these best ceramic brake pads.

In addition to daily use, the Herito ZK-28010 brake pads are well suited for more demanding scenarios such as long-distance travel, highway driving, and even light off-road conditions. Thanks to their ceramic composition, these OEM brake pads provide excellent heat dissipation, wear resistance, and consistent stopping power under various driving conditions. They are an outstanding choice for those who need reliable braking performance during extended journeys or in regions with varying weather conditions.

Moreover, these disc brake pads are applicable in workshops and garages that specialize in brake system servicing. Their status as OEM brake pads means they fit perfectly with original brake components, simplifying installation and reducing potential compatibility issues. The set includes four pads, enabling replacement on both front and rear wheels, which is particularly useful for complete brake overhauls or synchronized brake maintenance.

In summary, the Herito Disc Brake Pad Set ZK-28010 is perfect for a broad spectrum of applications ranging from daily city driving to more intense usage scenarios. Their low noise operation, OEM replacement quality, and ceramic material make them some of the best ceramic brake pads available on the market. Whether you are upgrading your vehicle's braking system or performing routine maintenance, these brake pads deliver dependable performance and peace of mind.

Customization:

Herito offers high-quality disc brake pads with model number ZK-28010, designed for both front and rear positions. Manufactured in China, these OEM brake pads weigh 0.5 Kg and feature a friction coefficient of 0.35, ensuring reliable braking performance. Our disc brake pads provide high wear resistance and can withstand heat resistance up to 600°C, making them ideal for demanding driving conditions. Customize your order to meet your specific requirements with Herito's trusted disc brake pads.
