

Slotted Disc Brake Pad Set Number of Pads 4 Front and Rear Placement Offering Performance for Daily Vehicle Operation

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-28010

Product Specification

- Noiselevel: Low Noise Operation
- Position: Front And Rear
- Shims Included: Yes
- Weight: 0.5 Kg
- Numberofpads: 4
- Placement On Vehicle: Front And Rear
- Heatresistance: Up To 600°C
- Size: Standard

Product Description:

The Disc Brake Pad Set is an essential component designed to deliver superior braking performance and reliability for a wide range of vehicles. Weighing just 0.5 Kg, this set offers the perfect balance between durability and lightweight efficiency, making it an excellent choice for drivers seeking high-quality brake components. Its standard size ensures compatibility with most vehicles, providing an easy and direct fit as an OE replacement, which means you can trust it to meet or exceed the specifications of your original brake pads. One of the standout features of this Disc Brake Pad Set is its impressive operating temperature range, spanning from -40°C to 630°C. This broad range allows the brake pads to perform effectively under extreme conditions, whether you are driving in freezing winter climates or tackling high-speed descents where heat buildup is significant. Such versatility ensures that the brake pads maintain consistent performance, giving you confidence and safety regardless of the driving environment.

Durability is a critical factor when selecting brake pads, and this set excels with its high wear resistance. The materials used in these brake pads are engineered to withstand prolonged use without compromising braking efficiency or safety. High wear resistance not only extends the lifespan of the pads but also reduces the frequency of replacements, making this set a cost-effective solution for vehicle maintenance.

These brake pads are manufactured using the best brake pad material available, combining advanced ceramic compounds that deliver exceptional stopping power while minimizing noise and dust. This makes them an ideal choice for drivers who want the benefits of good ceramic brake pads, which are known for their smooth operation, long-lasting performance, and reduced environmental impact compared to traditional brake materials.

As OEM brake pads, this Disc Brake Pad Set is designed to meet the stringent standards set by original equipment manufacturers. This means they offer the same quality, safety, and reliability as the brake pads initially installed on your vehicle at the factory. Choosing OEM brake pads ensures seamless integration with your braking system, providing optimal performance without any modifications or adjustments.

In addition to performance and durability, these brake pads are engineered to deliver quiet braking and minimal dust generation. Traditional brake pads often produce a considerable amount of brake dust, which can accumulate on wheels and other components, leading to unsightly appearances and potential damage. By opting for these good ceramic brake pads, you benefit from cleaner wheels and reduced maintenance efforts.

Installation of the Disc Brake Pad Set is straightforward due to its standard size and OEM specifications. Whether you are a professional mechanic or a DIY enthusiast, you will appreciate the ease with which these pads can be fitted onto your vehicle's braking system. This reduces downtime and ensures that your vehicle is back on the road with enhanced braking capability as quickly as possible.

Overall, the Disc Brake Pad Set represents a perfect blend of advanced engineering, quality materials, and practical design. It offers vehicle owners a reliable and efficient braking solution that prioritizes safety, longevity, and environmental considerations. Whether you are replacing worn-out pads or upgrading your current braking system, this set provides the best brake pad material combined with the trusted performance of OEM brake pads and the advantages of good ceramic brake pads.

In summary, if you are seeking a disc brake pad set that offers high wear resistance, a broad operating temperature range from -40°C to 630°C, and the assurance of an OE replacement part, this product is an excellent choice. Its lightweight construction at 0.5 Kg and standard sizing make it a versatile and practical option for a wide range of vehicles. Experience the benefits of advanced ceramic technology paired with OEM quality standards by choosing this Disc Brake Pad Set for your next brake pad replacement.

Features:

- Product Name: Disc Brake Pad Set
- Weight: 0.5 Kg
- Operating Temperature Range: -40°C to 630°C
- Durability: High Wear Resistance for long-lasting performance
- OE Replacement: Yes, fits perfectly as an original equipment replacement
- Heat Resistance: Up to 600°C ensuring reliable braking under extreme conditions
- Includes the best ceramic brake pads for superior stopping power
- Made from premium ceramic brake pads material for reduced noise and dust
- Compatible with brake pad tool for easy and efficient installation

Technical Parameters:

Position	Front And Rear
Size	Standard
Heat Resistance	Up To 600°C
Shims Included	Yes
Factory No	ZK-14006
Durability	High Wear Resistance
Number of Pads	4
Wear Resistance	High Wear Resistance
Friction Coefficient	0.35
Weight	0.5 Kg

Applications:

The Herito Disc Brake Pad Set, model number ZK-28010, is designed to deliver superior braking performance in a variety of occasions and scenarios. As one of the best brake pad brands originating from China, Herito ensures quality and reliability in every set. This product includes 4 ceramic brake pads, suitable for both front and rear positions on your vehicle, making it a versatile choice for comprehensive brake maintenance.

These ceramic brake pads are ideal for everyday driving situations, providing smooth and consistent stopping power whether you are commuting in urban traffic, cruising on highways, or navigating winding country roads. Thanks to their low noise operation, the Herito ZK-28010 brake pads enhance your driving experience by minimizing brake squeal and vibrations, allowing for a quieter and more comfortable ride.

In addition to daily use, these brake pads perform exceptionally well under more demanding scenarios such as sudden stops in emergency situations or when driving in hilly or mountainous terrains. The friction coefficient of 0.35 ensures reliable grip and controlled deceleration, contributing to enhanced safety and confidence behind the wheel. Their OE replacement compatibility guarantees that they fit perfectly and function as effectively as original equipment parts, making installation straightforward and hassle-free.

Whether you are a casual driver or someone who values high-performance vehicle components, the Herito ceramic brake pads provide durability and long-lasting performance. Their resistance to wear and heat ensures that your braking system remains efficient even after extended use. This makes the ZK-28010 model an excellent investment for maintaining optimal brake function and vehicle safety over time.

In summary, the Herito Disc Brake Pad Set is perfectly suited for a wide range of applications—from daily commuting and family trips to more intense driving conditions. As a trusted ceramic brake pad option from one of the best brake pad brands in the industry, it offers low noise operation, reliable friction, and OE replacement assurance, making it the smart choice for anyone looking to upgrade or replace their vehicle's front and rear brake pads.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-28010, made in China. Our ceramic brake pad sets are designed for low noise operation and feature high wear resistance, ensuring long-lasting performance. With heat resistance up to 600°C, these good ceramic brake pads maintain optimal functionality even under extreme conditions. Available in standard size and as an OE replacement, Herito is recognized as the best brake pad brand for delivering reliable, high-quality brake components tailored to your specific needs.
