

Oe Replacement Ceramic Brake Pad Slotted Design Durable Performance Suitable for Various Vehicle Models and Applications

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-28010

Product Specification

- Size: Standard
- Wear Resistance: High Wear Resistance
- Number of pads: 4
- Friction coefficient: 0.35
- Operating temperature range: 100°C To 630°C
- Slotted: Yes
- Shims Included: Yes
- Placement On Vehicle: Front And Rear

Product Description:

The Disc Brake Pad Set is an essential component designed to provide superior braking performance for a wide range of vehicles. Engineered with precision and built to last, this brake pad set is ideal for drivers seeking reliability, safety, and enhanced control on the road. With its standard size, the Disc Brake Pad Set is compatible with most vehicles, making it a versatile choice for both front and rear brake applications.

One of the standout features of this brake pad set is its exceptional heat resistance. These ceramic brake pads can withstand temperatures of up to 600°C, ensuring consistent performance even under intense braking conditions. This high heat tolerance minimizes the risk of brake fade, which occurs when pads overheat and lose their effectiveness. Whether you are driving in stop-and-go city traffic or descending steep hills, these pads maintain their integrity and provide dependable stopping power.

Weighing in at just 0.5 kg, the Disc Brake Pad Set is designed to offer a lightweight solution without compromising on durability or strength. The reduced weight helps to improve overall vehicle efficiency and handling, contributing to a smoother driving experience. Despite being lightweight, the materials used in these ceramic brake pads are engineered for maximum wear resistance, extending the lifespan of the pads and reducing the frequency of replacements.

The operating temperature range of this brake pad set is an impressive -40°C to 630°C, which means it performs well under extreme weather conditions. Whether you're driving in freezing winter temperatures or hot summer days, these ceramic brake pads maintain optimal braking efficiency. This wide operating range helps to ensure your vehicle remains safe and responsive, regardless of the climate or environment.

Designed for use on both the front and rear positions of your vehicle, this Disc Brake Pad Set offers a comprehensive solution for your braking needs. Front and rear brakes share the responsibility of stopping your vehicle effectively, and having matched brake pads on both axles helps maintain balanced braking performance. This balanced setup contributes to better vehicle stability, reduced stopping distances, and enhanced overall safety for you and your passengers.

Installation of the Disc Brake Pad Set is straightforward, especially when using a brake pad tool. A brake pad tool assists in the proper fitting and alignment of the brake pads, making the replacement process quicker and more efficient. Whether you are a professional mechanic or a car enthusiast performing maintenance yourself, using a brake pad tool ensures the pads are securely installed, preventing uneven wear and potential brake issues.

The ceramic brake pad composition offers numerous advantages over traditional brake pad materials. Ceramic brake pads generate less dust, which keeps your wheels cleaner and reduces the buildup of debris on braking components. They also tend to be quieter, producing less noise during braking, which enhances driving comfort. Additionally, ceramic brake pads provide smooth and consistent braking performance, contributing to a safer driving experience.

In summary, the Disc Brake Pad Set is a high-quality product that combines durability, heat resistance, and versatility to meet the demands of modern driving. Its standard size ensures compatibility with most vehicles, while its ability to operate efficiently across a wide temperature range makes it suitable for diverse climates. The lightweight yet robust construction, combined with the benefits of ceramic brake pad technology, delivers reliable stopping power for both front and rear brake positions. With the help of a brake pad tool, installation is simple, ensuring your vehicle's braking system is restored to optimal condition quickly and safely. Choose the Disc Brake Pad Set for a dependable, long-lasting, and high-performance braking solution.

Features:

- Product Name: Disc Brake Pad Set
- Placement On Vehicle: Front and Rear
- Slotted design for improved heat dissipation and performance
- Shims included for noise reduction and enhanced fit
- Factory No: ZK-14006
- High wear resistance for longer lifespan
- Made from ceramic brake pads, known as the best brake pad material
- Provides smooth and quiet braking with ceramic brake pad technology

Technical Parameters:

OE Replacement	Yes
Number of Pads	4
Size	Standard
Shims Included	Yes
Wear Resistance	High Wear Resistance
Placement on Vehicle	Front and Rear
Durability	High Wear Resistance
Factory No	ZK-14006
Friction Coefficient	0.35
Operating Temperature Range	-40°C to 630°C

Applications:

The Herito Disc Brake Pad Set, model number ZK-28010, is engineered to deliver exceptional performance and reliability in a wide range of driving conditions. Manufactured in China under factory number ZK-14006, these brake pads are designed with a friction coefficient of 0.35, ensuring optimal stopping power and safety. Whether you're replacing your front or rear brake pads, this set offers a perfect fit for both placements on the vehicle, making it a versatile choice for various car models.

These brake pads are crafted from the best brake pad material that balances durability and performance. The high wear resistance feature ensures a longer lifespan, reducing the frequency of replacements and maintenance costs. This durability makes the Herito disc brake pads ideal for drivers who frequently navigate urban traffic, long highway journeys, or challenging terrains where reliable braking is critical.

In addition to durability, the Herito Disc Brake Pad Set is designed for low noise operation, enhancing driving comfort by minimizing brake squeal and vibrations. This is particularly beneficial in daily commuting scenarios where noise reduction contributes to a more pleasant driving experience. The low noise level also signifies the precision engineering and quality materials used in the manufacturing process. The product is perfect for both professional mechanics and DIY enthusiasts. When paired with the appropriate brake pad tool, installation becomes straightforward, ensuring a secure and efficient brake system upgrade. These OEM brake pads meet stringent quality standards, making them a trusted replacement part that maintains the original braking performance of your vehicle.

Common application occasions for the Herito Disc Brake Pad Set include routine brake maintenance, performance upgrades, and replacements after wear or damage. They are suitable for use in everyday commuting, long-distance travel, as well as more demanding scenarios such as mountainous driving or towing. Their high wear resistance and low noise operation make them an excellent choice for anyone looking to enhance safety and comfort on the road.

Overall, the Herito Disc Brake Pad Set ZK-28010 is a reliable, high-quality product designed to meet the needs of modern vehicles. Its combination of the best brake pad material, OEM quality assurance, and compatibility with brake pad tools ensures it is an excellent investment for maintaining optimal braking performance and vehicle safety in diverse driving scenarios.

Customization:

Herito, recognized as the best brake pad brand, offers the ZK-28010 Disc Brake Pad Set, expertly crafted in China. This set includes 4 high-quality disc brake pads, each weighing 0.5 Kg, designed to deliver exceptional performance. With a friction coefficient of 0.35 and heat resistance up to 600°C, these brake pads ensure reliable stopping power even under extreme conditions. The high wear resistance of Herito's disc brake pads guarantees long-lasting durability, making them a trusted choice for those seeking the best brake pad brand for their vehicle customization needs.
