

Number of pads 4 Disc Brake Pad Set Oe Replacement Low Noise Operation Designed for Heavy Duty and Braking Performance

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-28010

Product Specification

- Operating temperature range: 40°C To 630°C
- Oe Replacement: Yes
- Position: Front And Rear
- Size: Standard
- Weight: 0.5 Kg
- Factory No: ZK-14006
- Wear Resistance: High Wear Resistance
- Noise level: Low Noise Operation

Product Description:

The Disc Brake Pad Set, Factory No: ZK-14006, represents an exceptional blend of advanced engineering and high-quality materials designed to deliver superior braking performance for both front and rear placements on your vehicle. Crafted to meet the rigorous demands of modern driving, these OEM brake pads ensure reliability, safety, and durability under a wide range of operating conditions. One of the standout features of this brake pad set is its impressive operating temperature range, spanning from a chilling -40°C to a scorching 630°C. This extensive range means that whether you are driving in extreme cold weather conditions or navigating steep descents that generate substantial heat, these brake pads maintain consistent performance without compromising safety or efficiency. The ability to withstand such temperature variations without fading or degrading positions this product as a top choice for drivers who require dependable braking in diverse environments.

Designed for installation on both the front and rear of the vehicle, the versatility of this disc brake pad set simplifies maintenance and replacement tasks. By covering both critical points of contact on your vehicle's braking system, it ensures balanced and effective stopping power, contributing to smoother and safer rides. This comprehensive coverage reduces the need for multiple part numbers and streamlines the replacement process, making it a convenient and cost-effective solution for vehicle owners and mechanics alike. Noise can often be a significant concern with brake systems, but this Disc Brake Pad Set excels in delivering low noise operation. The advanced formulation and precise manufacturing techniques used in these OEM brake pads minimize unwanted squealing and vibrations, resulting in a quieter and more comfortable driving experience. This feature is particularly beneficial for daily commuters and long-distance travelers who value a peaceful ride without sacrificing braking performance.

When it comes to friction, the coefficient of 0.35 is indicative of an optimized balance between grip and wear resistance. A friction coefficient at this level provides reliable stopping power, ensuring the vehicle slows down efficiently and predictably under various driving conditions. At the same time, it helps in extending the lifespan of both the brake pads and the rotors by reducing excessive wear. This characteristic makes the Disc Brake Pad Set an excellent choice for drivers who prioritize both safety and long-term maintenance savings. In addition to its performance attributes, this product is made from the best brake pad material available in the market today. The material composition has been carefully selected to provide enhanced durability, thermal stability, and resistance to dust and debris accumulation. This quality material not only supports effective braking but also contributes to cleaner wheels and a more aesthetically pleasing vehicle environment. For professionals and DIY enthusiasts, having access to the best brake pad material means confidence in every application. For those who perform regular brake maintenance or repair, the compatibility of this brake pad set with standard brake pad tools makes installation straightforward and efficient. Whether you are a professional mechanic or a knowledgeable vehicle owner, using the appropriate brake pad tool ensures precise fitting and alignment, which are critical for maximizing the performance and lifespan of the brake pads. This compatibility reduces the risk of installation errors and helps maintain the integrity of the vehicle's braking system.

Overall, the Disc Brake Pad Set Factory No: ZK-14006 is a premium choice for anyone seeking OEM brake pads that combine advanced engineering, superior materials, and practical features. Its ability to operate effectively across a broad temperature range, suitability for both front and rear vehicle placement, low noise operation, and optimal friction coefficient highlight its comprehensive design. Whether you are upgrading your current brake system or replacing worn components, this brake pad set offers a reliable, high-performance solution that meets the demands of modern driving conditions with confidence and ease.

Features:

- Product Name: Disc Brake Pad Set
- Size: Standard
- Shims Included: Yes
- Operating Temperature Range: -40°C to 630°C
- OE Replacement: Yes
- Factory No: ZK-14006
- High-quality ceramic brake pads for superior performance
- Considered some of the best ceramic brake pads on the market
- Includes brake pad tool for easy installation and maintenance

Technical Parameters:

Wear Resistance	High Wear Resistance
Friction Coefficient	0.35
Weight	0.5 Kg
Size	Standard
Slotted	Yes
Noise Level	Low Noise Operation
Heat Resistance	Up To 600°C
Durability	High Wear Resistance
OE Replacement	Yes
Factory No	ZK-14006

Applications:

The Herito Disc Brake Pad Set, model number ZK-28010, is designed to deliver superior braking performance for a variety of vehicles. Manufactured in China, this set includes 4 high-quality ceramic brake pads suitable for both front and rear placement on your vehicle. Weighing only 0.5 kg, these pads are lightweight yet durable, providing reliable stopping power when you need it most. Thanks to its advanced ceramic composition, the Herito disc brake pads offer a friction coefficient of 0.35, ensuring consistent and effective braking under different driving conditions. This makes them an excellent choice for drivers seeking the best ceramic brake pads that combine safety, performance, and longevity. Whether you commute daily in urban traffic or enjoy weekend drives on winding roads, these brake pads meet the demands of various driving scenarios with confidence. One of the key application occasions for the Herito ZK-28010 disc brake pad set is in everyday city driving. The low noise operation feature ensures a quiet and comfortable ride, minimizing brake squeal and vibrations often associated with inferior pads. This makes them ideal for use in family vehicles, sedans, and compact cars where noise reduction enhances the overall driving experience. Additionally, these ceramic brake pads perform exceptionally well in more demanding scenarios such as highway driving and light off-road conditions. Their high friction coefficient ensures dependable stopping power during sudden braking situations, providing peace of mind in emergency stops or heavy traffic. The pads' robust construction also makes them suitable for vehicles that require frequent braking, such as delivery vans or taxis, where durability and consistent performance are critical. In summary, the Herito disc brake pads model ZK-28010 are versatile and reliable components designed for a wide range of vehicles and driving conditions. Whether installed on the front or rear wheels, these ceramic brake pads combine low noise operation, strong friction performance, and lightweight design to offer one of the best ceramic brake pads available on the market. Choose Herito for a safer, quieter, and more efficient braking experience.

Customization:

Customize your Herito Disc Brake Pad Set, model number ZK-28010, designed and manufactured in China to meet your specific needs. Our brake pad tool ensures precise fitting and easy installation, making it ideal for both professional mechanics and DIY enthusiasts. These ceramic brake pads offer exceptional durability with high wear resistance, supporting a friction coefficient of 0.35 for reliable braking performance. With a weight of 0.5 kg and heat resistance up to 600°C, our disc brake pads provide superior safety and longevity under demanding conditions. Choose Herito for high-quality, customizable brake solutions that enhance your vehicle's braking efficiency.
