

Front And Rear Brake Pad Tool Kit Designed To Fit 4 Brake Pads Ensuring Smooth And Accurate Brake Maintenance Procedures

Our Product Introduction

Basic Information

- Brand Name: Herito
- Model Number: ZK-28010

Product Specification

- Slotted: Yes
- Operating temperature range: 40°C To 630°C
- Heat resistance: Up To 600°C
- Friction coefficient: 0.35
- Noise level: Low Noise Operation
- Size: Standard
- Number of pads: 4
- Oe Replacement: Yes

Product Description:

The Disc Brake Pad Set is an exceptional choice for vehicle owners seeking reliable and high-performance braking components. Designed as an OE replacement, these brake pads are engineered to meet or exceed the original equipment manufacturer (OEM) specifications, ensuring a perfect fit and optimal functionality for both front and rear positions. Whether you are performing routine maintenance or upgrading your braking system, this set offers a seamless integration with your vehicle's existing hardware, providing peace of mind and dependable stopping power.

One of the standout features of this Disc Brake Pad Set is its low noise operation. Unlike many conventional brake pads that can produce unpleasant squealing or grinding sounds during use, these pads are specifically formulated to minimize noise. This makes for a quieter and more comfortable driving experience, allowing you to focus on the road without distractions. The inclusion of shims further enhances this noise reduction by absorbing vibrations and preventing metal-to-metal contact, which is often the source of brake noise.

Durability and heat resistance are critical factors in brake pad performance, and this set excels in both areas. These brake pads can withstand temperatures up to 600°C, making them highly resistant to fading and wear even under intense braking conditions. This impressive heat resistance ensures consistent braking performance during prolonged use, such as on steep descents or in stop-and-go traffic. By maintaining their integrity at high temperatures, these pads offer enhanced safety and longevity, reducing the frequency of replacements and maintenance costs.

When it comes to material composition, these pads are made from a premium ceramic formulation, recognized for its superior performance characteristics. Good ceramic brake pads are known for their excellent friction stability, minimal dust generation, and gentle wear on rotors. This means not only will you experience reliable stopping power, but your brake system components will also enjoy extended service life. The ceramic material also contributes to a cleaner wheel appearance, as it produces less brake dust compared to traditional metallic or organic pads.

As an OE replacement product, this Disc Brake Pad Set is designed to meet the stringent standards set by vehicle manufacturers. This ensures that the pads deliver the same level of safety, comfort, and performance as the OEM brake pads originally installed on your vehicle. Choosing this set means you do not have to compromise on quality or reliability, making it an excellent choice for drivers who demand the best from their braking system.

In summary, the Disc Brake Pad Set offers a comprehensive solution for your braking needs, combining the benefits of good ceramic brake pads with the assurance of OEM quality. Its low noise operation, inclusion of shims, high heat resistance up to 600°C, and suitability for both front and rear positions make it a versatile and dependable choice. Whether you are replacing worn-out pads or upgrading your brake system, this set provides excellent stopping power, enhanced safety, and long-lasting performance.

Investing in this Disc Brake Pad Set means you are equipping your vehicle with reliable, efficient, and quiet braking components that are engineered to perform in a variety of driving conditions. With its combination of advanced materials and precise engineering, this product stands out as a top-tier option for anyone looking to maintain or improve their vehicle's braking performance. Trust in these good ceramic brake pads to deliver the quality and durability you expect from OEM brake pads, giving you confidence every time you hit the brakes.

Features:

Product Name: Disc Brake Pad Set

Weight: 0.5 Kg

Number of Pads: 4

Size: Standard

OE Replacement: Yes

High Wear Resistance for long-lasting performance

Compatible with brake pad tool for easy installation

Made from the best brake pad material for optimal braking efficiency

Durable and reliable brake pad tool compatibility

Technical Parameters:

OE Replacement	Yes
Shims Included	Yes
Weight	0.5 Kg
Friction Coefficient	0.35
Size	Standard
Noise Level	Low Noise Operation
Durability	High Wear Resistance
Position	Front And Rear
Operating Temperature Range	-40°C To 630°C
Slotted	Yes

Applications:

The Herito Disc Brake Pad Set, model number ZK-28010, is a high-quality product designed and manufactured in China. This set includes

four standard-sized brake pads that are slotted for enhanced performance and heat dissipation. Suitable for placement on both the front and rear of the vehicle, these pads provide comprehensive braking efficiency, making them an excellent choice for a variety of automotive applications.

This set of good ceramic brake pads is ideal for everyday driving as well as more demanding conditions. Whether you are commuting in the city, driving on the highway, or tackling hilly terrain, the Herito ceramic brake pads ensure reliable stopping power. Their slotted design helps reduce brake fade and enhances durability, allowing drivers to maintain optimal control and safety under different driving scenarios. In terms of application occasions, the Herito Disc Brake Pad Set is perfect for routine vehicle maintenance and brake system upgrades. If your vehicle's braking performance has diminished or you are looking to replace worn-out pads, these ceramic brake pads offer a smooth, quiet, and efficient braking experience. They are also suitable for use in light to moderate off-road conditions, providing consistent performance and resistance to dust and debris.

When installing the Herito brake pads, it is recommended to use a brake pad tool to ensure proper fitting and alignment. This will help maximize the lifespan and effectiveness of the pads, keeping your braking system in top condition. The compatibility of this set with both front and rear placements on the vehicle adds to its versatility, making it a convenient and cost-effective solution for comprehensive brake maintenance.

In summary, the Herito ZK-28010 Disc Brake Pad Set combines quality craftsmanship with practical design features such as slotted surfaces and standard sizing. These ceramic brake pads are an excellent choice for drivers seeking reliable stopping power, durability, and quiet operation across a range of driving environments. Whether for everyday use or specific driving challenges, this set delivers consistent performance and safety for your vehicle's braking needs.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-28010, designed and manufactured in China. These ceramic brake pads are crafted as OE replacements, ensuring perfect fit and reliable performance for both front and rear positions. Each set includes 4 slotted ceramic brake pads that provide low noise operation, making them some of the best ceramic brake pads available on the market. Customers seeking good ceramic brake pads can benefit from Herito's customization options to meet specific vehicle requirements and enhance braking efficiency.
