

High Wear Resistance Disc Brake Pad Set Offering Operating Temperature Range Minus 40°C To 630°C and Friction Coefficient 0.35 Ideal for Long Term

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-28010

Product Specification

- Noiselevel: Low Noise Operation
- Factory No: ZK-14006
- Slotted: Yes
- Size: Standard
- Operatingtemperaturerange: -40°C To 630°C
- Oe Replacement: Yes
- Heatresistance: Up To 600°C
- Durability: High Wear Resistance

Product Description:

When it comes to ensuring optimal braking performance and safety for your vehicle, choosing the right disc brake pads is essential. Our Disc Brake Pad Set is designed to meet and exceed the demands of everyday driving by providing superior stopping power, durability, and reliability. This comprehensive set is engineered for both the front and rear wheels of your vehicle, making it a complete solution for your braking system needs.

One of the standout features of this Disc Brake Pad Set is its compatibility with both front and rear positions on the vehicle. This means that whether you need to replace the pads on the front wheels, the rear wheels, or both, this set has you covered. This all-in-one approach not only simplifies maintenance but also ensures balanced braking performance across all wheels, contributing to safer and smoother driving experiences.

The brake pads are manufactured in a standard size, ensuring a perfect fit for a wide range of vehicle makes and models. This standard sizing facilitates an easy installation process, whether you are a professional mechanic or a DIY enthusiast. Additionally, the pads come with slotted designs that offer several advantages. The slots help in dissipating heat more effectively, reducing the chances of brake fade during heavy braking or prolonged use. They also aid in channeling away dust and debris, which helps maintain consistent contact between the pad and rotor for enhanced braking efficiency.

Another important inclusion in this set is the shims. Shims are critical components that reduce noise and vibration during braking, resulting in a quieter and more comfortable ride. The presence of shims in this Disc Brake Pad Set highlights the attention to detail and commitment to delivering a high-quality product that prioritizes both performance and comfort. By minimizing unwanted brake noise, these shims contribute to an overall more pleasant driving environment.

When selecting disc brake pads, it is crucial to choose from the best brake pad brand to ensure reliability and longevity. Our Disc Brake Pad Set is crafted by a trusted name in the automotive industry known for producing premium braking components. This reputation for quality means you can have confidence that the brake pads will perform consistently under various driving conditions, from daily commuting to more demanding scenarios. The use of high-grade materials and advanced manufacturing techniques guarantees that these pads offer excellent wear resistance and effective braking power, giving you peace of mind on the road.

In summary, this Disc Brake Pad Set is an excellent investment for anyone looking to upgrade or replace their vehicle's braking system. Featuring a design suitable for both front and rear placement, standard sizing for easy compatibility, slotted pads for enhanced heat dissipation and debris management, and included shims for noise reduction, this set provides comprehensive benefits. Backed by a best brake pad brand, it ensures reliability, safety, and top-notch performance. Whether you are maintaining your personal vehicle or outfitting a fleet, these disc brake pads represent a smart choice that combines quality, functionality, and value.

Features:

- Product Name: Disc Brake Pad Set
- Placement On Vehicle: Front and Rear
- OE Replacement: Yes
- Noise Level: Low Noise Operation for a quiet driving experience
- Friction Coefficient: 0.35 for effective braking performance
- Durability: High Wear Resistance ensuring long-lasting use
- Made from good ceramic brake pads material for enhanced performance
- Reliable ceramic brake pad designed to reduce brake dust and noise
- High-quality ceramic brake pad offering excellent stopping power and comfort

Technical Parameters:

OE Replacement	Yes
Friction Coefficient	0.35
Size	Standard
Wear Resistance	High Wear Resistance
Weight	0.5 Kg
Position	Front And Rear
Placement On Vehicle	Front And Rear
Heat Resistance	Up To 600°C
Shims Included	Yes
Factory No	ZK-14006

These disc brake pads offer the best ceramic brake pads performance with OEM brake pads quality, ensuring reliable and durable braking.

Applications:

The Herito Disc Brake Pad Set, model number ZK-28010, is an exceptional choice for both everyday drivers and automotive enthusiasts seeking reliable and high-performance braking solutions. Manufactured in China with stringent quality controls, this brake pad set serves as an OE replacement, ensuring compatibility and optimal performance for a wide range of vehicles. Designed for both front and rear

positions, these brake pads deliver consistent stopping power and enhanced safety under various driving conditions. One of the standout features of the Herito Disc Brake Pad Set is its impressive operating temperature range of -40°C to 630°C. This wide temperature tolerance allows the pads to perform efficiently in extreme weather and demanding driving scenarios, from freezing winter mornings to intense braking during spirited drives or heavy-duty use. The high wear resistance of this brake pad tool ensures long-lasting durability, reducing the frequency of replacements and maintenance costs, making it a cost-effective choice for vehicle owners. This set is ideal for multiple application occasions and scenarios. Whether you are commuting in urban traffic, driving on mountainous terrain, or participating in motorsport activities, the Herito brake pads maintain superior friction and consistent braking response. The high-quality materials and engineering behind this product make it a preferred option for those who want the best brake pad brand that combines safety, reliability, and performance. Furthermore, mechanics and automotive professionals will appreciate the ease of installation and compatibility with standard brake pad tools, enabling quick and efficient brake servicing. The factory number ZK-14006 guarantees traceability and authenticity, giving users confidence in the product's origin and manufacturing excellence. In summary, the Herito Disc Brake Pad Set is perfectly suited for anyone seeking dependable brake pads that perform well in a variety of driving environments. Its ability to handle both front and rear axle braking demands, combined with high wear resistance and wide operating temperature range, makes it a must-have brake pad tool for safe and effective vehicle operation. Trust the best brake pad brand, Herito, to keep your vehicle stopping smoothly and safely every time.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-28010, designed to meet your specific needs. Manufactured in China, these ceramic brake pads are available in a standard size and feature a high friction coefficient of 0.35, ensuring excellent braking performance. Suitable for both front and rear placement on the vehicle, these OEM brake pads provide high wear resistance for enhanced durability. Whether you require customized branding or specifications, Herito's Disc Brake Pad Set can be tailored to deliver reliable and long-lasting ceramic brake pads for your automotive needs.
