

Brake Pads Ceramic Brake Pads Heat Resistant Yes Long Lasting Durability Designed for Heavy Duty Vehicles and Industrial

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Product Type: Brake Pads
- Quantity: 4 Pieces Per Set
- Wear Resistance: High Wear Resistance
- Width: 50mm
- Number of pads: 4
- Guarantee Period: 30000-50000km
- Product Code: DBPS
- Number Of Pieces: 4

Product Description:

The Disc Brake Pad Set, identified by Product Code DBPS, is an exceptional choice for vehicle owners seeking reliable and high-performance braking solutions. Manufactured under the Factory No: ZK-27017 and bearing the Manufacturer Part Number Herito-001, this set is expertly crafted to meet stringent quality standards, ensuring both safety and durability. Each set contains 4 pieces, providing a complete replacement for most disc brake systems, making it an ideal option for those looking to maintain or upgrade their vehicle's braking components.

One of the standout features of this Disc Brake Pad Set is its composition of good ceramic brake pads. Ceramic brake pads are renowned for their superior ability to deliver consistent braking power while minimizing noise and dust. Unlike traditional metallic brake pads, ceramic variants produce less brake dust, helping to keep your wheels cleaner and reducing the need for frequent maintenance. Additionally, good ceramic brake pads offer excellent heat dissipation, which helps in preventing brake fade during prolonged or aggressive braking, thus enhancing overall driving safety.

These disc brake pads are designed with precision to fit a wide range of vehicle models, ensuring optimal compatibility and performance. Whether you are replacing worn-out pads or upgrading from OEM brake pads, this set provides a seamless fit and robust braking efficiency. As OEM brake pads are the original equipment manufacturer products, they are often considered the benchmark for quality and reliability. This Disc Brake Pad Set rivals OEM brake pads by delivering comparable, if not superior, performance, making it a cost-effective and trustworthy alternative for discerning customers.

Durability and longevity are critical factors when choosing brake pads, and this product excels in both areas. With a guarantee period covering 30,000 to 50,000 kilometers, drivers can trust that these disc brake pads will maintain their effectiveness over an extended period, reducing the frequency of replacements and associated costs. This longevity is a testament to the meticulous manufacturing process and the high-grade materials used, ensuring that every braking experience is smooth, responsive, and safe.

In addition to performance, the Disc Brake Pad Set also emphasizes environmental responsibility. The ceramic material used is less abrasive and generates fewer particulate emissions compared to conventional brake pads, contributing to a cleaner environment. This aspect is increasingly important as more drivers seek eco-friendly automotive components without compromising on safety or performance.

Installation of the 4-piece Disc Brake Pad Set is straightforward, making it accessible for both professional mechanics and knowledgeable DIY enthusiasts. The set comes complete with all necessary components to facilitate a hassle-free replacement process. Proper installation ensures that the disc brake pads function at their highest potential, delivering excellent stopping power and enhanced vehicle control under various driving conditions.

To summarize, the Disc Brake Pad Set (Product Code: DBPS, Factory No: ZK-27017, Manufacturer Part Number: Herito-001) offers a comprehensive package of quality, performance, and durability. Featuring good ceramic brake pads, it ensures quieter operation, less dust, and superior heat management compared to traditional brake pads. With an impressive guarantee period of 30,000 to 50,000 kilometers and a set quantity of 4 pieces, this product is tailored to meet the needs of drivers who demand reliability and efficiency. Whether you are replacing OEM brake pads or seeking an upgrade, this disc brake pad set stands out as a premium choice for maintaining optimal braking performance and vehicle safety.

Features:

- Product Name: Disc Brake Pad Set
- Number of Pieces: 4
- Heat Resistant: Yes, suitable for high-temperature conditions
- Wear Resistance: High wear resistance for extended durability
- Product Code: DBPS
- Thickness: 0.5 Inches for reliable braking performance
- Made from premium materials to provide the best ceramic brake pads experience
- Designed as ceramic brake pads to offer quiet and efficient braking
- Known as ceramic brake pad set that ensures long-lasting performance and safety

Technical Parameters:

Factory No	ZK-27017
Quantity	4 Pieces Per Set
Friction Coefficient	0.35
Type	Brake Pad
Number Of Pieces	4
Width	50mm
Heat Resistant	Yes
Product Type	Brake Pads
Wear Resistance	High Wear Resistance
Thickness	0.5 Inches

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is a premium product originating from China, designed to deliver exceptional braking performance and reliability. This set includes 4 pieces per set, perfectly matching the OEM brake pads specifications with FMSI number D1368, ensuring a seamless fit for compatible vehicles. The Herito disc brake pads are engineered to withstand high temperatures, making them heat resistant and ideal for various driving conditions.

These brake pads are the best ceramic brake pads available for drivers looking for a balance of performance, durability, and quiet operation. Their ceramic composition provides superior stopping power while producing minimal dust, which helps keep wheels cleaner compared to traditional brake pads. The heat-resistant feature allows these disc brake pads to perform consistently even under extreme braking situations, such as during long downhill drives or heavy traffic stops.

The application occasions for the Herito disc brake pad set are vast. They are perfectly suited for daily commuting, providing smooth and reliable braking in city traffic, suburban roads, and highway driving. Whether you are running errands, commuting to work, or embarking on weekend road trips, these OEM brake pads ensure safety and confidence behind the wheel. Additionally, they are ideal for use in vehicles that experience frequent stop-and-go conditions, such as delivery trucks, taxis, or ride-sharing cars, due to their durability and fade resistance.

In terms of scenarios, the Herito disc brake pads are an excellent choice for both personal and commercial vehicles needing a dependable braking system upgrade or replacement. They perform exceptionally well in wet and dry conditions, making them suitable for a variety of climates and weather patterns. Their heat-resistant properties also make them suitable for performance driving enthusiasts who require reliable braking during spirited driving or light track use. Furthermore, these brake pads are an excellent option for those seeking OEM brake pads that match original equipment standards, ensuring vehicle safety and maintaining manufacturer warranties.

Overall, the Herito Disc Brake Pad Set ZK-10001 combines advanced ceramic technology with practical design features to offer a reliable, heat-resistant braking solution. Whether for routine driving, heavy-duty use, or performance scenarios, these 4-piece disc brake pads provide consistent stopping power, longevity, and low noise, making them a smart choice for anyone in need of the best ceramic brake pads on the market.

Customization:

Herito offers customization services for the Disc Brake Pad Set, model number ZK-10001, ensuring you receive the best brake pad material tailored to your needs. Manufactured in China, these ceramic brake pads feature a thickness of 0.5 inches and a width of 50mm, designed to provide optimal performance and durability. Each set includes 4 pieces, compatible with FMSI number D1368. Whether you require specific dimensions or material enhancements, Herito's customization services guarantee high-quality disc brake pads that meet your exact specifications.
