

Herito-001 ceramic brake pad 4 pieces per set manufactured to meet strict standards providing braking performance under diverse conditions

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Product Code: DBPS
- Manufacturer Part Number: Herito-001
- Thickness: 0.5 Inches
- Product Type: Brake Pads
- Quantity: 4 Pieces Per Set
- Type: Brake Pad
- Fmsi: D1368
- Width: 50mm

Product Description

Product Description:

The Disc Brake Pad Set with Factory No: ZK-27017 is an essential upgrade for any vehicle owner looking to enhance braking performance and safety. Designed with precision and durability in mind, this set includes four high-quality brake pads, making it an ideal choice for a complete axle replacement. Each pad measures 0.5 inches in thickness and 50mm in width, ensuring optimal contact area for efficient braking power and consistent stopping performance.

One of the standout features of this Disc Brake Pad Set is its ceramic composition. Known as the best ceramic brake pads available, these pads offer superior heat dissipation, reduced brake dust, and quieter operation compared to traditional metallic or organic pads. The ceramic material not only helps in maintaining a stable friction coefficient under various driving conditions but also extends the lifespan of both the brake pads and the rotors, resulting in less frequent replacements and maintenance.

Included in the set are four individual pads, perfectly matched to work in unison for balanced braking force. This number of pieces ensures you have all the necessary components to replace the brake pads on one axle, providing a complete solution that guarantees safety and reliability. The dimensions of each pad – 0.5 inches thickness and 50mm width – are carefully engineered to fit a wide range of vehicles, making this product versatile and convenient for many applications.

For those who prefer to perform their own brake maintenance, using the right brake pad tool is crucial. This Disc Brake Pad Set is compatible with most standard brake pad tools, allowing for easy installation and removal. Whether you are a professional mechanic or a DIY enthusiast, having the correct brake pad tool will make the process smoother, ensuring the pads are securely fitted to deliver maximum braking efficiency. The set's design also facilitates quick replacement, minimizing downtime and getting you safely back on the road faster.

In addition to its performance benefits, the Disc Brake Pad Set with Factory No: ZK-27017 is engineered to meet stringent quality standards. Each component undergoes rigorous testing to guarantee consistent braking force, resistance to wear, and compatibility with various brake systems. This commitment to quality ensures that you are investing in one of the best ceramic brake pads on the market, providing peace of mind whether you're commuting daily or embarking on long-distance journeys.

Moreover, the low noise and vibration characteristics of these ceramic brake pads enhance driving comfort by reducing annoying squeals and harsh feedback during braking. This feature not only improves the overall driving experience but also contributes to lower maintenance costs since the pads cause less rotor wear. The brake pad tool compatible design further supports easy upkeep, making this Disc Brake Pad Set a practical and economical choice for vehicle owners.

In summary, the Disc Brake Pad Set Factory No: ZK-27017 is a top-tier product that combines superior materials, precise dimensions, and user-friendly installation features. With a thickness of 0.5 inches and a width of 50mm, these four ceramic brake pads provide excellent stopping power, durability, and quiet operation. When paired with the appropriate brake pad tool, this set ensures a hassle-free upgrade or replacement process. Whether you are searching for the best ceramic brake pads or a reliable brake pad tool compatible set, this Disc Brake Pad Set is designed to exceed expectations and deliver consistent, safe braking performance under all driving conditions.

Features:

Product Name: Disc Brake Pad Set

Heat Resistant: Yes, ensuring optimal performance under high temperatures

Wear Resistance: High Wear Resistance for prolonged durability

Guarantee Period: 30000-50000km for reliable long-term use

Manufacturer Part Number: Herito-001

Quantity: 4 Pieces Per Set, complete for front or rear axle replacement

Recognized as one of the best ceramic brake pads on the market

Produced by the best brake pad brand, ensuring quality and safety

Compatible with standard brake pad tools for easy installation

Technical Parameters:

Manufacturer Part Number	Herito-001
Wear Resistance	High Wear Resistance
Friction Coefficient	0.35
Type	Brake Pad
Product Type	Brake Pads
Factory No	ZK-27017
Thickness	0.5 Inches
Quantity	4 Pieces Per Set
Number of Pads	4
FMSI	D1368

This ceramic brake pad set is produced by the best brake pad brand, ensuring high performance and durability. Designed as a reliable ceramic brake pad option, it offers excellent wear resistance and a friction coefficient of 0.35 for optimal braking efficiency.

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is expertly designed to deliver superior braking performance across a wide range of applications. Manufactured in China by a trusted name in automotive components, Herito, this set features a friction coefficient of 0.35, ensuring reliable and consistent stopping power. With a thickness of 0.5 inches, these disc brake pads provide durability and long-lasting wear, making them an excellent choice for both everyday driving and more demanding scenarios.

This set of disc brake pads is ideal for use in passenger vehicles, including sedans, SUVs, and light trucks, where safety and performance are paramount. The high-quality ceramic brake pad material used in Herito-001 offers exceptional heat dissipation and reduces brake dust, making it one of the best ceramic brake pads available on the market. This ensures cleaner wheels and an extended lifespan for the braking system, which is especially beneficial for drivers who frequently navigate urban environments with stop-and-go traffic.

For enthusiasts and professionals who require dependable braking during spirited driving or occasional track use, these disc brake pads provide the confidence needed to handle aggressive stops without compromising comfort or control. The Herito DBPS set is also suitable for light commercial vehicles that demand a balance between performance and durability under varying load conditions. The factory number ZK-27017 guarantees that each pad meets stringent quality standards, delivering consistent friction and minimizing wear.

In everyday commuting scenarios, the Herito ceramic brake pad excels by offering quiet operation and minimal vibration, enhancing the overall driving experience. Whether you are driving through busy city streets, cruising on highways, or navigating mountainous terrain, these disc brake pads maintain optimal braking efficiency in all weather conditions. Their corrosion-resistant backing plates further contribute to longevity and reliability over time.

Overall, the Herito Disc Brake Pad Set (Product Code: DBPS) is a versatile and high-performance solution for anyone seeking the best ceramic brake pads for their vehicle. Its combination of advanced ceramic materials, precise manufacturing, and robust design makes it a trusted choice for diverse driving occasions and scenarios, ensuring safety and peace of mind on every journey.

Customization:

Our Herito Disc Brake Pad Set, model number ZK-10001, offers premium product customization services to meet your specific needs. Manufactured in China, these brake pads are designed with the best ceramic brake pads material, ensuring superior heat resistance and durability for optimal performance. Each set includes 4 pieces, with the manufacturer part number Herito-001 and FMSI code D1368, making it easy to find the perfect fit for your vehicle. Trust Herito for the best brake pad material that delivers safety, reliability, and long-lasting braking power.
