

## 50mm Disc Brake Pad Set ZK27017 Brake Pads Engineered for Long Lasting Performance in Commercial Vehicle Braking Systems

Our Product Introduction

for more products please visit us on [heritobrake.com](http://heritobrake.com)

### Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

### Product Specification

- Quantity: 4 Pieces Per Set
- Product Type: Brake Pads
- Manufacturer Part Number: Herito-001
- Heat Resistant: Yes
- Product Code: DBPS
- Number Of Pieces: 4
- Numberofpads: 4
- Factory No: ZK-27017

Product Description:

The Disc Brake Pad Set, identified by the Manufacturer Part Number Herito-001, represents a premium choice for vehicle owners seeking reliable and efficient braking performance. Engineered with advanced materials and meticulous craftsmanship, this product stands out as one of the best ceramic brake pads available in the market today. Its design focuses on delivering superior stopping power, longevity, and safety, making it an essential upgrade for any braking system.

One of the key features of this Disc Brake Pad Set is its exceptional heat resistance. High temperatures generated during braking can often lead to brake fade, reduced effectiveness, and accelerated wear. However, these brake pads are specifically formulated to withstand intense heat without compromising their structural integrity or performance. As a result, drivers can experience consistent and reliable braking even under demanding conditions such as steep descents, heavy traffic, or spirited driving.

Constructed as a ceramic brake pad, this product offers numerous advantages over traditional brake pad materials. Ceramic brake pads are renowned for their quieter operation, reduced dust production, and smoother braking feel. This Disc Brake Pad Set embodies these benefits, ensuring a more comfortable and cleaner driving experience. The ceramic composition not only enhances performance but also extends the lifespan of the brake pads, thanks to its high wear resistance.

Wear resistance is a critical factor when selecting brake pads, as it directly impacts maintenance frequency and overall cost of ownership. The Herito-001 brake pads boast high wear resistance, meaning they can endure extensive use without significant degradation. This durability translates into prolonged service intervals and less frequent replacements, offering excellent value for money. Whether you drive in urban environments with frequent stops or on highways requiring steady braking, these pads maintain their efficiency and reliability over time.

In addition to functional performance, this Disc Brake Pad Set also contributes to environmental cleanliness. The ceramic materials produce minimal brake dust compared to other types, which helps keep wheels and surrounding areas cleaner. Reduced dust not only improves aesthetic appeal but also lessens the inhalation of harmful particles, contributing to a healthier environment.

Designed specifically as brake pads, this product seamlessly integrates with various vehicle models and braking systems. The precision manufacturing process ensures proper fitment, easy installation, and optimal contact with the brake rotors. This compatibility enhances braking responsiveness and safety, giving drivers confidence in every stop. Furthermore, the product's robust construction helps prevent issues such as cracking or glazing, which can impair braking efficiency.

Choosing the best ceramic brake pads such as the Herito-001 Disc Brake Pad Set means investing in a product that prioritizes performance, durability, and driver comfort. Its heat-resistant properties, combined with high wear resistance, ensure that the brake pads perform reliably under all driving conditions. Whether you are a daily commuter, a weekend enthusiast, or someone who values vehicle safety above all, these ceramic brake pads offer a superior solution that meets and exceeds expectations.

In summary, the Herito-001 Disc Brake Pad Set is an outstanding product within the category of brake pads, designed to provide enhanced braking power, long-lasting durability, and environmental benefits. Its ceramic composition makes it one of the best ceramic brake pads on the market, while its heat resistance and wear resistance attributes guarantee a dependable and comfortable driving experience. For anyone looking to upgrade their braking system with high-quality, efficient, and reliable brake pads, this product represents an excellent choice.

Features:

- Product Name: Disc Brake Pad Set -----
- Number of Pieces: 4
- Quantity: 4 Pieces Per Set
- Product Code: DBPS
- High Wear Resistance for Long-lasting Performance
- Width: 50mm
- Made from premium materials, recognized as the best ceramic brake pads
- Designed to provide superior braking power with ceramic brake pads technology
- Trusted as the best brake pad brand for safety and durability

Technical Parameters:

|                      |                      |
|----------------------|----------------------|
| Product Type -----   | Brake Pads -----     |
| Type                 | Brake Pad            |
| Product Code         | DBPS                 |
| Factory No           | ZK-27017             |
| Width                | 50mm                 |
| Thickness            | 0.5 Inches           |
| Quantity             | 4 Pieces Per Set     |
| Number Of Pieces     | 4                    |
| Friction Coefficient | 0.35                 |
| Wear Resistance      | High Wear Resistance |

## Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to provide superior braking performance across a wide range of applications and scenarios. As one of the best brake pad brands originating from China, Herito offers a product that meets the highest standards of safety, durability, and efficiency. Each set contains 4 pieces, ensuring a complete replacement for your vehicle's braking system. The product code DBPS and factory number ZK-27017 further guarantee authenticity and quality control. These brake pads are engineered with a friction coefficient of 0.35, delivering reliable stopping power and excellent heat dissipation. This makes them ideal for everyday driving conditions as well as more demanding situations such as mountainous terrain, stop-and-go city traffic, and highway cruising. The Herito ZK-10001 brake pads are especially recommended for drivers who prioritize safety and smooth braking performance in their vehicles.

One of the key scenarios where the Herito Disc Brake Pad Set excels is in urban commuting. Frequent stops at traffic lights and heavy congestion require brake pads that can withstand constant use without fading or losing effectiveness. Thanks to their ceramic composition, these pads are among the best ceramic brake pads available on the market, offering reduced noise, less dust, and longer lifespan compared to traditional metallic brake pads.

Another important application occasion is off-road and recreational driving. Whether you are driving an SUV or a pickup truck, the Herito brake pads provide enhanced durability and performance under varied conditions such as dirt roads, gravel paths, and uneven surfaces. Their robust construction ensures consistent braking power, contributing to a safer driving experience in challenging environments.

For performance enthusiasts and daily drivers alike, the Herito Disc Brake Pad Set represents an excellent choice. They offer a balance of comfort, reliability, and efficiency, making them suitable for a wide range of vehicles and driving habits. As the best ceramic brake pads available, they reduce brake dust accumulation and minimize rotor wear, which helps maintain the braking system in optimal condition over time.

In summary, the Herito ZK-10001 brake pads are perfect for anyone looking for the best brake pad brand with proven performance in multiple scenarios—from urban commuting and highway driving to off-road adventures. Their superior friction coefficient of 0.35, ceramic material benefits, and complete 4-piece set packaging ensure that your braking system performs reliably and safely under all driving conditions.

## Customization:

Herito offers customized Disc Brake Pad Sets designed to meet your specific needs. Our model ZK-10001, made in China, features OEM brake pads manufactured with the best brake pad material to ensure superior performance and durability. Each set contains 4 pieces per set (FMSI: D1368) and is engineered to provide excellent heat resistance, making them ideal disc brake pads for various vehicles. We guarantee a service life of 30,000 to 50,000 km, ensuring long-lasting safety and reliability. Trust Herito for high-quality, customized brake solutions tailored to your requirements.
