

High Wear Resistance Disc Brake Pad Set Product Code DBPS Standard Providing Durable and Braking Solutions for Industrial

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Friction Coefficient: 0.35 - 0.45
- Factory No: ZK-23015
- Durability: High Wear Resistance
- Package Quantity: 1 Set
- Frictioncoefficient: 0.35
- Installation Method: Clip-on
- Size: Standard
- Product Code: DBPS

Product Description:

The Disc Brake Pad Set, Factory No: ZK-23015, is designed to offer superior braking performance, reliability, and safety for a wide range of vehicles. Engineered with precision and crafted from high-quality materials, this brake pad set stands out as one of the best ceramic brake pads available on the market today. Whether you are a daily commuter or a performance enthusiast, these brake pads provide the perfect balance of efficiency, durability, and comfort.

One of the most remarkable features of this Disc Brake Pad Set is its excellent heat dissipation capability. During braking, excessive heat can lead to brake fade, reduced performance, and accelerated wear. The advanced design and materials used in this brake pad set allow it to dissipate heat efficiently, maintaining optimal temperature levels even under heavy braking conditions. This ensures consistent braking power and enhances the overall safety of your vehicle by reducing the risk of brake failure.

The friction coefficient of this brake pad set ranges between 0.35 and 0.45, which is an ideal range for providing reliable stopping power without compromising pad longevity or rotor wear. This friction range ensures that the pads grip the rotors firmly, delivering smooth and responsive braking performance every time you press the pedal. It also helps in achieving a balanced braking feel, which is crucial for safe driving in various weather and road conditions.

Designed with a standard size, the Disc Brake Pad Set fits seamlessly into most compatible braking systems without requiring any modifications. This makes installation straightforward and convenient, whether you are performing a DIY brake replacement or having it installed by a professional mechanic. The standard sizing also means that these pads are versatile and can be used across a broad spectrum of vehicles, making them an excellent choice for those looking for good ceramic brake pads that combine quality and compatibility.

In addition to the primary brake pads, this set comes complete with all necessary accessories needed for a hassle-free installation. The inclusion of these accessories demonstrates the thoughtfulness and attention to detail that went into the design of this product. Having all the required components in one package saves time and effort, ensuring that your brake replacement process is smooth and efficient. This comprehensive approach strengthens the appeal of this set as some of the best ceramic brake pads available, providing both convenience and performance.

The use of ceramic materials in this brake pad set contributes significantly to its superior performance. Ceramic brake pads are known for their quiet operation, minimal dust production, and long service life. These characteristics make them highly desirable for drivers who want excellent braking performance without the common drawbacks of traditional brake pads. The Disc Brake Pad Set's ceramic composition ensures quieter braking, reduces the accumulation of brake dust on your wheels, and offers greater durability, making it a smart investment for maintaining your vehicle's braking system.

Overall, the Disc Brake Pad Set (Factory No: ZK-23015) is an outstanding choice for anyone seeking the best ceramic brake pads that combine excellent heat dissipation, optimal friction coefficient, and standard sizing for easy installation. The inclusion of accessories further enhances the product's value, making it a comprehensive solution for brake maintenance and replacement. Whether you are upgrading your vehicle's braking system or replacing worn-out pads, this set offers the reliability, safety, and performance you need. If you are in the market for good ceramic brake pads that deliver both quality and value, this Disc Brake Pad Set is an excellent option to consider.

In conclusion, with its superior heat management, ideal friction range, standard sizing, and complete accessory package, this Disc Brake Pad Set stands out as one of the best ceramic brake pads available. It promises enhanced braking performance, increased safety, and long-lasting durability, making it a wise choice for drivers who prioritize quality and dependability in their vehicle's braking system.

Features:

- Product Name: Disc Brake Pad Set
- High Wear Resistance for long-lasting performance
- Product Code: DBPS
- Easy Clip-on Installation Method
- Friction Coefficient: 0.35 for effective braking
- Package Quantity: 1 Set
- Compatible with brake pad tool for easy maintenance
- Made from best brake pad material, featuring ceramic brake pad technology

Technical Parameters:

Heat Resistance	Up To 650°F (343°C)
Installation Method	Clip-on
Factory No	ZK-23015
Size	Standard
Product Code	DBPS
Accessories	Yes
Heat Dissipation	Excellent Heat Dissipation
Friction Coefficient	0.35
Durability	High Wear Resistance
Wear Resistance	High Wear Resistance

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is an excellent choice for drivers seeking reliable and efficient braking performance. Manufactured in China, this set features good ceramic brake pads designed to provide superior stopping power while maintaining a smooth and quiet operation. These ceramic brake pads are ideal for a wide range of vehicles, thanks to their standard size and 12 mm thickness, ensuring a perfect fit and durability over extended use.

This product is perfect for everyday driving scenarios, whether you are commuting through busy city streets or cruising on the highway. The ceramic brake pads in this set offer excellent heat dissipation and reduced brake dust, making them suitable for vehicles that experience frequent stop-and-go traffic or long-distance travel. Their design reduces wear on the rotors, making this Disc Brake Pad Set a cost-effective OE replacement option for maintaining your vehicle's braking system without compromising safety or performance.

Herito's Disc Brake Pad Set comes with necessary accessories included, ensuring a hassle-free installation process. Although the set does not include a wear sensor, its high-quality ceramic brake pads provide consistent performance that minimizes the need for frequent inspections or replacements. This makes the product ideal for drivers who value convenience and reliability in their vehicle maintenance routine.

Whether you are a daily commuter, a weekend adventurer, or someone who depends on their vehicle for work, these ceramic brake pads are engineered to meet the demands of various driving conditions. Their robust construction and excellent braking efficiency make them suitable for use in passenger cars, SUVs, and light trucks. The Herito ZK-10001 Disc Brake Pad Set is especially recommended for those looking to upgrade from standard metallic pads to good ceramic brake pads, offering improved comfort, reduced noise, and enhanced overall braking performance.

In summary, the Herito Disc Brake Pad Set combines high-quality materials, thoughtful design, and practical accessories to deliver a dependable braking solution. Its compatibility as an OE replacement, standard sizing, and 12 mm thickness ensure it fits seamlessly into your vehicle's braking system. Choose this set for a safer, quieter, and more efficient driving experience backed by the trusted Herito brand.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, designed and manufactured in China. This high-quality ceramic brake pad features a thickness of 12 mm and comes in a package quantity of 1 set. Although the wear sensor is not included, the brake pads provide excellent heat resistance up to 650°F (343°C), ensuring reliable performance under demanding conditions. Whether you are looking for the best ceramic brake pads or good ceramic brake pads for your vehicle, Herito's DBPS product code guarantees durability and efficiency. Customize your ceramic brake pad set with Herito to meet your specific requirements and experience superior braking performance.

Support and Services:

Our Disc Brake Pad Set is designed to provide superior stopping power and enhanced safety for your vehicle. Engineered with high-quality materials, these brake pads offer excellent wear resistance and low noise performance.

For optimal performance, it is recommended to replace brake pads in pairs (both front or both rear) to ensure balanced braking. Always inspect the rotors and other brake components during replacement to maintain overall system integrity.

Installation should be carried out by a qualified technician following the vehicle manufacturer's specifications. Proper bed-in procedures after installation will maximize braking efficiency and pad lifespan.

If you experience any issues such as unusual noise, vibration, or reduced braking performance, please have your brake system checked immediately. Regular maintenance and timely replacement of brake pads are crucial for safe driving.

We stand behind the quality of our Disc Brake Pad Set and offer support for any technical inquiries or concerns regarding installation or performance.
