

1 Set Disc Brake Pad Set Standard Wear Sensor Included No Durable Replacement Parts for Industrial Vehicles and Machinery

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Installation Method: Clip-on
- Wear Sensor Included: No
- Thickness: 12 Mm
- Product Code: DBPS
- Factory No: ZK-23015
- Frictioncoefficient: 0.35
- Heat Dissipation: Excellent Heat Dissipation
- Oe Replacement: Yes

Product Description:

The Disc Brake Pad Set, coded as DBPS, represents a pinnacle in braking technology designed to provide superior stopping power, excellent durability, and enhanced safety for a wide range of vehicles. Engineered with precision and manufactured to meet stringent quality standards, these disc brake pads are an excellent choice for drivers seeking reliable performance paired with excellent heat dissipation properties. Whether you are replacing worn-out pads or upgrading your braking system, this set offers an optimal balance between safety, comfort, and efficiency.

One of the standout features of this Disc Brake Pad Set is its friction coefficient, ranging between 0.35 and 0.45. This range ensures consistent and powerful braking performance across various driving conditions, including both city traffic and high-speed highway scenarios. A friction coefficient of 0.35 indicates the pad's ability to generate strong friction against the brake rotor, which is critical for swift vehicle deceleration and stopping distance reduction. This characteristic makes the DBPS a trusted choice among the best brake pad brands in the market, delivering dependable control whenever you need it most.

Installation is straightforward and user-friendly thanks to the clip-on method employed in this brake pad set. The clip-on installation method not only simplifies the replacement process but also guarantees a secure fit that maintains the brake pads firmly in place during operation. This ease of installation reduces maintenance time and costs, making it an ideal pick for both professional mechanics and DIY enthusiasts. The secure clip-on design also helps prevent vibrations and noise, ensuring a quieter and smoother braking experience.

Heat dissipation is a critical factor in brake pad performance, especially during prolonged braking or aggressive driving. Excessive heat can lead to brake fade, decreased friction, and premature wear. The Disc Brake Pad Set excels in this area with its excellent heat dissipation capabilities, efficiently channeling heat away from the braking surface to maintain optimal temperatures. This feature helps preserve the integrity of the brake pads and rotors, prolonging their lifespan and maintaining consistent braking power under demanding conditions. Drivers can rely on these pads for safety and performance, even during intense braking scenarios such as downhill driving or emergency stops.

Another important aspect of the DBPS is its material composition, which aligns with the qualities expected from good ceramic brake pads. Ceramic brake pads are known for their quiet operation, minimal dust production, and gentle wear on rotors compared to other pad types. By incorporating ceramic technology, this disc brake pad set offers a clean and comfortable driving experience without compromising braking efficiency. The ceramic material also contributes to the excellent heat dissipation and stable friction coefficient, making it a well-rounded option for everyday use and performance driving alike.

When considering the best brake pad brand to trust for your vehicle, the DBPS disc brake pad set stands out due to its comprehensive performance attributes and build quality. It balances safety, comfort, and durability while maintaining an accessible installation process. Whether you prioritize quiet braking, long-lasting components, or consistent stopping power, this product delivers on all fronts.

In summary, the Disc Brake Pad Set with product code DBPS offers a friction coefficient range of 0.35 to 0.45, clip-on installation convenience, and excellent heat dissipation, making it a superior choice for those seeking reliable and high-performance disc brake pads. Its ceramic-based formulation ensures it ranks among the good ceramic brake pads available, providing quiet, clean, and effective braking. For anyone looking to upgrade their braking system or replace worn pads with a dependable product from the best brake pad brand, the DBPS set is an outstanding solution that combines innovative engineering with practical benefits to enhance your driving safety and experience.

Features:

- Product Name: Disc Brake Pad Set
- Friction Coefficient: 0.35 - 0.45 for optimal braking performance
- Size: Standard fit for most vehicles
- High Wear Resistance ensures long-lasting durability
- Product Code: DBPS for easy identification
- Package Quantity: 1 Set
- Made with quality ceramic materials, a reliable ceramic brake pad solution
- Considered among the best ceramic brake pads available on the market
- Designed to provide smooth and quiet braking with this ceramic brake pad set

Technical Parameters:

Product Code	DBPS
Durability	High Wear Resistance
Thickness	12 Mm
Size	Standard
Accessories	Yes
Friction Coefficient	0.35 - 0.45
Factory No	ZK-23015
Heat Dissipation	Excellent Heat Dissipation
OE Replacement	Yes

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to deliver exceptional performance in a wide range of application occasions and scenarios. Manufactured in China, this set boasts a thickness of 12 mm and excellent heat dissipation properties, making it an ideal choice for drivers who demand reliability and efficiency from their braking system. As a trusted product under the best brake pad brand Herito, this brake pad set ensures smooth and consistent braking performance, providing peace of mind in various driving conditions.

One of the primary application occasions for the Herito Disc Brake Pad Set is daily urban driving. Whether you are commuting through busy city streets or running errands, these good ceramic brake pads offer quiet, smooth stopping power with minimal brake dust, which helps maintain the cleanliness of your wheels. Their excellent heat dissipation capabilities make them perfect for stop-and-go traffic, where frequent braking can generate significant heat. This ensures the brake pads maintain optimal performance without fading or excessive wear.

For longer highway journeys, the Herito brake pad set excels by providing reliable braking stability even at higher speeds. The 12 mm thickness contributes to durability, allowing the pads to withstand the demands of extended use. Additionally, the absence of a wear sensor means less complexity in installation and maintenance, making it convenient for vehicle owners who prefer straightforward brake pad replacements with the help of a good brake pad tool.

Off-road and more aggressive driving scenarios also benefit from the robust design and OE replacement compatibility of this product. The Herito ZK-10001 brake pads can handle sudden braking and rough terrain, thanks to their excellent heat dissipation and high-quality ceramic composition. Whether you're navigating mountain trails or rugged landscapes, these disc brake pads provide dependable stopping power and long-lasting wear resistance.

In summary, the Herito Disc Brake Pad Set (Product Code: DBPS) is a versatile and high-performance choice suitable for a variety of driving scenarios. It blends the benefits of good ceramic brake pads with the reliability of the best brake pad brand, backed by a design that prioritizes heat dissipation and durability. Perfect for commuters, highway drivers, and off-road enthusiasts alike, this brake pad set ensures safety and efficiency without compromise.

Customization:

Herito presents the Disc Brake Pad Set, model number ZK-10001, a product of superior quality originating from China. As one of the best brake pad brands, Herito ensures high wear resistance for extended durability and reliable performance. These ceramic brake pads are designed with a 12 mm thickness and feature a convenient clip-on installation method for effortless fitting. The set is an OEM brake pads replacement, guaranteeing perfect compatibility and optimal braking efficiency. Please note that the wear sensor is not included with this model. Choose Herito for a trusted and durable braking solution.

Support and Services:

Our Disc Brake Pad Set is designed to provide superior stopping power and enhanced durability for a wide range of vehicles. Engineered with high-quality friction materials, these brake pads ensure consistent performance under various driving conditions, including wet and dry environments.

For optimal performance, it is recommended to install the brake pads as a complete set and to replace them when the friction material thickness reaches the manufacturer's minimum specification. Proper installation by a qualified technician is essential to ensure safety and longevity.

Regular inspection of the brake pads and related components is advised to detect any signs of wear or damage. If you experience unusual noises, vibrations, or reduced braking efficiency, please have your braking system checked promptly.

We offer comprehensive support to assist with product selection, installation guidance, and troubleshooting. Our technical team is dedicated to helping you achieve the best performance and safety from your Disc Brake Pad Set.

For maintenance tips and warranty information, please refer to the product manual included with your purchase.
