Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Model: Mazda RX-8
- Type: Parking Brake
- After Service: Yes
- Hardware Included: Yes
- Friction Coefficient: 0.35
- Warranty: 12 Months
- Package Quantity: 1 Set
- Braking System: TKO

Product Description

Product Description:

The Disc Brake Pad Set is an essential component designed specifically for the Mazda RX-8, delivering exceptional braking performance with superior reliability. With a thickness of 12 mm, these brake pads offer durability and long-lasting wear resistance, ensuring that your vehicle maintains optimal stopping power over an extended period. Crafted using the best ceramic brake pads technology, this set provides a perfect balance of performance, safety, and comfort for everyday driving and spirited adventures alike.

One of the standout features of this disc brake pad set is its low noise level. Unlike traditional brake pads that often produce squealing or grinding sounds, these ceramic brake pads are engineered to operate quietly, enhancing your driving experience. The low noise characteristic not only contributes to a more comfortable ride but also indicates the high-quality materials and precise manufacturing standards used in these pads.

These brake pads boast a friction coefficient of 0.35, which is ideal for consistent and reliable braking performance. This friction level ensures that the pads provide strong stopping power while maintaining smooth engagement and preventing excessive wear on the rotors. The superior friction characteristics of these pads make them a top choice among drivers seeking both safety and efficiency on the road. The Disc Brake Pad Set is designed to meet or exceed OEM specifications for the Mazda RX-8, making it an excellent replacement option for worn or damaged brake components. The high-quality ceramic material used in these pads is widely regarded as the best brake pad material available, offering several advantages over traditional semi-metallic or organic pads. Ceramic brake pads produce less brake dust, which helps keep your wheels cleaner and reduces the likelihood of corrosion. Additionally, they maintain stable performance across a wide range of temperatures and driving conditions, making them highly versatile.

In addition to their functional benefits, these brake pads are also easy to install, allowing for a straightforward replacement process.

Whether you are a professional mechanic or a car enthusiast performing your own maintenance, the fitment and design of this disc brake pad set ensure a hassle-free upgrade. The UPC code 123456789012 guarantees authenticity and facilitates easy purchase and inventory tracking.

Choosing the best ceramic brake pads for your Mazda RX-8 means investing in quality, safety, and peace of mind. Ceramic brake pads are known for their longevity and consistent braking performance, which translates into fewer replacements and lower maintenance costs over time. Their ability to operate quietly and produce less dust also enhances the overall driving experience, making them the preferred choice for many drivers.

In summary, the Disc Brake Pad Set for Mazda RX-8 combines advanced ceramic brake pad technology with an optimal thickness of 12 mm, low noise operation, and a reliable friction coefficient of 0.35 to deliver outstanding braking performance. As the best brake pad material available, these ceramic brake pads offer superior durability, cleanliness, and safety, making them the best ceramic brake pads option for your vehicle. Whether you are upgrading your braking system or replacing worn pads, this set ensures that your Mazda RX-8 remains responsive and safe under all driving conditions.

Features:

Product Name: Disc Brake Pad Set

Type: Parking Brake

Friction Coefficient: 0.35 for reliable stopping power

Includes Hardware for easy installation

Warranty: 12 Months for peace of mind

After Service: Yes, dedicated customer support available

Made with high-quality ceramic brake pad material

Compatible with OEM brake pads specifications

Considered among the best ceramic brake pads for durability and performance

Technical Parameters:

Package Quantity	1 Set
Type	Parking Brake
Warranty	12 Months
Hardware Included	Yes
Easy To Install	Yes
Dimensions	120mm X 50mm X 15mm
Thickness	12 Mm
After Service	Yes
Friction Coefficient	0.35
Braking System	TKO

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is an essential component for any vehicle's parking brake system.

Manufactured in China, these disc brake pads are designed with high wear resistance materials, ensuring long-lasting durability and reliable performance. With product dimensions of 8.5 X 6.5 X 0.7 inches, this set fits seamlessly into the TKO braking system, providing efficient stopping power and enhanced safety.

These disc brake pads are ideal for various application occasions and scenarios, especially where dependable parking brake functionality is crucial. Whether you are parking on steep inclines, in busy urban environments, or in rugged off-road conditions, the Herito disc brake pads deliver consistent performance. Their high-quality ceramic composition makes them good ceramic brake pads that reduce noise, minimize dust, and offer superior heat dissipation compared to standard brake pads.

In daily driving scenarios, the Herito disc brake pads ensure smooth and secure parking brake engagement, preventing vehicle rollbacks and enhancing driver confidence. They are well-suited for both personal vehicles and commercial fleets that require reliable parking brake systems to meet safety standards. Additionally, their high wear resistance makes them perfect for vehicles frequently used in stop-and-go traffic where the parking brake is often engaged and disengaged.

For automotive enthusiasts and mechanics, the Herito ZK-10001 disc brake pads offer an excellent upgrade option. Their compatibility with the TKO braking system means they can be installed easily without extensive modifications, making them a practical choice for maintenance and repair workshops. The product's UPC 123456789012 ensures easy identification and ordering, supporting efficient inventory management.

In summary, the Herito disc brake pads combine advanced materials and precise engineering to provide a reliable parking brake solution. Their good ceramic brake pads qualities, including noise reduction and durability, make them suitable for a wide range of vehicles and driving conditions. Whether for everyday use or specialized applications, these disc brake pads offer peace of mind and enhanced safety wherever they are employed.

Customization:

Herito offers customization services for the Disc Brake Pad Set, model number ZK-10001, designed and manufactured in China. Our brake pad tool ensures easy installation, making it convenient for users to upgrade their braking system with confidence. Featuring low noise performance and dimensions of 120mm X 50mm X 15mm, these brake pads are optimized for the TKO braking system, providing a friction coefficient of 0.35 for reliable stopping power. Choose Herito for the best ceramic brake pads that deliver durability, efficiency, and quiet operation.

Support and Services:

Our Disc Brake Pad Set is designed to provide reliable and efficient braking performance for a variety of vehicles. For optimal results, ensure that the brake pads are installed by a qualified technician following the manufacturer's specifications.

Before installation, inspect the brake rotors for any signs of wear or damage. Replace or resurface the rotors if necessary to prevent uneven pad wear and ensure smooth braking.

After installation, break in the new brake pads by performing a series of gradual stops from moderate speeds. This bedding process helps to transfer an even layer of friction material onto the rotor surface, enhancing braking efficiency and pad longevity.

Regular maintenance checks are recommended to monitor pad thickness and overall brake system condition. Replace the brake pads promptly when the thickness reaches the minimum specified limit to maintain safe braking performance.

If you experience any unusual noises, vibrations, or reduced braking effectiveness, have your brake system inspected immediately by a professional technician to diagnose and address any issues.

Using our Disc Brake Pad Set ensures high-quality braking performance backed by rigorous testing and quality control standards. Trust our product to keep your vehicle safe and responsive on the road.
