

Parking Brake Good Ceramic Brake Pads High Temperature Stability After Service Support Designed for Demanding Conditions

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Friction Coefficient: 0.35
- Product Dimensions: 8.5 X 6.5 X 0.7 Inches
- Braking System: TKO
- Model: Mazda RX-8
- Thickness: 12 Mm
- Package Quantity: 1 Set
- Type: Parking Brake
- Warranty: 12 Months

Product Description

Product Description:

The Disc Brake Pad Set is an essential component for maintaining optimal braking performance and ensuring safety on the road. Designed with precision and manufactured using the best brake pad material available, this set guarantees superior stopping power, durability, and reliability. Whether you are a daily commuter or an avid weekend driver, choosing the right brake pad is crucial for both performance and peace of mind, and this product stands out as one of the best brake pad brands in the market today.

One of the standout features of this Disc Brake Pad Set is its ceramic brake pad composition. Ceramic brake pads are widely recognized for their excellent heat dissipation, minimal wear, and consistent performance under various driving conditions. Unlike traditional organic or semi-metallic pads, ceramic brake pads produce less dust, which helps keep your wheels cleaner and enhances the overall aesthetic of your vehicle. Additionally, ceramic material offers a quieter braking experience, as evidenced by the low noise level characteristic of this set, making your drives more comfortable and less disruptive.

The product dimensions are carefully crafted to fit a wide range of vehicles, measuring 8.5 X 6.5 X 0.7 inches. This size ensures compatibility with many brake systems, providing a perfect fit that supports effective braking performance. The package quantity includes 1 set, which contains all the necessary brake pads you need to replace your existing ones, making it a convenient and cost-effective solution for maintenance or upgrades.

Installation is another area where this Disc Brake Pad Set excels. Designed with user-friendliness in mind, the brake pads are easy to install, even for those who may not have extensive mechanical experience. Clear instructions and an intuitive design mean you can complete the installation quickly and confidently, saving time and avoiding the need for professional assistance. This ease of installation makes it an excellent choice for DIY enthusiasts and mechanics alike.

Durability and reliability are key considerations when selecting brake pads, and this product does not disappoint. Backed by a 12-month warranty, the Disc Brake Pad Set offers assurance against defects and premature wear, reflecting the manufacturer's confidence in the quality and longevity of their product. This warranty ensures that customers can invest in these brake pads with confidence, knowing that support is available should any issues arise within the first year of use.

Moreover, the combination of ceramic brake pad technology and the best brake pad material results in enhanced performance across various driving conditions. Whether you encounter stop-and-go city traffic or high-speed highway driving, these brake pads provide consistent and reliable stopping power. The low noise feature further enhances the driving experience by reducing unpleasant squealing sounds commonly associated with inferior brake pads.

In summary, the Disc Brake Pad Set is a top-tier choice for anyone seeking the best brake pad brand that combines quality, performance, and value. Its ceramic brake pad composition, optimal product dimensions, ease of installation, low noise operation, and comprehensive 12-month warranty make it a standout product in the automotive aftermarket. Investing in this set means prioritizing safety, comfort, and durability, ensuring your vehicle's braking system performs at its best every time you hit the road.

Features:

Product Name: Disc Brake Pad Set
Compatible Model: Mazda RX-8
Braking System: TKO
Product Dimensions: 8.5 X 6.5 X 0.7 Inches
Friction Coefficient: 0.35 for reliable stopping power
Hardware Included: Yes, for easy installation
Includes brake pad tool for precise fitting
Designed as one of the best ceramic brake pads for durability and performance
Engineered to provide the best ceramic brake pads experience with reduced noise and dust

Technical Parameters:

Braking System	TKO
After Service	Yes
Type	Parking Brake
Model	Mazda RX-8
Noise Level	Low Noise
Easy To Install	Yes
Hardware Included	Yes
Dimensions	120mm X 50mm X 15mm
Durability	High Wear Resistance
UPC	123456789012

This Disc Brake Pad Set features the best brake pad material, utilizing ceramic brake pad technology to ensure superior performance and longevity. Known as some of the best ceramic brake pads on the market, these pads provide low noise operation and high wear resistance for a reliable and comfortable braking experience.

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is specifically designed for the Mazda RX-8, offering exceptional performance and reliability. Manufactured in China, these OEM brake pads are engineered to meet and exceed original equipment standards, ensuring a perfect fit and optimal braking efficiency. With a thickness of 12 mm and high wear resistance, these disc brake pads provide long-lasting durability, making them an excellent choice for drivers seeking both safety and longevity in their vehicle's braking system. These best ceramic brake pads from Herito are ideal for a wide range of application occasions and scenarios. Whether you are navigating city traffic, embarking on long highway journeys, or tackling winding mountain roads, the ZK-10001 brake pads deliver consistent stopping power and smooth braking performance. Their high wear resistance ensures that they maintain their effectiveness even under heavy use, making them suitable for daily commuting as well as more demanding driving conditions.

The inclusion of all necessary hardware simplifies installation, allowing both professional mechanics and DIY enthusiasts to upgrade their braking system with ease. These disc brake pads are perfect for vehicle owners who prioritize safety, performance, and noise reduction. The ceramic material composition not only enhances braking efficiency but also reduces brake dust and noise, providing a cleaner and quieter driving experience.

In addition to everyday use, the Herito OEM brake pads are suitable for performance driving scenarios where precise and reliable braking is crucial. The advanced design and materials help to dissipate heat effectively, minimizing brake fade during intense braking sessions. This makes them an excellent choice for those who occasionally participate in track days or spirited driving, where maintaining control and safety is paramount.

Overall, the Herito Disc Brake Pad Set ZK-10001 is a versatile, high-quality brake pad solution for Mazda RX-8 owners who demand the best ceramic brake pads on the market. Combining OEM quality, high wear resistance, included hardware, and a 12 mm thickness, these disc brake pads offer exceptional value and performance across diverse driving scenarios and application occasions.

Customization:

Herito offers product customization services for the Disc Brake Pad Set model ZK-10001, proudly made in China. Our brake pads feature a thickness of 12 mm and are designed to work seamlessly with the TKO braking system. We use the best brake pad material to ensure durability and optimal performance, providing you with the best ceramic brake pads available on the market. These OEM brake pads are engineered for low noise operation and are easy to install, making them an excellent choice for both professional mechanics and DIY enthusiasts. Customize your order with Herito to get high-quality, reliable brake pads tailored to your specific requirements.

Support and Services:

Our Disc Brake Pad Set is designed to provide superior stopping power and durability for a wide range of vehicles. For optimal performance, it is important to ensure proper installation and maintenance.

Installation should be carried out by a qualified technician following the vehicle manufacturer's guidelines. Always replace brake pads in pairs to maintain balanced braking performance.

During installation, check the condition of the brake rotors and replace or resurface them if necessary to prevent uneven wear and noise. Use only recommended brake fluids and avoid contamination of the brake components.

After installation, it is recommended to perform a bedding-in process to ensure the pads and rotors achieve optimal contact and performance. This typically involves a series of gradual stops from moderate speeds.

For best results, regularly inspect the brake system for wear and tear, and replace the brake pads when the friction material reaches the minimum thickness specified by the manufacturer.

If you encounter any issues such as unusual noises, vibrations, or reduced braking efficiency, consult a professional mechanic immediately.

Our customer support team is dedicated to assisting you with any questions regarding installation, maintenance, or performance of your Disc Brake Pad Set.
